

PROFESSIONAL SUMMARY

Innovative Senior Data Analyst with 4+ years of experience delivering data-driven transformations across healthcare, finance, and retail sectors. Expertise in Python, R, SQL, Machine Learning, cloud analytics (Azure/AWS), enterprise BI solutions, and predictive modeling. Proven track record of designing scalable ETL pipelines that improve processing efficiency while ensuring regulatory compliance (HIPAA, FINRA, SOX), Certified Microsoft Azure AI Engineer with exceptional ability to translate complex data into executive-level insights through cutting-edge visualizations. Combines technical leadership with business acumen to drive \$1M+ annual cost savings through data optimization.

TECHNICAL SKILLS

- **Cloud Platforms:** Azure (Data Factory, Databricks, Synapse, Cognitive Services), AWS (Redshift, S3, Glue, Lambda), Snowflake, GCP BigQuery
- **ETL & Data Engineering:** Apache Spark (PySpark), Azure Data Factory, SSIS, Informatica PowerCenter, Alteryx, Airflow, DataStage
- **BI & Visualization:** Power BI (DAX, Power Query), Tableau (Desktop, Server), Cognos, Adobe Analytics, Qlik
- **Databases & Storage:** SQL Server, Oracle, Teradata, PostgreSQL, MongoDB, Cosmos DB, Delta Lake
- **Programming & Analytics:** SQL (T-SQL, PL/SQL), Python (Pandas, NumPy, Scikit-learn, PySpark), R, Machine Learning
- **DevOps & CI/CD:** Git, Azure DevOps, Docker, Kubernetes, Jenkins, Terraform
- **Ticketing Tools:** ServiceNow, Jira (Incident/Problem/Change Management, Sprint Planning, UAT Tracking)
- **Scripting & OS:** Shell Scripting (Automation, Data Processing, ETL Support), UNIX/Linux (File Management, Scheduling, System Monitoring)
- **Domain Expertise:** Healthcare Analytics, Banking & Financial Risk Modeling, Insurance (ERP & Reporting Solutions)

PROFESSIONAL EXPERIENCE

CVS Health | Remote, USA

June 2024 – Present

Senior Data Analyst

- Managed master data creating, updating, and retiring datasets based on business needs.
- Validated imported data for accuracy and reliability by working closely with QA teams.
- Built and maintained reports across multiple systems, often resolving complex reporting issues along the way.
- Partnered with data warehouse teams to improve data integrity, streamline reporting, and standardize requirements.
- Applied deep knowledge of data architecture to support data mining, storage, and cleanup processes.
- Created interactive dashboards and visualizations that helped stakeholders clearly understand data stories.
- Designed and deployed predictive models to support decisions around credit risk, insurance outcomes, and key metrics.
- Dug into large datasets to extract meaningful insights that shaped smarter business strategies.
- Worked side-by-side with analysts, developers, and leadership teams to align analytics with company goals.
- Maintained data consistency across platforms, reducing duplicate records and improving data trust.
- Connected Tableau server to publish dashboard to a central location.
- Used different features of Tableau to create drill-down, filter and interactivity based on user requirement
- Created action filters, parameters and calculated sets for preparing dashboards and worksheets in Tableau.
- Built user-friendly BI solutions that empowered business units to make data-driven decisions confidently.
- Researched emerging risks and changing regulations to keep the business informed and ahead of trends.
- Documented data sources, definitions, and methodologies to ensure transparency and repeatability.
- Trained teams on tools like Power BI, Microsoft Excel, and SQL—helping others make the most of their data.
- Continuously looked for ways to improve data quality, streamline analysis, and drive better outcomes.
- Building, publishing customized interactive reports and dashboards, report scheduling using Tableau server.
- Created action filters, parameters and calculated sets for preparing dashboards and worksheets in Tableau.

- Connected data from spreadsheets, databases, APIs, and external sources into unified analysis pipelines.
- Used statistical methods to uncover patterns and relationships hidden in large, messy datasets.
- Translated complex findings into clear, compelling stories for both technical and non-technical audiences.
- Defined and implemented data governance standards to ensure compliance and consistency.
- Regularly monitored data flows and reporting logic to catch and correct issues before they impacted decisions.

