EDUCATION

California State University, Northridge

Bachelor of Science in Computer Science

August 2019 – December 2023

Northridge, CA

EXPERIENCE

Quality Assurance Student Associate

October 2023 – Present

Sphere Entertainment Co. & Madison Square Garden Entertainment

Burbank, CA

- Collaborated closely with Product and Development teams to rigorously test new features and content across PC and VR platforms, enhancing software performance and user engagement.
- Authored and managed comprehensive bug reports using JIRA, streamlining the issue tracking process from reporting to resolution.
- Automated QA pipeline using Python and integrated JIRA & TestRail APIs to inform project health.
- Lead QA cycles involving feature, regression, & acceptance testing, along with bug prioritization and triage.
- Developed and executed test plans, including unit, functional, and regression tests, enhancing software performance and stakeholder satisfaction.
- Diagnosed and resolved code issues, employing debugging tools and CI/CD processes.

Web Development Intern

October 2022 – April 2023

TAP Series LLC.

Westlake Village, CA

- Led the integration of a chatbot using Python and REST APIs, significantly enhancing user engagement and support by automating responses for frequently asked questions.
- Developed and executed comprehensive test suites for web applications using JavaScript.
- Implemented advanced SEO strategies and optimized site map performance, leading to increase in web traffic.
- Utilized industry-standard tools such as Postman and BrowserStack for API testing and cross-browser compatibility checks, ensuring a robust and user-friendly web experience.

PROJECTS

Multimedia System Design - Marks Automation Script | *Python, MongoDB* August 2023 – December 2023

- Automated complex workflows by developing Python scripts, reducing manual process times by over 60% and increasing operational efficiency.
- Devised a data extraction module from VFX systems with Python, streamlining the handling and analysis of multimedia files for faster processing.
- Established a MongoDB-based data management system, optimizing data storage and retrieval processes.
- Innovated a CSV to XLS conversion tool featuring enriched formatting and Frame.IO integration, improving stakeholder reporting and client interactions.

QA Automation Simulation Project | *Python, Pytest, Confluence*

November 2023

- Pioneered a QA Automation simulation with Python, enhancing software reliability by automating thermostat functionality tests across different environments.
- Directed strategic test planning sessions, crafting comprehensive test plans that resulted in a 25% increase in coverage for core functionalities.
- Led the development of a Pytest-based automation framework, empowering teams to deliver high-quality software faster by enabling efficient regression and unit testing.

Food Order Mobile Apps | *Flutter, Firebase, GitHub, Sauce Labs*

August 2022 – May 2023

- Led the end-to-end development and testing of a mobile app suite (Customer, Seller, and Delivery) using Flutter and Firebase, facilitating seamless food ordering and delivery on university campuses.
- Implemented advanced features such as geolocation for delivery tracking, push notifications for order updates, and integrated payment systems, enhancing user convenience and operational efficiency.
- Utilized Sauce Labs to conduct comprehensive cross-device testing, ensuring the app's compatibility and performance across various platforms.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C#, Kotlin, SQL, HTML, CSS

Frameworks: Pytest, Jest, JUnit, Selenium, React, Tailwind CSS, Bootstrap, Django, SwiftUI, Unity

Developer Tools: Jira, Confluence, BitBucket, GitHub, TestRail, Android Studio, Firebase, MongoDB, Postman
