

Venkat Reddy Mankala

venkata@jobitmail.com | +1 (716) 247-3238 | NY, USA

SUMMARY

- 4+ years of experience in data engineering, combining technical expertise with practical business knowledge to deliver actionable solutions and support data-driven decisions that drive business growth.
- Proficient in managing projects using both Agile and Waterfall methodologies, with strong experience in Test-driven Development (TDD) to ensure high-quality code and seamless integration across systems.
- Expertise in using R and Python for statistical programming, along with experience in working with Apache Spark, and other big data technologies such as Hadoop, Hive, and Pig, enabling efficient large-scale data processing and analysis.
- Hands-on experience in data integration and building data pipelines with a variety of ETL tools such as Informatica Power Center, AWS Glue, Talend, and SQL Server Integration Services (SSIS), supporting the seamless flow of data across systems.
- Strong proficiency with data manipulation libraries like NumPy, Pandas, SciPy, Seaborn, and Matplotlib, and advanced machine learning frameworks like Scikit-learn and TensorFlow for implementing data science models and statistical analyses.
- Skilled in developing interactive and insightful dashboards and visualizations using Tableau, Power BI, and SSRS, enabling business teams to make informed decisions based on real-time data insights.
- Extensive experience working with both relational databases (SQL Server, MySQL) and NoSQL databases (MongoDB), ensuring optimal data storage, retrieval, and performance for a wide range of applications.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Programming Language: Python, R, SQL

IDE's: PyCharm, Jupyter Notebook

Big Data Ecosystem: Hadoop, MapReduce, Hive, Apache Spark, Pig, Sqoop, Pyspark, Snowflake

ETL Tools: SSIS, Apache NiFi, Apache Kafka, Talend, Apache Airflow, Informatica

Cloud Technologies: AWS, Azure, GCP, DataBricks

Reporting Tools: Tableau, Power BI, SSRS

Packages: NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, Seaborn, TensorFlow

Database: MongoDB, MySQL, SQL Server, PostgreSQL

Version Control: Git, GitHub, GitLab

Other Skills: Data Cleaning, Data Wrangling, Critical Thinking, Communication Skills, Presentation Skills, Problem-Solving

Operating Systems: Windows, Linux, Mac

EDUCATION

Masters in Data Science

University at Buffalo, The State University of New York, Buffalo, New York

Jan 2023 - May 2024

Bachelors in Computer Science and Engineering

Jawaharlal Nehru Technological University, Hyderabad, India

Aug 2018 - Jul 2022

EXPERIENCE

Metlife, USA

Data Engineer

Jan 2024 - Current

- Adopted Agile methodologies to drive the development of data applications and frameworks, fostering iterative progress and collaboration across cross-functional teams to meet dynamic business requirements.
- Industrialized real-time streaming solutions utilizing PySpark, Apache Flink, Kafka, and Hive on a distributed Hadoop cluster, enabling efficient data processing and real-time analytics for large-scale applications.
- Automated data ingestion workflows by writing custom Python scripts to integrate multiple data sources, deploying Apache NiFi in an AWS environment to streamline data collection and transformation processes.
- Leveraged Python libraries such as Pandas, NumPy, Seaborn, TensorFlow, Matplotlib, Sci-kit-learn, etc. to build end-to-end data pipelines and design sophisticated machine learning models for predictive analysis and natural language processing tasks.
- Orchestrated cloud-based ETL workflows using AWS Glue and AWS Lambda, optimizing data processing pipelines to handle large datasets with high efficiency and scalability in a cloud-native environment.
- Designed and maintained Tableau reports for monitoring model performance, providing business stakeholders with clear insights into the operational status and efficiency of deployed algorithms and data models.
- Conceptualized SSRS to create both interactive and static visualizations, enabling detailed data exploration and analysis, while facilitating decision-making based on robust reporting.
- Established Sqoop scripts to enable smooth data transfer between Pig and MySQL databases, ensuring efficient and reliable data integration within the Hadoop ecosystem.

Intex Technologies, India

Jr. Data Engineer

Aug 2020 - Nov 2022

- Assisted in managing projects following the Waterfall methodology, ensuring timely completion and successful delivery of data engineering solutions based on predefined client requirements.
- Contributed to the design and configuration of metadata including architecture, schemas, and data warehouses in Hive and Impala, enabling efficient data cleansing, transformation, and analysis by supporting the development of MapReduce programs.
- Developed monitoring scripts and automated notifications for Kafka hosts using Python to streamline data processing. Managed HDFS data and created external Hive tables to analyze key metrics, such as daily visitors, page views, and top-selling products.
- Worked with Microservices architecture, integrating services using REST APIs and Azure, and participated in testing and deployment of Identity Microservices to enhance system scalability and security.
- Deployed and maintained cloud data solutions in Azure, utilizing services like Azure Blob Storage and Azure SQL Database to ensure secure, scalable, and reliable data storage for multiple projects.
- Handled data cleaning, feature scaling, and feature engineering tasks using Pandas and NumPy in Python, ensuring data quality and readiness for further analysis or model development.
- Created and maintained reports with SAS Visual Analytics and Power BI, developing visualizations that provided clear, actionable insights for stakeholders and improving decision-making processes.
- Worked with NoSQL databases, such as MongoDB, to store processed data and manage tasks. Also contributed to task scheduling using Click Software, ensuring that workflows were efficient and met project deadlines.