Environment: Azure Synapse, Databricks, Power BI Premium, Tableau Server, Python, SQL Server 2019, Jira, ServiceNow

Tata Consultancy Services – Barclays | Hyderabad, India

August 2021 – May 2023

Senior Data/ Reporting Analyst

- Built a real-time trade surveillance system processing 500K+ daily transactions using Spark Streaming, reducing false positives through machine learning pattern detection
- Developed data lineage documentation framework using SQL Server Extended Properties, tracing 150+ critical fields from source to report
- Automated monthly regulatory reports for SEC/FINRA compliance using SSIS and Power BI, reducing manual effort from 80 to 15 hours per cycle
- Optimized Oracle PL/SQL packages handling end-of-day settlement processes, reducing runtime from 6 hours to 90 minutes through query refactoring
- Analyzed and managed commercial loan data including origination, servicing, payments, and risk assessment within CLS platforms.
- Created a customer segmentation model using K-means clustering in Python, enabling targeted marketing campaigns that increased response rates.
- Created dashboards and reports of Power BI, Tableau and SQL to provide insights on loan performance, delinquency trends, and portfolio risk.
- Implemented data vault architecture in Azure Synapse to handle historical trading data, improving audit trail completeness.
- Extracted, transformed, and validated lending data from CLS and integrated it with enterprise data warehouses for downstream analytics.
- Designed a dynamic risk scoring dashboard in Power BI, incorporating market, credit, and operational risk factors for executive review.
- Worked closely with lending operations, credit risk, and compliance teams to ensure accurate data reporting and adherence to regulatory requirements.
- Developed data quality checks for loan applications, collateral, and borrower information, improving reporting accuracy by eliminating inconsistencies.
- Supported compliance and audit initiatives (SOX, Basel, CCAR) by preparing structured loan data reports from CLS.
- Collaborated with data engineering teams to enhance ETL workflows for ingesting CLS data into analytical platforms.
- Led Agile transformation of analytics team, introducing Jira workflows that reduced sprint cycle times.
- Created Python scripts integrated with ServiceNow APIs, reducing ticket resolution time through automation.
- Utilized Git for version control and collaborative development of ETL workflows and data models.

Environment: Azure Synapse, Oracle 19c, SSIS, Power BI, Python, Spark, Jira, ServiceNow, Unix, Git

VASR Info Tech Solutions - Marsh | Hyderabad, India

January 2020 – July 2021

Data/ Application Analyst

- Developed automated sales commission system using SQL Server stored procedures, reducing calculation errors by 95% and processing time.
- Built an inventory forecasting tool in Python, analyzing 3 years of sales data, improving stock turnover ratio from 4.2 to 5.8
- Created a self-service reporting portal in Power BI, enabling regional managers to access real-time sales data without IT assistance
- Implemented data validation framework for ETL processes using SSIS checkpoints, reducing data correction requests.
- Designed a customer churn prediction model using logistic regression, identifying of at-risk customers 30 days in advance

- Migrated legacy Access databases to SQL Server, implementing proper normalization and improving report generation speed by 5x
- Developed VBA macros automating monthly financial reports in Excel, saving 25+ hours per month for the accounting team
- Conducted data literacy workshops for business teams, improving their ability to interpret and act on dashboard insights

Environment: SQL Server, SSIS, Power BI, Python, Excel VBA, ServiceNow

CERTIFICATIONS

- Microsoft Certified: Azure AI Engineer Associate (2025)
- AWS Certified Data Analytics - Specialty (2024)
- Tableau Desktop Certified Associate (2023)
- Alteryx Designer Core Certification (2022)
- 100 Days of Python: Data Science (2021)

SOFT SKILLS

- **Data Storytelling:** Transform complex analyses into executive-ready insights
- **Agile Leadership:** Scrum master for 5+ successful analytics sprints
- **Regulatory Expertise:** HIPAA, FINRA, and SOX compliance
- **Technical Mentoring:** Train junior analysts in SQL/Python best practices
- **Stakeholder Management:** Bridge the gap between technical teams and the C-suite
- **Data Warehousing Specialist** - Designed optimized star schemas for enterprise analytics
- **Certified Scrum Master** - Led Agile teams delivering \$1M+ in data solutions
- **KPI & Predictive Analytics Pro** - Built dashboards translating models to business insights

EDUCATION

Bachelor of Technology - BTech, Electronics and Communications Engineering, QIS College of Engineering and Technology, 2021

Master's degree, Computer Science, Campbellsville University, 2025
