

SUMMARY

Experienced Automation Developer demonstrating 5 years of work experience as a RPA Developer building solutions using UiPath and Automation Anywhere. Involved in all process of the Agile SDLC process from Analysis, Design, Development, Testing, Deployment and Maintenance of automations with timely delivery. Currently pursuing Master's in Information Technology and Management from Illinois Tech, Chicago.

EDUCATION

Master of Science in Information Technology and management Illinois Institute of Technology, Chicago	GPA: 4.0 Graduation month - May 2023
Bachelor of Engineering in Computer Science Visvesvaraya Technological University, Belgaum, India	GPA: 3.3 Graduation month - July 2016

SKILLS

Languages :	Java, Python, PowerShell
Database :	MySQL, Oracle, MongoDB, PostgreSQL
Applications :	Git, ServiceNow, BMC Remedy, Active Directory
RPA :	Automation Anywhere, UiPath
Visualization Tools:	Tableau, PowerBI

PROFESSIONAL EXPERIENCE

RPA Developer, Cognizant Technology Solutions, Bangalore, India	<i>Sep 2017 – Aug 2022</i>
- Developed the Task BOTs and Meta BOTs to automate various Desktop, SAP, Web based and Citrix applications using Automation Anywhere. - Worked with client to gather requirement data, understanding and, design of Process Design Document (PDD), Technical Design Document (TDD) and Solution Design Document (SDD). Created the database connections to fetch the data and automated the process to arrange the data. Integrated APIs and databases to automate end-to-end processes. - Used Re Framework for developing the unattended bots using UiPath to automate business processes. - Used Credential manager and Orchestrator Assets for maintaining, securing and retrieving the user credentials. - Configured the BOTs and scheduled the jobs in UiPath Orchestrator. - Developed Python Scripts using Rest API to automatically extract the ticket details from ServiceNow. - Developed the Python and PowerShell scripts for Excel and Mailbox automation. - Created Unit Test Cases and executed the BOT in the testing environment before moving to production. - Understanding on Automation Anywhere Control Room. - Experience working in an Agile development environment. - Understanding on Change Management and Software / Robot Development Life Cycle.	

PROFESSIONAL PROJECTS

SAP User Access Management
<u>Tools:</u> Automation Anywhere, Python, RestAPI, SAP, ServiceNow, SAP
- Users submitted ServiceNow requests to get, alter, or deactivate access to the SAP system. Each ServiceNow requests consisted of maximum of 10 user ids. - This entire process was automated end to end using Automation Anywhere and thereby reducing the time by 80%.

Application Audit Trail

<u>Tools:</u> Automation Anywhere, Python, RestAPI, SQL, ServiceNow, Salesforce
- Symphony login tracking application is an auditing trail use case and it was automated using Automation Anywhere. Mails were received from the end user to track the logon details for Symphony Application in an excel file for auditing purpose. - ServiceNow requests were closed within the SLA by attaching the excel and thereby reducing the manual effort to 80%.

OBIEE RPD Merging

<u>Tools:</u> UiPath, OBIEE Application, Linux
- UiPath was used to automate OBIEE RPD Merging. Here, application team would receive requests to merge the Main RPD with the Trimmed RPD and before merging is performed any redundant data should be deleted. - RPDs were downloaded from the Linux server and after the process it was uploaded back to the server. - OBIEE RPD Merging BOT helped in increasing the efficiency and able to achieve the time reduction up to 80%. - Received client accolades for automating OBIEE Repository Data Merging using UiPath which reduced the manual effort to 90%.

ACADEMIC PROJECTS

Course Management System
<u>Tools:</u> Java, JavaFX, MySQL
- Course Management System application is a desktop application with MVC architecture where the system allows students to register or to deregister the courses from the available list of courses, and it also allows administrator to add or remove the courses. - This application is designed to store all the admin, student, and course related details in the database such as name, email, phone etc. Application helps student to create their login profiles and helps to login to the system.
