

Vishal g

Software Engineer/Full Stack Developer

Phone No: +1(316)-320-5423

Email ID: geddamvishal90@gmail.com

OBJECTIVE

Full Stack Developer with 5+ years of experience building enterprise-scale, cloud-native applications with a strong foundation in **Computer Science**. Expertise in backend development with **Java (Spring Boot)**, **Node**, **microservices** and frontend frameworks including **Angular**, **React**, **HTML**, **JavaScript** with proven ability to deliver responsive, high-quality applications. Skilled in integrating with cloud platforms (**AWS**, **Azure**, **OpenShift**), CI/CD automation, and test-driven development to ensure secure, scalable, and reliable systems. Recognized for problem-solving, debugging, teamwork, decision-making, continuous integration, collaborative, and driving innovative solutions that align business and technical goals.

RELEVANT SKILLS

- > **Programming & Frameworks:** Java, Spring Boot, Microservices, REST APIs, GraphQL, Angular, Node.js, React.js, Python, TypeScript, HTML5, CSS3
- > **Cloud & DevOps:** AWS (EC2, S3, Lambda, RDS, CloudWatch), Azure, Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, GCP (exposure)
- > **Databases:** Oracle, PostgreSQL, MySQL, SQL Server, MongoDB
- > **Messaging & Streaming:** Apache Kafka, JMS, RabbitMQ
- > **Security:** OAuth2.0, JWT, OpenID Connect, SonarQube
- > **Testing & Monitoring:** JUnit, Mockito, Selenium, Cucumber (BDD), JMeter
- > **Collaboration Tools:** Git, GitHub, GitLab, Bitbucket, Jira, Confluence
- > **Practices:** Agile/SCRUM/SAFe, TDD/BDD, Secure Coding, Architecture Best Practices, Code Reviews, Troubleshooting

EDUCATION DETAILS

Northwest Missouri State University - Maryville, Missouri, USA

- Masters / Computer and Information Science.

RELEVANT EXPERIENCE

Software Engineer || Citi Bank, Dallas, Texas, USA || Jan 2025 - Current

Responsibilities:

- > Designed and deployed **cloud-native full-stack applications** using **Java (Spring Boot)**, **Angular**, **React.js**, and **Python** within a distributed microservices architecture, ensuring scalability, modularity, and high availability.
- > Built and optimized RESTful and GraphQL APIs on AWS and Azure, enabling disaster recovery, elastic scaling, and seamless integrations.
- > Developed **batch applications with Spring Batch** and **Python scripts** to streamline large-scale data and payment processing workflows.
- > Implemented **event-driven messaging pipelines** using **Kafka**, **JMS**, **RabbitMQ**, boosting throughput by 40% and enabling real-time, low-latency order processing.
- > Automated **CI/CD pipelines** with **Jenkins**, **GitHub Actions**, **Docker**, and **Kubernetes**, achieving zero-downtime deployments and reducing release cycles from weeks to days.
- > Applied **problem-solving**, **secure coding practices**, and **SonarQube analysis** to strengthen compliance, reliability, and maintainability.

- Delivered **responsive UI components** with **Angular, React, HTML, CSS, and JavaScript**, improving user experience, accessibility, and cross-browser compatibility.
- Partnered with **DevOps teams** to implement **Infrastructure as Code (Terraform)**, automated deployments, and monitoring for scalable, consistent environments.
- Optimized **SQL and NoSQL databases and queries** (Oracle PL/SQL, PostgreSQL, MongoDB), reducing latency by 30% and improving transaction performance.
- Implemented **observability with AWS CloudWatch and Datadog**, ensuring 99.9% uptime and enabling proactive troubleshooting and incident resolution.
- Led **Agile/SAFe sprints**, facilitated **code reviews** and **mentored junior engineers**, embedding best practices in **architecture, security, and scalability**.

