SUMMARY

Data Analyst with **4+ years** of experience delivering actionable insights through advanced data analysis, visualization, and reporting across healthcare, consulting, and financial domains. Proficient in SQL, Power BI, Tableau, Excel, including Pivot Tables, Power Query, and VLOOKUP, alongside ETL pipeline development and data warehousing to support business intelligence, KPI tracking, and strategic decision-making. Proven ability to design 10+ interactive dashboards, automate recurring reporting workflows, and build scalable data pipelines while maintaining data accuracy, governance, and regulatory compliance. Strong background in statistical analysis, ad-hoc reporting, and cross-functional stakeholder collaboration within Agile and SDLC environments, consistently translating complex datasets into clear business narratives that drive operational efficiency and strategic growth.

SKILLS

Databases & Querying: SQL, MySQL, SQL Server, Google BigQuery

Programming & Scripting: Python, R, VBA

Data Analysis & Statistics: Statistics, Correlations, Data Analysis, Ad-Hoc Reporting, SWOT Analysis, ETL, Data Warehouse, Data Cleaning, Data Mining

BI & Visualization Tools: Tableau, Power BI, DAX, SPSS, Smartsheet, PowerApps

Microsoft Tools: MS Excel (VLOOKUP, Power Query, Pivot Tables, Accounting Functions), MS Office, PowerPoint, MS Visio

Project & Process: SDLC, Agile, Waterfall, Scrum, Project Management

Operating Systems: Linux, Windows, Mac

Soft Skills: Communication, Stakeholder Management, Problem Solving, Critical Thinking, Attention to Detail, Time Management, Team Collaboration, Documentation, Presentation Skills

WORK EXPERIENCE

Data Analyst

| Jun 2023 – Present

Arietis Health LLC, Durham, NC

- Analyzed and managed large-scale healthcare datasets of 2M+ patient records using SQL, MySQL, and advanced Excel, including VLOOKUPS, Pivot Tables, and statistical functions to support clinical, financial, and operational reporting.
- Designed and maintained 10+ interactive Power BI dashboards using DAX and data modeling, enabling leadership to monitor KPIs, trends, and performance metrics in real time across multiple business units.
- Built and automated ETL workflows using Power Query to extract, clean, transform, and load data from 5+ source systems, including Excel, CSV, SQL, and APIs, into structured analytical models, improving data accuracy and consistency.
- Developed advanced Excel dashboards with Pivot Tables, Power Pivot, slicers, and charts, delivering real-time business insights and reducing manual reporting effort through automated refresh workflows.
- Led provider enrollment and credentialing analytics during migration from Verity Enrollment Software to an internal system, maintaining 100% data integrity, audit readiness, and workflow continuity across 3+ operational teams.
- Performed data reconciliation and validation of banking and operational records, reducing reconciliation cycle time by 30% and improving financial accuracy and reporting reliability.
- Partnered with operations, finance, and compliance teams to deliver 20+ standardized and ad-hoc reports meeting regulatory, performance, and business requirements under SDLC and Agile documentation standards.
- Applied statistical analysis and correlation techniques to identify trends, anomalies, and process gaps across healthcare datasets, directly informing data-driven operational and strategic decisions.
- Supported data warehouse reporting initiatives by designing structured data pipelines and ensuring documentation aligned with enterprise data governance standards.
- Created executive-ready presentations using PowerPoint and Excel, translating complex analytical findings into clear business narratives for senior leadership and clinical stakeholders.

Data Analyst

| Aug 2021 – Jun 2023

McKinsey & Company - Atlanta, GA

- Engineered complex SQL queries for data extraction, transformation, and loading across multiple databases, ensuring accurate and efficient ETL pipelines that reduced data retrieval time and improved downstream reporting quality.
- Automated Excel-based reporting tools using advanced formulas, including XLOOKUP, INDEX-MATCH, SUMIFS, COUNTIFS, and IFS, achieving a 70% reduction in manual reporting effort and improving report generation efficiency.
- Built and published 5+ customized interactive Tableau reports and dashboards with scheduled stakeholder delivery, providing real-time visibility into business performance across multiple regions.
- Designed dynamic Power BI dashboards delivering actionable insights for strategic decision-making, contributing to a 10% reduction in excess inventory across supply chain operations.

- Developed Power Query data cleaning and normalization logic, including deduplication, merge queries, conditional columns, and pivot operations, standardizing data across 8+ operational source systems.
- Administered and maintained MSSQL Server databases, performing regular backups, query optimization, and data integrity checks to ensure a reliable and secure reporting infrastructure.
- Executed data cleansing and data staging of operational sources using ETL processes, and developed visualizations using graphs, charts, and tables to communicate analytical findings to non-technical stakeholders.
- Built 5+ Excel dashboards using Pivot Tables and VLOOKUP to track marketing performance metrics across regional campaigns, improving visibility into campaign ROI.
- Designed KPI frameworks and business metric dashboards across multiple modules, enabling management to evaluate performance factors and align reporting with strategic targets.
- Produced ad-hoc analytical reports and SWOT analyses to support executive decision-making and strategic planning, directly influencing 3+ business initiatives.

Data Analyst Intern

| Dec 2018 – Feb 2019

Mega Bank, Nepal

- Assisted in data collection, data modeling, documentation, financial analysis, and industry research for loan documentation.
- loan eligibility requirements, background check, and funding business loans and personal loans.
- Worked with a loan officer to create an application profile in the system and review key information at various stages within the process to secure good candidates.
- Created reports and dashboards using visualization tools such as SPSS and R on large sets of data

EDUCATION

Master of Science in Business Analytics (3.82 GPA)

| Sep 2021 – Apr 2023

Grand Canyon University, Phoenix, Arizona

Bachelor in Business Administration

| Sep 2015 – Sep 2019

Excel Business College, Kathmandu, Nepal

CERTIFICATION

Certified R Programming A-Ztm R for Data Science

| Apr 2023

PROJECTS

Adventure Works Cycles Company

- Connect and transform raw data.
- Used SQL to make a sales Management project.
- Created new calculated columns and DAX measures.
- Build a relational data model.
- Design an interactive report to analyze and visualize data.

AHA Data Analysis Project

- Learned tracking intensive care unit patient status, and ways to reduce wait time for them using predictive analytics techniques.
- Find out alternative payment models and know how to maximize quality by ensuring supply chain demand.
- Learn to monitor cost, Quality, and utilization patterns using visualization tools like Tableau and Power BI.
- Management of admissions, ED visits, and staffing.
- Learn how to analyze patient volume trends and improve operational excellence.
