

VENKATA VINUTHNA

Java Full Stack Developer

Phone No: +1(214)814-2916

Email ID: vinuthnav123@gmail.com

CAREER OBJECTIVE

Highly skilled Java full-stack developer, responsible for working as a member of the Enterprise Data and Analytics group and developing, enhancing, and maintaining a release management system. (that include both front-end Angular 2 or greater, JavaScript and TypeScript development; and backend Java development) that automates testing across many development teams.

PROFILE SUMMARY

- A Technocrat **4+** years of IT experience in the areas of Analysis, Design, Development, Production Support and Deployment of Web based applications using Object Oriented Concepts, **Java and J2EE, Web Services (SOAP, RESTful, WSDL), JavaScript, AWS, JDBC, Servlets, Struts, Jenkins, AJAX, HTML and XML, JMS.**
- Experience with web services, **Groovy/Grails, EXTJS, XML/XSLT, Struts, log4j, Maven, Spring (Core, Spring Boot, Spring Data), and Angular.** Hands-on expertise in developing **Angular2** features like **Directives, Filters, Services.**
- Experience in Installing, Configuring, Deploying, and maintaining Application and web Servers such as **Oracle Web Logic, Red Hat JBoss Enterprise Application platform (EAP), Apache Tomcat Server, IBM Web Sphere and Glassfish Application Server.**
- Good Exposure to Service Oriented Architecture (**SOA**) such as **Web Services** including **SOAP, UDDI, WSDL, JMS (Java Messaging Service).** Proficient in using **Kubernetes** for Horizontal scaling and load balancing of applications.
- Experience in **Agile** software development process, **Test Driven Development** and Scrum methodologies.
- Developing websites using **DXP (Digital Experience Platform), HTML 4.0/5.0, XHTML, CSS, CSS3, JavaScript, jQuery, Ajax and JSON.** Worked with **JMS API, Spring JMS, IBM MQ, Active MQ, Rabbit MQ, MQ-Series API and Kafka.**
- Expertise in Core **Java** Such as **OOPs, Collections, Exceptions Handling, Input/output (I/O) System, Swing, Annotations, Enums, Concurrency, Multi-Threading, Lambda and Generics.** Excellent experience using **ORM** tools like **Hibernate and Ibatis.**
- Experience of designing and architecting **server-less** applications using **AWS Lambda API Gateway, DynamoDB and Security Token Service (STS).** Hands-on experience in version control tools like **Git, SVN and CVS.**
- Proficient in applying design patterns like **MVC, Singleton, Prototype, Adapter, Visitor, Observer, Decorator, Front Controller, Data Access Object.** Experience in writing with no schema database **Couch DB** and have knowledge on **MongoDB.**
- Used **Core Java 6, Java 8, J2EE, JSP, JDBC, RDBMS, Java Script, jQuery, Ajax, XML and Chordiant 5.6, using Oracle 11g** as database **J2EE** platforms on **Windows, UNIX.** Proficient in Programming with Application Software Development in IT industry and dynamic experience in Software Development Life Cycle including requirement gathering, designing, programming, testing and implementation of major Systems and Software development **OOA & OOD.**
- Experience working with **CI/CD** tools such as **Bamboo, Jenkins, Jira, Bitbucket** etc. and implementing custom plugins.
- Good knowledge on the **Spring Modules** like **Spring IOC, Spring MVC, Spring DAO, Spring Batch, Spring Web Flow, Spring Security and Spring Boot.** Experience in writing test automation scripts using java, **Selenium WebDriver** and **TestNG** which performed **sanity testing** on every deployment performed in **QA** environment.
- Experience in writing functional Test cases for new features using **Cypress** and **Playwright** for comprehensive functionality testing. Created and triggered automated builds and continuous deployments using **Jenkins/looper** and **OneOps** cloud.

PROFESSIONAL EXPERIENCE

Client: Honeywell, Mason, OH, USA

June 2024- Present

Role: Java Full Stack Developer

Description: Honeywell is a global technology company that offers a wide range of products and services in areas like aerospace, building technologies, safety and productivity solutions, and performance materials. Providing ongoing support and troubleshooting for existing software applications, identifying and resolving any technical issues that arise to ensure uninterrupted operations.

