

DHEERAJ REDDY PANDHAM

571-789-4964 | reddydheeraj94@gmail.com | [linkedin.com/in/-dheerajreddy/](https://www.linkedin.com/in/-dheerajreddy/) | Richmond, VA

PROFESSIONAL SUMMARY

Software Developer with 3+ years of experience in building scalable applications using Go, Java, Python and cloud technologies. Strong in backend development, Problem-solving, and CI/CD automation. Proven ability to deliver high-quality code in Agile environments. Quick to adapt, collaborative, and effective in navigating complex systems and modern tech stacks.

PROFESSIONAL EXPERIENCE

Capital One – Software Engineer

Sep 2024 – Present | Richmond, VA

- Developed robust backend services in **Golang**, implementing data streaming logic to transfer data to OneStream
- Employed **Docker** to simulate services for accelerated testing cycles, reducing dependency on live endpoints.
- Extracted data from RDS and orchestrated batch ingestion jobs, automating file submissions from **S3** to **OneStream** upon successful job completion.
- Optimized **SQS** processing by handling messages individually and routing failures to a DLQ for enhanced error management.
- Monitored production alerts using **PagerDuty** and maintained CI/CD pipelines via **Jenkins** while leveraging **CloudWatch** for log analysis.
- Automated job triggers with **AWS Step Functions** and **Lambda**, efficiently initiating processes based on incoming file events.
- Participated in code reviews and Provided production support to ensure stability and code quality.
- Leveraged **GitHub** for robust version control and streamlined collaboration while managing tasks and tracking progress through Jira.
- Developed comprehensive unit tests using Testify, improving code reliability and maintaining 90%+ SonarQube coverage across backend services.

Acetech Group Corporation – Software Engineer

Jan 2023 - Aug 2024 | Maryland, MD

- Designed and developed scalable components using **ReactJS** and **Golang** for the backend.
- Implemented a **serverless architecture** using **AWS Lambda** for order validation and **AWS Step Functions** to automate order fulfillment and shipment tracking.
- Optimized database operations with **PostgreSQL**, improving query performance and reducing page load times.
- Deployed the application on **AWS (EC2, S3, RDS)** with **IAM roles and policies** for enhanced security and cost-efficient resource management.
- Enhanced CI/CD pipelines and **real-time monitoring** using **AWS CloudWatch, SNS, and GitHub Actions**, ensuring high availability and seamless deployments.
- Collaborated in Agile teams using Jira/Scrum methodology to ensure timely delivery and sprint planning.

Rakuten India – Software Engineer

Dec 2021 - July 2022 | Bangalore, India

- Developed responsive and intuitive components using **React** and **CSS** for a ticketing system, improving user experience and interface performance.
- Collaborated with backend teams to design and implement **scalable and secure Java-based solutions** using the **Spring Framework**.
- Optimized database operations using **JavaScript, SQL, and MongoDB**, reducing website load times by **40%** and improving data retrieval efficiency.
- Managed and improved **CI/CD pipelines** with **Jenkins and GitHub Actions**, streamlining deployments and reducing manual intervention.

EDUCATION

- University Of Central Missouri – Missouri, KS**
Master of Science, Computer Science

Dec 2023 | GPA: 3.75/4.00

- Vidya Jyothi Institute of Technology – Hyderabad, India**
Bachelor of Technology, Computer Science

April 2022 | GPA: 3.82/4.00

TECHNICAL SKILLS

- Languages:** Go (Golang), Java, Python, React JS, JavaScript, HTML/CSS, Bootstrap, JSON, XML, jQuery, PL/SQL
- Database:** MySQL, MongoDB, PostgreSQL
- Cloud Computing:** AWS (EC2, IAM, Fargate, S3, Step functions, Lambda, RDS, Batch Jobs, Auto Scaling, ELB, CloudWatch)
- Backend & Frameworks:** Gin, Echo, Gmux, GORM, Spring Boot, Spring ORM, Spring MVC, Hibernate, Struts
- Other tools:** Git, JIRA, Maven, Snowflake, Postman/Insomnia, CI/CD, Unit Testing (Testify, Junit, Mockito), Docker
- Certifications:** Amazon Web Services Developer – Associate, Amazon Web Services- Cloud Practitioner, Front-end Web Development with React, Coursera certified in Programming Essentials in Python, Cisco certified in Programming Essentials in C

PROJECTS

CKart – E-commerce Platform for Construction Supplies: *Django, REST, Next.js, PostgreSQL, EC2, S3, Docker, Jenkins, Kubernetes.*

- Developed a scalable e-commerce platform tailored for construction materials, enabling users to browse, filter, and purchase region-specific products.
- Integrated user authentication, address and payment management, inventory tracking, and order processing workflows. Implemented district-based dynamic pricing and promotional discounts.
- Deployed using containerized microservices with CI/CD pipelines and cloud infrastructure for high availability and performance.

Financial Market Data Analysis & Investment Strategy Optimization: *Python, Yahoo Finance API, Pandas, NumPy, Matplotlib, Seaborn, SciPy, stats models, Jupyter Notebook*

- Designed and implemented data-driven models to analyze historical stock market trends and evaluate investment strategies.
- Collected and processed financial data from Yahoo Finance API, performed time-series forecasting, statistical testing, and correlation analysis. Visualized market trends and portfolio performance using interactive plots to identify optimal strategies for maximizing returns while minimizing risk.

Monstograin- *Machine Learning, Python, Chart.js, ReactJS, NodeJS*

- Developed an IoT-based solution to monitor environmental conditions—such as temperature and humidity—inside food grain storage facilities.
- The system uses sensor data and machine learning algorithms to detect anomalies and prevent spoilage. Data visualization dashboards were built with React and Chart.js for real-time insights.

Patent: MONSTOGRain, Patent Office: IN, Patent No. 202041049928A, Publication Date: 2020/11/16.
