Summary

Recent Computer Science graduate with hands-on experience in software engineering and IT support. Proficient in SQL, Python, and React, with a strong foundation in data processing and API integration. Demonstrated ability to analyze and troubleshoot technical issues, with a keen interest in leveraging data visualization skills to drive business insights in fast-paced environments.

Education

Long Island University

Bachelor of Science, Computer Science

Sep 2020 - May 2024

- **GPA:** 3.4
- **Achievements:** Dean's List Award

Experience

HighEndFree

Sep 2025 - Nov 2025

Software Engineer Internship

Remote

- Assisting in developing and maintaining front-end and back-end features.
- Writing, testing, and debugging clean, efficient code.
- Collaborating with team members on design, implementation, and code reviews.
- Supporting integration, performance testing, and optimization.

Ethoc

Sep 2024 - Dec 2024

Software Engineer Internship

Remote

- Developed a dynamic React-based website enabling users to manage and visualize business details such as business name, owner, category, subcategory, location, and community, which supports strategic decision-making.
- Built a scalable Node.js backend to integrate Google APIs for efficient data processing and location-based queries, leveraging SQL (Postgres) for structured data management.
- Conducted comprehensive API testing and debugging with Postman, ensuring seamless front-end and back-end integration while troubleshooting data handling issues.

Long Island University

Feb 2024 - May 2024

IT Assistant

Brooklyn, NY

- Ensured professors' computer systems were properly set up, configured, and operational to meet academic needs, emphasizing reliable performance and user satisfaction.
- Installed and configured required software and hardware, performing updates and compatibility checks to maintain system integrity.
- Troubleshoot and resolved technical issues by analyzing system data and logs, ensuring smooth workflow and consistent productivity.

Projects

Ethoc Website

Software Engineer Internship

- **Front-End (React):** Designed a responsive interface for seamless input and management of business details such as business name, category, location and community.
- **Back-End (Node.js):** Integrated Google Maps API key in Node.js to enable location-based place retrieval from user-submitted form data.

Weather Application

- **Front-End (React):** Creates a dynamic UI for users to input city names and display weather details.
- **Back-End (Flask/Python):** Processes API requests, fetches weather data from OpenWeatherMap, and sends JSON responses.
- **Integration :** React communicates with Flask via RESTful APIs, retrieving weather data from OpenWeatherMap with CORS support for real-time updates.

Technical Skills

- **Languages:** Java, Python, C/C++, SQL (Postgres), HTML, CSS, Javascript, Dart
- **Frameworks:** Flask, Netlify, React, Node.js, Flutter, Tensorflow, Keras
- **Developer Tools:** Git, Replit, Visual Studio, Linux, Github, GitLab, Postman

Certifications

- **Certificated AI Engineer - Product Manager Accelerator:** (January 15, 2025)
- **Certificated TypeScript Advanced - Skivvy:** (September 9, 2025)