Responsibilities:

- Used **Struts** frameworks and **MVC** design patterns to complete several projects on complex areas of development including user interface design, batch processing, stored procedure development, **XML**, data exchange and integration.
- Used **Angular** controllers to update entity models, and **Angular** custom filters to provide better search experience and used **Angular** service for **Rest API** calls. Extensively worked on **Spring** Bean wiring, **Spring DAO** and **Spring AOP** modules.
- Strong Hands-on experience with **IBM MQ Series**, **Active MQ**, **Kafka** and **JMS** for communication between middleware components. Involved in writing **Java API** for Amazon Lambda to manage some of the **AWS** services.
- Implemented Continuous Integration Continuous Delivery (**CI/CD**) for end-to-end automation of release pipeline using **DevOps** tools like **Jenkins**. Strong experience on **Devops** essential tools like **Kubernetes**, **GIT**, **Jenkins**, **Ant**, **Maven** and deployed/managed applications to managed cloud services in **Pivotal Cloud Foundry**.
- Implemented **Reacts Axioms Http Request** to read data from web server and process **JSON** data to render in **UI**.
- Extensively worked on **Spark** using **Scala** on cluster for computational, installed it on top of Hadoop performed advanced analytical application by making use of **spark** with **Hive** and **SQL/Oracle**
- Developed the UI with extensive use of **HTML**, **CSS**, **JavaScript**, **JSON** and **Ajax**. Used **GIT** as version management, **Jira** for defect management system. Implemented **Spark** using **Scala** and **Spark SQL** for faster testing and processing of data.
- Developed the application under **J2EE** Architecture using **Spring**, **Struts**, **Hibernate**, **Servlets**, **Web logic** and **JSP**.
- Implemented **AJAX** calls from backend without page refresh using **jQuery**, **AJAX**, **J2SE**, **Spring MVC** and **Hibernate**.
- Created computing and data resources on **AWS** using **EC2**. Installed Pivotal Cloud Foundry on **EC2** to manage the containers created by Pivotal Cloud Foundry (**PCF**). Written **JDBC** code to interact with **MySQL** data base. Implemented a batch framework in data base to support scheduling jobs. Work on escalations regarding **AWS Cognito**.
- Written complex **SQL queries**, Stored Procedures and Functions in **PL/SQL** for manipulating the data.
- Developed **Angular 7/6** material responsive web application pages using **Angular 8** -Material services, controllers and directives for front end UI and consumed **RESTful** web service **API**. Developed application using **Spring JPA**, **Angular 2.0** on the presentation layer, the business layer is built using spring and the persistent layer uses **Hibernate**.
- Involved in setting up the application to run on **AWS** cloud environment on multiple **Ec2** instances. Created even driven jobs using **AWS** cloud tools like **S3**, **DynamoDB**, **SNS**, **SQS** and **AWS Lambda** with **Java**.
- Implemented **core java Multithreading**, **Collections**, **Exception Handling**, and **OOP's concepts**.
- Expertise in developing the multi-tier web applications in both **Spring MVC** and **Struts MVC** that ensures clear separation of layers and rapid application development. Used **SDK** such as **Eclipse IDE**, **Toad**, and **SVN** etc. in this project.
- Work with front-end technologies such as **HTML**, **CSS**, **JavaScript**, **jQuery**, **Angular** or **React**.
- Used **Terraform modules and remote state management** (**S3**, **DynamoDB**) for infrastructure consistency across environments.
- Integrated **Terraform with Jenkins CI/CD pipelines** for automated deployments and infrastructure updates.
- Participated in all phases of **SDLC** includes areas of requirement gathering, analysis, estimation, design, coding, testing and documentation. Modified existing **Shell scripts** in **Unix** to call daily sub routines.
- Have experienced developing web applications using **Bootstrap**, **Code Mirror**, **Brackets** and **Ember.js**.
- Created various **MongoDB** collections and wrote services to store and retrieve user data from for the application on devices and used **Mongoose API** in order to access the **MongoDB** from **NodeJS**.
- Used **Microservices** to communicate using synchronous protocols **HTTP** and **REST** for implementing **SOAP**.

Environment: Java8, Spring Boot 2.x, Restful, Spring Cloud, Jax, AWS, Lambda, Splunk, Cloud Foundry, Angular 9/11, AWS, Jira, REST API, Kubernetes, Python, Maven, GIT, Docker, IAM Kafka, SOAP, JPA and Microservices

Client: GE HEALTHCARE, Cleveland, OH, USA

Oct 2023 - May 2024

Role: Java Full Stack Developer

Description: GE Healthcare is a global medical technology company that provides imaging, monitoring, biomanufacturing, and diagnostics solutions to improve patient care. I collaborated with product managers, designers, and other stakeholders to understand requirements and translate them into technical solutions

Responsibilities:

- Developed test cases for each component in different panels using **JUnit**, reported and deployed using **Jenkins**.
- Implemented the security on **microservices** using **Spring Boot Auth** server which generated **JWT** tokens as **OAuth2** mechanism.

