

HARSHA DARA

Data Analyst

Location: St. Louis, Missouri | **Phone:** 913-548-7636 | **Email:** harshadara0823@gmail.com

Summary

Results-driven **Data Analyst** with over **4 years of experience** in data science, analytics, and business intelligence across diverse industries. Proficient in **Python, SQL, and Tableau**, with a strong focus on designing and optimizing ETL pipelines, developing interactive dashboards, and driving data-driven decision-making.

- Extensive expertise in **ETL design and implementation**, including data extraction, transformation, and loading using tools such as **SQL Loader** and custom Python scripts.
- Adept at managing and enhancing databases, including **SQL Server 2022, Snowflake, MySQL, and NoSQL databases**.
- Skilled in **data governance**, ensuring compliance with data quality standards and metadata management practices.
- Strong experience in **ad hoc reporting**, enabling quick insights and informed decision-making for business stakeholders.
- Hands-on experience with **JIRA** for tracking and managing tasks in **Agile development** environments.
- Expertise in **data profiling, migration, and integration**, improving system performance and ensuring data integrity.
- Proficient in **data visualization** using Tableau and Power BI, delivering actionable insights through interactive dashboards and reports.
- Comprehensive knowledge of cloud platforms, including **AWS and Azure**, and advanced Python libraries such as **Pandas, NumPy, GeoPandas, and Arcpy** for data analysis and geospatial processing.
- Experienced in implementing **KPI tracking**, process automation, and budget analysis to enhance operational efficiency and business performance.
- Strong interpersonal and collaboration skills, capable of thriving in individual contributor roles or cross-functional teams.

Skills

Programming Languages	Python, SQL
Python Packages	Pandas, NumPy, Arcpy, Geopandas, Snowflake connector and Matplotlib
Databases	MS SQL Server, MySQL, Snowflake, PostgreSQL, NoSQL Databases
ETL Tools and Techniques	SQL Loader, Python-based ETL
Data Analytics Techniques	Data Warehousing, Data Cleaning, Data Manipulation, Data Governance
Data Visualization Tools	Tableau (Desktop, Prep Builder, Public, Server), Power BI
Project Management tools	JIRA, ServiceNow
Agile Methodologies	Agile Development Frameworks, Scrum, Sprint Planning
Cloud Platforms	AWS, AZURE
Geospatial Analysis	ArcGIS, GeoPandas, Spatial SQL
Others	Salesforce, MS Office Suite (Excel, Pivot Tables, VLOOKUP, Charts), GitHub, SAS

Education

Masters in Big Data Analytics and Information Technology		 Jan 2021 - May 2022
University	of	Central Missouri
Bachelor of Pharmacy		 Oct 2014 - May 2018
G. Pulla Reddy College of Pharmacy, Hyderabad		

Experience

St. Louis Development Corporation	 Jun2023 – Present
Data Analyst	

- Established and enforced data governance policies and standards to ensure data quality, security, and compliance with industry regulations across organizational systems.
- Developed and implemented data quality assurance processes, ensuring the integrity, accuracy, and consistency of organizational data assets.

- Conducted in-depth data analysis for multiple departments (Streets, Buildings, Public Safety) to drive actionable insights and improve operational performance.
- Developed and optimized SQL queries to create efficient views and enhance data analysis and reporting capabilities.
- Utilized Python libraries (e.g., Pandas) for data transformation and cleaning, ensuring data accuracy and reliability for analysis and decision-making.
- Performed geocoding of data using GeoPandas to visualize and analyze spatial data, supporting key decision-making processes and operational efficiency.
- Designed and developed interactive dashboards in Tableau to track performance metrics, including public safety metrics, incentives, and ARPA fund utilization.
- Leveraged Tableau Prep Builder to clean, shape, and transform data before loading it into Tableau for reporting and analysis, improving workflow efficiency and data accuracy.
- Created and maintained data visualizations for incentive dashboards, highlighting the incentives provided to businesses and organizations within the city.
- Led data migration initiatives, transferring data from SQL databases to Snowflake using Python and managing various file formats, including CSV, JSON, and Parquet.
- Designed and implemented point-in-time metrics capture processes in Snowflake, enabling historical data analysis and business intelligence reporting.
- Designed and implemented a robust integration process with Salesforce using REST APIs to retrieve, clean, and transform large datasets for business analysis.
- Created and managed feature classes in ArcGIS, performing data manipulation, spatial analysis, and quality assurance to maintain accurate geospatial datasets.
- Delivered timely ad-hoc reporting solutions using SQL, Python, and Tableau to meet the dynamic needs of various business units, providing actionable insights for decision-makers.