Environment: Java 17, Spring Boot, Spring Batch, REST APIs, Angular, React.js, Python, Node.js, Kafka, RabbitMQ, JMS, AWS, Azure, Docker, Kubernetes, Jenkins, GitHub Actions, SonarQube, Terraform, Oracle PL/SQL, PostgreSQL, MongoDB, Datadog, Agile/SAFe, TDD/BDD

Java Full Stack Developer || Sovereign Software Solutions, Pune, India || Jan 2023 - May 2023

Responsibilities:

- Developed **Spring Boot microservices** on **AWS EC2** for surgical robotics, ensuring modularity, scalability, and compliance with **FDA regulations**.
- Automated deployments with **Jenkins CI/CD, Docker, and Terraform**, reducing release cycles and ensuring repeatable, compliant builds.
- Leveraged **AWS Lambda** and **custom AMIs** for serverless workflows, disaster recovery, and fault tolerance, reducing downtime by 35%.
- Built responsive **single-page applications (SPAs)** with **Angular, React, and Backbone.js**, improving real-time monitoring dashboards for surgeons and biomedical engineers.
- Optimized **Oracle SQL** and **Hibernate ORM persistence layers**, improving query execution speed and ensuring transaction reliability.
- Applied **Agile/SAFe methodologies**, contributing to sprint planning, retrospectives, and **FDA audit preparation**.
- Implemented **TDD practices (JUnit, integration testing)** for regulated software, achieving high reliability and audit compliance.
- Collaborated with **QA, product managers, and regulatory experts** to deliver compliant, production-ready solutions.

Environment: Java 11, Spring Boot, Spring MVC, Angular, React, Oracle PL/SQL, AWS (EC2, S3, Lambda), Docker, Jenkins, Terraform, Hibernate, HTML5, CSS3, Git, Jira, Agile/SAFe, TDD

Java Developer || Niche Soft Inc, Hyderabad, India || May 2021 - Dec 2022

Responsibilities:

- Developed **back-end systems** with **Core Java, Servlets, JSP, Spring MVC, and Hibernate**, enabling scalable transaction processing.
- Designed and executed **Spring Batch jobs** for large-scale telecom billing and reporting workflows.
- Implemented **event-driven workflows** using **JMS messaging**, enabling seamless communication across services.
- Built responsive Frontend UIs using **Angular and React.js** for real-time telecom dashboards.

- Deployed applications on **Kubernetes**, ensuring elastic scaling and high availability.
- Applied **design patterns** (Factory, Singleton, DAO, Business Delegate) to improve maintainability and reusability.
- Automated **regression testing** with **Jenkins and Cucumber (BDD)**, reducing post-release defects.
- Provided **technical leadership** by reviewing code and mentoring junior engineers.

Environment: Java 8, Spring MVC, Hibernate, Core Java, JSP, Servlets, Angular, React.js, Oracle, JMS, Jenkins, Kubernetes, Git

Java Developer || Techie Brains, Hyderabad, India || Oct 2020 - Apr 2021

Responsibilities:

- Developed **frontend UIs** with **HTML5, CSS3, and JavaScript** for responsive interfaces.
- Built and integrated **persistence layers** with **Hibernate and Oracle PL/SQL**, creating stored procedures and optimizing queries for reporting and compliance.
- Applied **multithreading in Core Java/Servlets** for high-performance medical data processing.
- Developed **server-side features using Node**, and integrated with existing hospital system services.
- Implemented **CI/CD pipelines** with **Jenkins, Docker, and GitHub**, automating builds and deployments for faster release cycles.
- Designed and deployed applications in **Linux environments**, ensuring security and scalability.
- Implemented **secure authentication** using **OAuth 2.0** for protected communication between services.
- Participated in **Agile ceremonies** (sprint planning, daily stand-ups, retrospectives) and collaborated with cross-functional teams to deliver production-ready solutions.

Environment: Java 8, Spring MVC/Core, Hibernate, JSP, Servlets, React.js, Redux, Angular Material, Oracle PL/SQL, JMS, Jenkins, Docker, GitHub, Linux