- Worked on integration of **AWS** Cloud configuration management and Centralized logging using **Spring Boot** and **Java** application. Used **Kubernetes** to orchestrate the deployment, scaling, and management of **Docker Containers**.
- Involvement in building **spring batch** to maintain the several jobs on **ETL** data. Involved in using **ISO Messaging standards**.
- Worked on **Java 8 Lambda** expressions and Pipelines, Streams. Utilized **AWS Lambda** to optimize Backend processes and improve application performance. Experience with high-speed messaging frameworks and streaming (**Kafka, Akka, reactive**).
- Developed a controller **Servlet** that dispatches request to appropriate **Action Classes**.
- Followed **Agile** Scrum methodology for application development and deliverables. Extensive use of **Struts** Framework for Controller components and view components. Implemented **Spring Cloud-Netflix ZUUL** to build **micro services** for communication. Performed **RESTful** routing using node.js. Redesigning **Angular 2** to **Angular 8** component structure
- **Java** message queue (**JMS**) is used for exchanging the information and **messaging services**. Used **Jenkins** as a build tool for **CI/CD** (Continuous Integration and continuous deployment) process.
- Implemented a Continuous Delivery pipeline with **Docker, Jenkins** and **GitHub** and **AWS AMI's**, whenever a new **GitHub** branch gets started. **Jenkins**, our Continuous Integration server, automatically attempts to build a new **Docker** container from it, The **Docker** container leverages Linux containers and has the **AMI baked in**.

Environment: Java/J2EE, JSP, Servlets, Spring, Hibernate, Struts, XML, JAX-WS, UML, JavaScript, CSS, DXP (Digital Experience Platform), HTML5, Agile/Scrum Methodology, Angular8, jQuery, Spring MVC, SVN, XSLT, Eclipse IDE, AJAX, JDBC, Maven, Bit bucket, Postman, Micro Services, Swagger JUnit, Log4j, Rally, Restful APIs, Maven, Jenkins, Linux, Unix, Mac.

Client: PepsiCo, Mumbai, India

April 2022 - May 2023

Role: Java Full Stack Developer

Description: PepsiCo is a global food and beverage company known for its snacks, soft drinks, and packaged foods. Managed UI development, data integration, application deployment, and validation processes to enhance system functionality and user experience.

Responsibilities:

- Designed and Developed **UI** using **JSP** by following **MVC** architecture. Worked on Big Data Integration & Analytics based on **Hadoop, SOLR, Spark, Kafka**, Storm and web Methods. Expertise with unit testing & **Test-Driven Development**.
- Involved in client-side Technologies such as **HTML, CSS, JavaScript, React JS** and **NodeJS**.
- Developed **JASPER** report to show the result after validations are performed on the test cases and maintaining several data accuracy. Developed applications using **J2EE, JSP, Servlet** and **Spring Bean Classes**.
- Used **jQuery** to build accordion style content, drag and drop functionality, calendar, popup and modal windows.
- Deployed our application on Pivotal Cloud Foundry (**PCF**) which is used to reduce the development overhead by providing a ready to use platform. Extensively worked on **Spark** using **Scala** and have Experience with **Akka, Cats** and **play Framework**.
- Worked on moving the production **SQL** server blueprint to the new **AWS RDS Aurora** instance.
- Implemented Router Module of **Angular 11** to make the whole project a **Single Page Application** and add routers according to the requirements. Used the basic principles of **MVC** to incorporate the **Angular7** framework to build client-side application.
- Expert in **Core Java** with in-depth knowledge of Core **Java** concepts such as Multithreading, Synchronization, Collections and Event/Exception handling. Developed new user facing features using **React.js/Redux**.
- Implemented high availability with **Azure Classic** and **Azure Resource Manager** deployment models.
- Used Eclipse based **Spring Tool Suite (STS)** for development and debugging **Spring Boot** applications, **Micro services** and deployed into **OpenShift** cloud platform. Involved in various phases of **SDLC** as requirement gathering, modelling, analysis, architecture design and development and the project was developed using **Agile** Methodologies.
- Designing & development of entire validation service to perform data validations on the test cases built on the extracted, transformed, loaded data & working on **Linux** platform.
- Designed the frontend and developed UI screens as per the wireframes provided by business using **Java Script, jQuery, Bootstrap, Angular** and backend layer using spring framework, **Hibernate** and **XML**. IDE used is **Eclipse**.
- Involved in web services design and development. Responsible for creating and consuming web services using **REST** and **XML**.
- Used **NodeJS, React**, and **Backbone.JS MVC** framework for developing the Single Page Application (**SPA**).

Environment: Java, J2EE, Spring framework, Spring MVC, Hibernate, JUnit, JSP, CSS, Servlets, JDBC, AJAX, Web services, REST, SOAP, XML, jQuery, JavaScript, Oracle, Web Sphere, SQL, Windows.