Artificial Inventions, NC Northern Trust

| May 2022 – Jun2023

Data Analyst

- Utilized Python to analyze and visualize financial datasets, providing insights into data trends and aiding in data-driven decision-making.
- Gained hands-on experience with ServiceNow's Discovery module to streamline asset and configuration management within financial systems.
- Managed the integration of Configuration Items (CIs) into ServiceNow through the Discovery process to enhance operational efficiency in financial systems.
- Wrote, executed, and optimized SQL queries for data analysis, profiling, and reporting, including complex joins and sub-queries, to support financial modeling and analysis.
- Generated various financial capacity planning reports and visualizations using Python libraries like NumPy, Matplotlib, and Pandas for decision-makers.
- Maintained databases in MySQL and PostgreSQL, extracting financial data from internal systems for analysis and reporting purposes.
- Conducted data cleaning and preparation by slicing and dicing financial data using SQL and Excel to ensure accuracy and consistency in reporting.
- Executed comprehensive data profiling, cleansing, mapping, and quality assurance processes to ensure the integrity of financial data.
- Performed data analysis and reporting by executing SQL queries on relational databases to support financial modeling and business intelligence activities.
- Designed and published customized financial dashboards and interactive reports using Tableau, ensuring timely and actionable insights for stakeholders.
- Developed Tableau visualizations, including scorecards, bar charts, scatter plots, geographical maps, and Gantt charts, to track financial performance and KPIs.
- Created and validated SQL queries with various join types (inner, left, right) in Tableau Desktop to ensure accuracy and consistency of financial data.
- Published financial dashboards to Tableau Server, enabling stakeholders to access insights via laptop, PC, or iPad based on their preference.
- Conducted detailed data investigation and discovery processes to map and integrate financial data from diverse sources, ensuring comprehensive reporting and analysis.

AGS HEALTH, India

| Jun 2018 –Feb 2020

Data Analyst

- Utilized Python for data analysis and visualization of medical coding data, helping to interpret trends in ICD-10, CPT, and HCPCS codes to support coding accuracy and efficiency.
- Used Pandas, NumPy, and Matplotlib in Python to prepare, transform, and visualize medical claims data, ensuring accuracy and compliance with billing and coding standards.

- Worked with healthcare management systems like ServiceNow's Discovery module to manage IT assets supporting medical coding operations, ensuring that the infrastructure aligns with coding processes.
- Wrote and optimized SQL queries to extract and analyze patient data, including ICD and CPT codes, ensuring that medical coding processes are efficient, accurate, and compliant with industry standards.
- Generated operational reports for medical coding performance, including coding accuracy, claim rejection rates, and reimbursement trends, using Python and visualization tools like Matplotlib and Pandas.
- Maintained databases in MySQL and PostgreSQL, extracting data related to medical coding, billing cycles, and payer information to support operational and financial reporting.
- Performed extensive data cleaning and preparation using SQL and Excel, ensuring that coding data is accurate and ready for further analysis to optimize billing and claims processes.
- Conducted data profiling and cleansing of medical records to ensure the integrity of patient information and consistency of medical codes for compliance with healthcare regulations (e.g., HIPAA).
- Used SQL queries to analyze data from healthcare databases, identifying patterns in medical coding errors, trends in claim rejections, and opportunities for process improvements.
- Designed and published custom dashboards and reports in Tableau, tracking key metrics like coding productivity, claims accuracy, and payer performance, enabling data-driven decision-making.
- Developed Tableau visualizations such as bar charts, line graphs, and geographical heat maps to visualize coding performance, financial impact, and claim statuses for management and clients.
- Validated SQL queries in Tableau Desktop to ensure the accuracy of data being reported on, particularly for critical metrics such as coding compliance and revenue cycle performance.
- Conducted data investigation and mapping to ensure seamless integration of medical coding data from multiple sources, ensuring comprehensive reports that reflect accurate coding practices and patient information.

Professional Certifications

MySQL for Data Analytics and Business Intelligence – Udemy | Aug 2021

Date Concepts: Database terminology, SQL theory, MySQL constraints, MySQL aggregate functions, SQL Joins, Combining SQL and Tableau.

Introduction to Data Analytics – IBM | Mar 2021

Concepts: Data Analytics, Data Ecosystem, Gathering and wrangling Data, Mining and Visualizing Data.

Google Data Analytics Professional Certificate

Google Analytical thinking, spreadsheet basics, communication with stakeholders, data types and structures, working with large datasets in SQL, data integrity, data cleaning, creating data visualizations and dashboards with Tableau, and data organization.

Academic Projects

Data Visualization on Snapchat Ads

|Apr 2021 – May 2021(UCM)

Utilizing web application made portray charts, patterns and a dashboard on how snapchat promotions are focusing on, how also, when are they focusing on individuals and who are paying to target. Carried out utilizing Tableau and informational collection from Kaggle.

Database Management on Restaurant management database

|Apr 2021 – May 2021(UCM)

Made an eatery the executives data set, to deal with food and drink stock. Carried out utilizing SQL and informational collection from Kaggle.

Anxiolytic Effect of Ayurvedic drugs on Rats

|Feb 2018 – May 2018(GPRCP)

utilized diverse ayurvedic drugs on rodents to test what sort of anxiolytic impact does they show when they are restless.
