## PROFESSIONAL SUMMARY

---

Innovative and results-driven Data Scientist (AI/ML) with 4+ years of experience designing, developing, and deploying advanced analytics and machine learning solutions for global enterprises in finance and technology. Proven track record in translating complex business problems into actionable insights through predictive modeling, deep learning, and scalable data pipelines. Skilled at collaborating with cross-functional teams and delivering production-ready models that drive measurable business value. Adept at Python, cloud platforms, big data technologies, and modern ML/AI frameworks — with strong communication and stakeholder-management skills.

## TECHNICAL SKILLS

---

**Programming:** Python, R, SQL, Scala

**ML/AI Frameworks:** Scikit-learn, TensorFlow, PyTorch, Keras, XGBoost, LightGBM

**Deep Learning & NLP:** Transformers (Hugging Face), spaCy, NLTK

**Cloud & Big Data:** AWS (SageMaker, S3, Redshift), Azure ML, GCP (Vertex AI, BigQuery), Databricks, Spark, Hadoop

**Data Engineering & MLOps:** Apache Airflow, Kafka, Docker, Kubernetes, MLflow

**Visualization:** Tableau, Power BI, Matplotlib, Seaborn

**Databases & Tools:** PostgreSQL, MongoDB, Snowflake, Pandas, NumPy

**Other Tools:** Git, Jupyter Notebook, CI/CD, A/B Testing, Feature Engineering

## PROFESSIONAL EXPERIENCE

---

### JPMorgan Chase & Co., USA | Data Scientist (AI/ML)

Jun 2025 – Present

- Designed and deployed scalable machine learning pipelines for real-time risk scoring that improved fraud detection accuracy by 18% using XGBoost and TensorFlow.
- Collaborated with cross-functional teams to integrate predictive models into enterprise data platforms, leveraging AWS SageMaker, Spark, and Snowflake.
- Built and productionized NLP models using Hugging Face Transformers to extract insights from unstructured compliance data, reducing manual review time by 40%.
- Implemented MLflow-based MLOps workflows to automate training, model tracking, and deployment across hybrid cloud environments.
- Developed interactive dashboards in Tableau and Power BI to visualize key metrics for senior leadership, improving decision-making timelines.
- Worked closely with stakeholders to translate business problems into data-driven solutions and monitored model performance post-deployment.

**Technologies:** Python, SQL, TensorFlow, PyTorch, Scikit-learn, Spark, AWS SageMaker, Snowflake, MLflow, Docker, Kubernetes, Tableau, Power BI.

### Microsoft, India | Data Scientist

Sep 2020 – Aug 2023

- Led development of predictive analytics models forecasting product usage and churn, increasing retention by 15% through improved targeting strategies.
- Engineered data ingestion and ETL pipelines using Azure Data Factory, Databricks, and Apache Airflow to process multi-source telemetry at scale.
- Built and validated deep learning models with Keras and TensorFlow for image and text classification tasks in enterprise applications.
- Collaborated with cross-geography teams to optimize data workflows and standardize modeling frameworks adopted across product lines.
- Deployed APIs for real-time model inference using Docker, Kubernetes, and Azure ML services, supporting business-critical applications with high availability.
- Mentored junior data scientists and analysts, contributing to team growth and technical excellence.

**Technologies:** Python, R, SQL, Azure ML, Azure Data Factory, Databricks, Scikit-learn, TensorFlow, PyTorch, Airflow, Snowflake, Power BI.

## EDUCATION:

---

Master of Science in Business Analytics | Anderson University, Anderson, South Carolina, USA | May 2025