Client: Reliance, Mumbai, India

Feb 2021 – March 2022

Role: Java Developer

Description: Reliance is India's operates petrochemical production and refining, textile, retail, marketing, telecommunications, and other industries. My role is building intuitive and responsive user interfaces using modern web technologies such as HTML5, CSS3, and JavaScript frameworks like Angular or React.

Responsibilities:

- Developed **SOAP** web services (**JAX-WS**) for sending and getting data from different applications **WSDL** generation and exposed the service at server-side. Created **JUnit** test cases to automate the testing of business logic.
- Using **Micro service** architecture with spring boot services for interacting with **REST** and **Apache message broker**.
- Triggered the automation jobs using **Jenkins** to get the **cucumber JSON** reports.
- Used **EC2** for deploying and testing the lower environments such as Dev, INT and Test and also used cloud watch for monitoring.
- Developed DAO layer exposing access to Mongo dB and found issues in original Mongo java driver, reported them to community and got them fixed with next releases. Worked on **RESTful** web services to send the data using **JSON** objects.
- Experience in handling messaging services using Apache **Kafka** implemented Micro services architecture to make application smaller and independent REST web services using Jersey with the enabled **OAUTH**.
- Used **Java Servlets**, **JSPs**, **AJAX**, **XML**, **HTML** and **CSS** for developing the Web component of the application.
- Involved in Scrum meetings, **Sprint**/retrospective planning and estimation of the tasks for the user stories and refine the tasks for next **sprint**. Developed the Request handler's application using **Strut's framework**.
- Used **Java** Messaging Services (**JMS**) for reliable and asynchronous exchange of vital information such as payment status report.
- Setup the Continuous Integration (**CI**) & Continuous Development (**CD**) for the application using **Jenkins**.
- Used **JUnit**, **Mockito** for Unit testing the code, and **SL4J** for logging errors. Likewise worked on **Karma**, **Jasmine** in **Angular** App unit Testing and Protractor for automation. **GIT** for version control.
- Implemented access control, Authorization and **Oauth2** authentication using **Spring Security**. Experienced on **Linux** and **Windows** Virtual servers on **EC2** using chef servers.
- Implemented **Hibernate** along with annotation based transactional support in **Spring** Framework. Implemented **Spring IOC** for inter connection between modules in our application.

Environment: JDK1.8, JSP, Servlet, EJB, Spring, JavaScript, Hibernate, Multithreading, Cassandra, Query, Struts, Design Patterns, HTML5, CSS3, JMS, XML, Eclipse, Apache, Oracle ECM, Java 8.0, Struts, Webservice, SOAP, bootstrap, Microservices.

TECHNICAL SKILLS

Programming Languages	Java, C++, PL/SQL, .Net, Python, Ruby
Web Technologies	HTML5, CSS3, JavaScript, AJAX, JSON, Bootstrap, jQuery, Angular 4/6/8/9, React JS with Flux, Redux, Ember JS, Backbone JS, NodeJS, Express JS, Ruby on Rails
J2EE Technologies & Frameworks	Servlets, EJB, JSP, JDBC, SOAP, WSDL, REST, XML, JAXP, JAXB, JPA, JMS, Spring3.x/4.x/5.x, Hibernate, Spring MVC, Spring Boot, Spring Data, Spring Batch, Spring cloud, Spring JDBC, Dump Analysis, GraphQL.
Databases	Oracle 8i/9i/10g/11i, DB2, SQL Server, MYSQL, MongoDB, Cassandra, PostgreSQL
Messaging Services	JMS, Active MQ, Rabbit MQ, IBM MQ, Apache Kafka
Web service frameworks	JAX-RS, JAX-WS, Apache CXF, Axis, Jersey
Software Methodologies	Agile, Scrum, TDD, Waterfall
Build & Configuration Tools	Ant, Maven, Gradle, Jenkins, Bamboo Gulp, Grunt, Webpack, NPM, Bower
Testing Tools	JUnit, TestNG, Mockito, Jasmine, Karma, Mocha, Chai, Protractor, SOAP UI
Version Control Tools	GIT, SVN, GitLab, Bitbucket, TFS
Cloud Technologies & DevOps Tools	AWS, PCF, EC2, EBS, S3, Docker, Terraform, EKS, SQS, RDS, S3, Glacier, Lambda, Kubernetes
Operating System	Windows, Linux, Unix, MAC, MS-DOS
IDE's	Eclipse, Visual Studio, IntelliJ, Spring Tool Suite, Sublime Text, WinSCP, Putty

EDUCATION

- Masters In Computer Science from Southern Arkansas University, USA
