

Chinmay Chabbi

Software Development Engineer

(601) 336 0681 | chinmaychabbi00@gmail.com | [LinkedIn](#)

SUMMARY

Software Development Engineer with 3+ years of hands-on experience in full-stack development, cloud infrastructure, and Agile delivery. Expertise in building performant web applications using Java, JavaScript/TypeScript, React, and Next.js. Proven success in optimizing deployment pipelines on AWS, reducing release cycles by up to 40%. Adept at debugging, API design, and UI performance enhancement.

SKILLS

- Methodologies & Project Management:** SDLC, Agile (Scrum), Waterfall, Microsoft Project
- Programming Languages:** Java, TypeScript, Python
- Front-End Frameworks & Libraries:** React, Next.js, Redux Toolkit, Tailwind CSS, Radix UI, PrimeReact, Formik, DaisyUI
- Back-End & API Development:** Node.js, Express.js, RESTful APIs, GraphQL, Data Fetching
- Cloud Platforms & Services:** AWS (EC2, S3, CloudWatch, CloudFormation)
- DevOps, Automation & Configuration Management:** Docker, Chef
- Version Control & Collaboration:** Git, GitHub
- Development & Testing Tools:** Visual Studio Code, ESLint, Postman

EXPERIENCE

ServiceNow | Dec 2024 – May 2025 | Software Development Engineer

- Developed full-stack web applications using Java (Spring Boot) and TypeScript with React, improving UI performance and reducing page load times by up to 30% based on Lighthouse audits.
- Designed and optimized RESTful APIs and GraphQL endpoints, improving average server response time.
- Built high-performance UIs using Next.js, improving SEO scores by 40% (Google Lighthouse) and reducing bounce rates as observed via Google Analytics.
- Automated container deployment and configuration management on AWS using Docker and reducing manual provisioning effort by ~40%.
- Streamlined code quality and testing processes by integrating Postman test collections into GitHub Actions CI workflows.
- Integrated unit and integration testing with React Testing Library, increasing test coverage from 45% to 80% and reducing production bugs by 30%.
- Collaborated with cross-functional teams to implement feature toggles and A/B testing via Google Optimize, leading to a 12% boost in user signups.

Green Touch Technology, India | Jan 2021 - July 2023 | Software Development Engineer

- Delivered over 5 client projects across Agile and Waterfall models, improving sprint velocity and reducing average development cycle time by ~18%.
- Developed modular React components with performance optimization techniques (lazy loading, code splitting), reducing page load times by 20% based on WebPageTest reports.
- Contributed to RESTful API development and integration, reducing server error rates by 25% through input validation and improved error handling.
- Maintained AWS infrastructure (EC2 roles) and contributed to system monitoring to ensure ~99% uptime across production environments.
- Designed CI/CD pipelines using Docker, reducing deployment time by ~40% through parallelization and automation.
- Implemented system monitoring for staging and production environments, enabling early detection of outages and maintaining 98% service availability.
- Created custom middleware for Express.js to handle centralized error logging and API rate limiting, improving backend stability and reducing client-side errors by 20%.
- Designed and maintained responsive UI components compatible across 12+ screen sizes and browsers, reducing cross-browser issues by 35% and improving mobile usability scores.

EDUCATION

Master of Science in Computer Science

Washington State University

May 2025

Pullman, WA

Bachelor of Engineering

KLE Technological University

May 2022

Hubli, India
