

Information Security Analyst | Cybersecurity Analyst | Network Security Analyst

Dynamic and detail-oriented **Security Analyst with 4+ years of experience** in **information security, regulatory compliance, and incident response**. Possesses a master’s degree in Cybersecurity and a proven ability to assess risks, perform **root cause analysis**, and implement innovation and attention to detail solutions to **mitigate vulnerabilities**. Adept at collaborating with cross-functional teams, troubleshooting complex issues, and ensuring compliance with frameworks such as **ISO 27001** and **NIST**. Strong expertise in **cloud infrastructure, SIEM solutions**, and vulnerability management, coupled with exceptional analytical and problem-solving skills. Dedicated to driving continuous improvement and operational excellence in fast-paced environments.

|                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                      |

Professional Experience

T-Mobile USA - Remote May 2024-Present

Security Analyst

Spearheaded the development and execution of cutting-edge security solutions to address vulnerabilities in complex web applications and cloud environments.

- Conducted vulnerability assessments using industry-leading methodologies like **OWASP** and **PTES** to identify and **mitigate complex security threats in web applications and APIs**.
- Collaborated with cross-functional teams to design and implement scalable security solutions that align with business goals and regulatory compliance.
- Developed detailed project plans and managed release cycles for vulnerability remediation, **ensuring alignment with SDLC and agile methodologies**.
- Enhanced client engagement by presenting comprehensive **penetration test status reports** and collaborating on **strategic security initiatives**.
- Automated testing processes using tools like **Burp Suite** and **Postman**, streamlining **validation of web security metrics**.

Cohort Data - Dallas, TX Jul 2023- May 2024

SOC Analyst

Strengthened enterprise security posture through real-time threat detection, **automated incident response workflows**, and advanced analytics.

- Designed and maintained **monitoring dashboards in Microsoft Sentinel** to streamline threat detection and incident response workflows in cloud environments.
- Investigated and designed the process to troubleshoot the complex security incidents through **root cause analysis**, improving system safety, reliability and **mitigating risk to critical infrastructure**.
- Led the **implementation of SOAR tools**, automating incident management tasks to improve response time and operational efficiency.
- Partnered with cross-functional teams to evaluate and enhance network security controls, **leveraging frameworks like MITRE ATT&CK** for strategic alignment.
- Conducted detailed audits and provided actionable feedback to improve **business continuity and disaster recovery plans**.

Supplia Info Technologies - Hyderabad, India

Jan 2019 - Jul 2021

### Security Analyst

Led internal audit processes and implemented scalable information security measures to achieve regulatory compliance and operational excellence.

- Spearheaded internal audits to ensure compliance with **ISO 27001 and NIST standards**, providing actionable recommendations to address security gaps.
- Collaborated with stakeholders to **design robust information security policies**, facilitating organizational adoption and compliance.
- Configured and maintained **critical network infrastructure components**, ensuring maintenance and secure and **efficient data flow** across enterprise systems.
- Delivered training sessions to improve team awareness on **regulatory requirements and security best practices**, fostering an inclusive and informed culture.
- Coordinated change management initiatives for system migrations, **ensuring seamless transitions and minimal impact** on daily operations leveraging industry trends and interpersonal skills.

### EDUCATION

Master of Science – Cybersecurity | University of North Texas, TX

### CERTIFICATIONS

- Certified Ethical Hacker (CEH) v10.
- CompTIA Security +
- Qualys Certified Specialist- Vulnerability Management Detection and Response
- Network Security Associate (NSE-1) by Fortinet
- Network Security Associate (NSE-2) by Fortinet
- Qualys PCI specialist

### Projects

#### Bug Bounty:

Successfully completed a Bug Bounty project that involved identifying and reporting security vulnerabilities **within a web-based application or website (VidaXL.com)**.

- ☒ Utilized a range of security testing tools and frameworks that help in vulnerability discovery and exploitation, **such as Burp Suite, OWASP ZAP, Nmap, Snort and Metasploit**.
- ☒ Tested common security concerns, **such as SQL injection, cross-site scripting, and authentication bypass**.

#### Burp Suite Web Application Security Testing:

Worked on a project focused on utilizing Burp Suite, a leading web application security testing tool. The goal of the project was to gain practical experience in identifying and mitigating vulnerabilities **in web applications using Burp Suite's comprehensive suite of features**. My responsibilities include:

- ☒ Utilizing Burp Suite's proxy functionality to intercept and **analyze HTTP, HTTPS** protocols between the web application and the server, to identify potential security flaws.
- ☒ Configuring and customizing Burp Suite's scanning capabilities to perform comprehensive vulnerability scanning, including **identifying common vulnerabilities such as SQL injection, CSS AND CSRF, Directory Traversal.**

#### Technical Proficiency

Operating Systems (Windows, Linux, Mac os) | Scripting and Automation (Python, Powershell, Bash) | Programming Languages (Java, Python, C++) | TCP/IP | IDS/IPS | DNS | | Microsoft Office Suite (Excel, PowerPoint, Word, Teams) | Microsoft Sentinel | Splunk (SIEM) | Azure | Oracle VirtualBox | VMware | Nessus | Qualys Cloud Platform | Amazon Web Services (AWS) | Cyber Forensics | Cisco | EDR | Wireshark | Burpsuite | Postman | Snort
