EDUCATION

North Carolina State University, Raleigh, NC, USA

August 2024 – May 2026

Master of Computer Science

GPA: 4/4

Coursework: Design and Analysis of Algorithm | Object-Oriented Design and Development |

Software Engineering | Software Security | DBMS

Shri Vaishnav Vidyapeeth Vishwavidyalaya, India

July 2018 – July 2022

Bachelor of Technology: Computer Science (Cloud and Mobile Computing)

GPA: 8.32/10

SKILLS

Languages: Java, JavaScript, Python, SQL

Frontend: React, Angular, Next.js, TailwindCSS, HTML5, CSS3

Backend: Spring Boot, Django, Flask, REST APIs, GraphQL

Cloud/DevOps: AWS, Azure, Docker, Jenkins, Git

Databases: MySQL, MongoDB, PostgreSQL

Security: OAuth2.0, SAML, JWT best practices, OWASP Top 10 familiarity

PROFESSIONAL EXPERIENCE

Systems Engineer – Full Stack Developer

July 2022 – June 2024

Tata Consultancy Services (TCS), Indore, MP, India

- Built and maintained 5 enterprise applications on UNIX servers and deployed 2 Azure cloud apps, ensuring high availability.
- Developed full-stack features using Spring Boot + Angular, improving Stellantis USA's application responsiveness by 30%.
- Proposed and led Azure migration of a legacy app, achieving 50% downtime reduction and enabling autoscaling.
- Designed and integrated REST/SOAP APIs for TrueCar.com, powering incentive programs for millions of users.
- Automated 5+ Spring Batch jobs with SFTP and cron scheduling, streamlining data processing workflows.
- Performed unit testing with JUnit, achieving 80% code coverage and reducing production bugs by 25%.
- Conducted regression and smoke testing to ensure application stability.
- Designed and maintained a complete CI/CD pipeline with 0 downtime.
- Introduced Redis-based caching to enhance the performance of high-load endpoints.
- Integrated PostgreSQL for robust backend data handling and improved scalability.

Internship

January 2022 – May 2022

Allsoft Solutions (IBM Business Partner), Punjab, India

- Built and deployed a CNN-based model for real-time mask detection with 92% accuracy.
- Integrated the detection pipeline into a Flask app with OpenCV, supporting real-time video input.
- Deployed the solution on cloud infrastructure with Docker, and implemented logging for performance monitoring.
- Collaborated with a 3-member team in an Agile environment.

PROJECTS

Job Application Management - React, Chart.js, Python Flask, PostgreSQL

- Built an interactive Sankey chart visualization with React + Chart.js to help 100+ job seekers track and optimize applications.
- Developed a Flask backend with recommendation engine and filtering logic, improving job search efficiency by 30%.
- Deployed on AWS with Docker, enabling scalable and secure hosting.

Expertiza (Open Source Project) - Ruby on Rails, MySQL, RSpec

- Refactored legacy Rails models and controllers, reducing API response times by 25%.
- Automated RSpec test suite achieving 90%+ code coverage, strengthening reliability for thousands of student/faculty users.

At Your Service

- Developed a local services listing platform with responsive React frontend for discovering nearby household help.
- Integrated REST APIs for real-time contact lookups and service availability.
- Implemented secure user authentication and data storage with JWT and MongoDB, supporting 500+ profiles.

AWARDS AND RECOGNITIONS

- Received the highest yearly rating in TCS.
- Best team award 2023 (Tata Consultancy Services).

CERTIFICATIONS

- AWS Certified Developer – In Progress (Expected 2026)
