

Jayasree Neelapu | Senior Software Developer

Seattle, WA | (206) 851-1469 | jayasree.n.reddy01@gmail.com | [LinkedIn](#) | [Portfolio](#)

Professional Experience

- **Backend Development Expertise:** 5+ years of proficiency in developing, enhancing, and maintaining backend systems using technologies such as Java, NodeJS, ExpressJS, Python PostgreSQL, RDBMS, REST APIs and more.
- **API Design and Documentation:** Expertise in designing backend APIs efficiently, documenting them meticulously, and demonstrating their functionality to teams based on business requirements.
- **API and Microservices Development:** Designed and implemented robust REST APIs and microservices using Java Spring Boot, integrating with Apache Kafka and other technologies.
- **System Integration and Automation:** Orchestrated seamless integrations with third-party systems using REST and SOAP APIs, enhancing data exchange and system interoperability.
- **Front-End Development:** Gained proficiency in HTML, CSS, JavaScript, React, and jQuery through hands-on projects, developed a personal website to showcase my learning.
- **AWS Certified Developer Associate:** Certified in AWS, applying cloud expertise to enhance application scalability, reliability, and performance.
- **Mentorship and Collaboration:** Acted as a mentor, fostering a culture of continuous learning and growth within teams. Led design documentation sessions and collaborative discussions to align technical solutions with business requirements and architectural principles.
- **Adaptability, Continuous Learning, and Innovation:** Demonstrated ability to quickly learn and adapt to new technologies. Actively learning generative AI, prompt engineering, and exploring their integration into applications to drive innovation and efficiency.

Certifications

- AWS Certified Developer Associate (DVA-C02) : Date issued:May, 2024
- Microsoft Certified Azure Fundamentals (AZ-900) : Date issued:July, 2021

Skills

Backend Technologies	Java, Spring MVC, SpringBoot, OOP, Maven, ExpressJS, Apache kafka, microservices, Design patterns, Node.js, JavaScript, Python, RESTful APIs, Spring Security, Elasticsearch, GraphQL, Redis
Web Development Technologies	HTML, CSS, JavaScript, React
Cloud Technologies	AWS EC2, S3, Lambda, IAM, API Gateway, Azure, GCP
Database Technologies	PostgreSQL, DynamoDB, Hibernate
Development Tools	IntelliJ, Eclipse, VS Code, PyCharm
Testing Tools	JUnit, Mockito, Selenium
CI/CD Tools	Docker, Jenkins, Kubernetes
Version Control Tools	Git, GitHub, Bitbucket
Bug Tracking Tools	Confluence, Jira
Other Tools	Postman, Splunk, ServiceNow, JWT, OAuth2, Google Analytics, OWASP ZAP, Shell Scripting

Experience

H-Town Technologies (Houston, USA)

09/2024 - Present

Senior Software Developer

Responsibilities:

- *Platform Performance Upgrade* : Successfully upgraded a B2B marketplace platform, resulting in a **50% average performance improvement**. Enhanced key components such as Node.js, Express.js, AWS RDS for PostgreSQL, and Elasticsearch. Integrated the application with Google Analytics for real time analysis.
- *Documentation and Process Improvement*: Analyzed and understood the system flow to identify gaps in existing documentation. Created comprehensive guides for future developers, ensuring smoother onboarding and project understanding.
- *End-to-End Debugging and Technical Reporting* : Debugged the website comprehensively across frontend and backend, identified issues, and proposed enhancements. Delivered a detailed technical report to the client, secured buy-in, and facilitated implementation, improving system performance and driving business growth.
- *Infrastructure Optimization*: Configured **EC2 instances** with updated AMIs and optimized **NGINX configurations**. Implemented **autoscaling** and ensured proper **load balancing** for enhanced application performance and scalability.
- *Frontend Coordination and Deployment* : Coordinated frontend upgrades, ensuring timely deployments. Conducted thorough **end-to-end testing** to maintain quality and reliability.
- *CI/CD Pipeline Development* : Rebuilt CI/CD pipelines from scratch for both frontend and backend applications using AWS and CircleCI. Improved deployment efficiency, reducing build and deployment times by **40%**, and ensured seamless integration and delivery with enhanced automation and scalability.
- *Google Analytics Integration* : Set up and configured a Google Analytics account to track user statistics and behavior. Integrated it seamlessly with the web application, enabling real-time insights and data-driven decisions to improve user engagement and application performance.
- *Security Testing and Vulnerability Assessment* : Conducted penetration testing using OWASP ZAP tool to identify and report web application vulnerabilities through automated, manual, and API testing approaches. Enhanced application security and performance, achieving a **30% reduction in security risks** by addressing identified vulnerabilities.
- *Process Automation with Python* : Developed a Python automation script using Selenium to eliminate repetitive long running tasks. One of the scripts filter large datasets, download files with custom naming conventions, zip & send them via email, increasing speed, minimizing manual errors, improving the operational efficiency by **85%**.

Technology and Tools: Node.js, Express.js, AWS RDS for PostgreSQL, Elasticsearch, EC2, AMIs, NGINX, Autoscaling, Load Balancing, AWS Pipelines, CircleCI, Google Analytics, Python, Selenium

ADP - Hyderabad, Telangana

12/2022 - 03/2024

Senior Technical Member

Responsibilities:

- *Technical Proficiency and Specialization* : Demonstrated expertise as a senior backend developer within the specialized Tax Credits domain, leveraging technologies such as Java, Spring framework, NodeJS, PostgreSQL, AWS, and REST APIs to develop robust and scalable solutions.
- *Project Leadership and Team Guidance* : Led a team in a priority project aimed at onboarding a new Tax Credit, overseeing the implementation of custom use cases into our Tax Credits System. Provided mentorship and guidance to ensure project success and team cohesion.
- *API Design and Development* : Designed and developed cutting-edge REST APIs using Java and Spring Boot to streamline processes related to fetching and overriding client Payroll Data. These APIs facilitated seamless integration and data management, enhancing system efficiency and performance.

