kerimbekadilet595@gmail.com

DevOps Engineer with 5 years of experience in managing and automating infrastructure for SaaS applications. Skilled in CI/CD pipelines, containerization, and cloud services. Successfully improved deployment efficiency and reduced incidents through automation and resilient system design.

Skills

Prometheus, Grafana, Loki, ELK stack, Docker, Terraform, GitHub Actions, Python, Amazon Linux, CDN, WAF, Bash, CI/CD, VMware, Kubernetes, Apache, ArgoCD, AWS, SSM, Lambda, SG, EBS, S3, IAM, CloudFormation, CloudTrail, Guard Duty, CloudWatch, Datadog, Splunk, Zabbix, Azure DevOps, Ansible, Jenkins, MySQL, PostgreSQL, Bootstrap, Dynatrace, GitLab, Kafka, Oracle, RHEL, NGINX, Helm.

Experience

Devops Engineer

Comcast, Denver, CO | June 2019 - Present

30+ million customers, leading provider of entertainment, communications products and services, 190.000+ employees.

- Developed and maintained CI/CD pipelines, reducing release cycles and improving deployment frequency.
- Collaborated with development, QA, and operations team to enhance system performance, quickly resolve incidents, and implement robust monitoring and logging solutions using tools like Prometheus, Grafana, Loki, ELK stack and Datadog
- Managed AWS cloud infrastructure to ensure high availability, scalability, and security of services, while identifying and implementing cost-effective strategies and recommending the best cloud services for optimized workload execution.
- Automated configuration management and infrastructure provisioning with Ansible and Terraform, boosting efficiency.
- Optimized Kubernetes cluster resilience with automated rolling updates and near zero-downtime deployments using Helm charts, decreasing deployment related incidents by 20% and increasing deployments efficiency by 80%.
- Designed and tested disaster recovery processes, ensuring data backups and system redundancy for critical applications.
- Developed runbooks and automated incident response procedures, reducing mean time to recovery (MTTR) for critical services.

Business owner

Comcast, Denver, CO | June 2018 - June 2019

30+ million customers, leading provider of entertainment, communications products and services, 190.000+ employees.

- Managed a contract with Comcast to install internet services, cable television, telephone services, and home security solutions.
- Hired, trained, and mentored a team of technicians, ensuring high-quality service delivery and customer satisfaction.
- Supervised project management and logistics, improving operational efficiency and reducing downtime.
- Utilized advanced networking knowledge to resolve complex technical issues, enhancing service reliability and customer trust.

System Administrator

Pulilab, Budapest, Hungary | October 2016 - May 2018

IT Support Company and Software provider in HORECA, servicing international companies.

- Provided IT support and software services to international clients.
- Accomplished hardware/software installations, OS patching, upgrades, security monitoring, access control, and helpdesk tasks.
- Collaborated with the QA team, facilitating daily cross-team calls to implement VMware virtual machines for software testing, doubling bug identification and resolution efficiency.
- Enforced security protocols, including regular audits, to ensure compliance with industry standards and protect against threats.

Education

- | | |
|---|------|
| • AWS Solution Architect Certification | 2024 |
| • Terraform Associate Certification | 2024 |
| • Bachelor's degree in Information Technology | 2015 |