Technology and Tools: Java, SpringBoot, PostgreSQL, JUnit, IntelliJ, Eclipse, AWS, REST APIs, NodeJs, DynamoDB, Jira, Confluence, Bitbucket

NatWest Group - Bangalore, Karnataka

01/2022 - 12/2022

Senior Software Engineer

Responsibilities:

- *Microservices Development and Maintenance* : Spearheaded the development and maintenance of Microservices in Java using Spring Boot, ensuring adherence to industry best practices and performance optimization. Facilitated seamless integrations with Apache Kafka, Message Queues and various services leveraging REST architecture.

- *Maintenance, Enhancement, and Governance* : Played a pivotal role in the maintenance, enhancement, and governance activities of existing Microservices. Successfully orchestrated the deployment of these Microservices into production environments, ensuring reliability and scalability.
- *Design Documentation and Collaboration* : Led high-level and low-level design documentations and collaborative discussions for Microservices. Ensured alignment with architectural principles and business requirements, fostering innovation and efficiency.
- *Splunk Log Configurations and Optimization* : Owned and provided expert guidance to teams on Splunk log configurations and optimization strategies. Implemented best practices to enhance log management, monitoring, and troubleshooting capabilities.
- *Mentorship and Learning Initiatives* : Acted as a mentor during the learning fest organized within the business unit, sharing expertise and insights with peers. Contributed to the professional development of team members, fostering a culture of continuous learning and growth.

Technology and Tools: Java, Spring MVC, SpringBoot, JUnit, IntelliJ, Eclipse, PostgreSQL, Apache Kafka, Message Queues, REST APIs, Splunk, Jira, Confluence, Bitbucket

Infosys - Bangalore, Karnataka

Senior Systems Engineer

09/2021 - 12/2021

Responsibilities:

- *System Administration and Scripting* : Conducted seamless installation and upgrades of MID Servers on LINUX platforms, ensuring system stability and performance. Developed and implemented efficient shell scripts for file manipulation, streamlining administrative tasks and enhancing automation capabilities.
- *Integration with Client Monitoring Systems* : Orchestrated integrations with client monitoring systems, including Azure and other third-party platforms, to facilitate patching-related activities. Leveraged REST and SOAP APIs to establish robust communication channels, optimizing system interoperability and data exchange.
- *Custom Dashboard and Report Development* : Spearheaded the creation of customized dashboards and reports, tailored to meet specific client requirements and enhance user experience. Employed innovative design principles and data visualization techniques to deliver actionable insights and drive informed decision-making.
- *Process Automation and Error Reduction* : Engineered automated solutions to streamline manual record updating tasks, minimizing errors and ensuring data consistency across the system. Implemented standardized processes and workflows, resulting in increased operational efficiency and improved overall system reliability.

Technology and Tools: ServiceNow, JavaScript, Shell Scripting, HTML, CSS, REST API, SOAP API

Infosys - Bangalore, Karnataka

Systems Engineer

06/2019 - 09/2021

Responsibilities:

- *API Development and Backend Support* : Worked on API development using Java and Spring Boot to create applications that effectively support backend operations. Implemented RESTful services and utilized Spring MVC to ensure efficient and scalable backend processes. Collaborated with frontend developers to integrate APIs and optimize system performance.
- *Integration Expertise* : Leveraged Scripted REST APIs, REST, and SOAP messages to seamlessly integrate ServiceNow with third-party applications. Streamlined data exchange and communication channels, enhancing interoperability and system efficiency.
- *Module Customization and Maintenance* : Customized and maintained Change Management and Release Management modules in ServiceNow. Implemented tailored solutions to align with organizational processes and requirements, ensuring optimal functionality and user experience.
- *Automation of Notifications* : Engineered and automated custom email notifications, optimizing communication processes and enhancing user engagement. Developed robust triggers and workflows to deliver timely and relevant notifications, improving overall system responsiveness.
- *Workflow Design and Scripting* : Designed workflows and custom scripts to facilitate Service Request fulfillment, streamlining request handling and resolution processes. Implemented efficient automation strategies to expedite service delivery and enhance user satisfaction.
- *System Integration and User Management* : Orchestrated end-to-end integration between ServiceNow and Windows SCCM, enabling seamless management of user resources and devices. Ensured data accuracy and consistency across systems, enhancing operational efficiency and resource utilization.
- *Data Management and Processing* : Collaborated with data sources to load, transform, and map data for further processing within ServiceNow. Implemented data governance practices and quality assurance measures to maintain data integrity and reliability.
- *Catalog Item Development and Automation* : Developed multiple catalog items and integrated them with Change/Incident systems for automation purposes. Implemented innovative solutions to streamline service request handling and improve workflow efficiency.

Technology and Tools: ServiceNow, Java, SpringBoot, Spring MVC, JavaScript, Shell Scripting, HTML, CSS, REST API, SOAP API

Education

- Bachelor of Technology (B.Tech) in Electronics and Communications Engineering from Andhra University College of Engineering, India. (2015-2019), CGPA: 8.52/10

Accomplishments

- Developed a responsive personal website using HTML, CSS, and ReactJS for visual arts featuring an interactive gallery and a contact form for new order requests. ([GitHub link](#))
- Contributed to open-source projects as part of Hacktoberfest 2022, showcasing commitment to community-driven development and collaboration.
