

MANASWINI REMIDI

manaswiniremidi@gmail.com | (313)290-6460 | <https://www.linkedin.com/in/manaswini-remidi>

CAREER OBJECTIVE:

Results-driven **Salesforce Developer/Administrator** with **5+ years** of IT experience, including **4+ years** specializing in Salesforce administration and development. Expert in designing and implementing custom solutions using **Apex, Lightning Web Components (LWC), Visualforce, and REST/SOAP APIs**. Skilled in integrating Salesforce with enterprise systems (e.g., **Microsoft, SQL databases**) and optimizing workflows to meet business needs. Seeking to leverage expertise in **CPQ, billing**, and scalable development practices to deliver impactful, remote salesforce solutions for dynamic, contract-based projects while supporting distributed teams with **agile/DevOps** excellence.

SUMMARY:

- Over **5+ years** of professional software development experience, including **4+ years as a Salesforce Developer/Administrator** and **1+ year as a Java Developer**, delivering scalable solutions in fast-paced environments.
- Proficient in **Salesforce.com CRM** (Sales, Service, Marketing Clouds), Communities, Sites, and **Force.com** platform, with hands-on experience in **Apex, Visualforce, Lightning, SOQL, Platform events, and workflows**.
- Adept at creating **custom reports, dashboards**, and analytical snapshots to drive data-driven decision-making for sales and lead management.
- Experienced in integrating Salesforce with external systems using **REST/SOAP web services, middleware**, and **ETL tools like DbAmp**, improving data synchronization and operational efficiency.
- Skilled in **Java, SQL, JavaScript, JUNIT, and web technologies (HTML, CSS, XML)**.
- Proficient in using tools like **Data Loader, DB Amp, and Eclipse** to manage data migration, testing, and development processes effectively.
- Strong knowledge of **Agile methodology, SDLC, and CI/CD pipelines** with proven success in remote collaboration using **JIRA and Confluence**.

EDUCATION:

- Master of Science in Computer Science Wayne State University
- Bachelor of Technology in Computer Science & Engineering SR University

CERTIFICATIONS:

- Salesforce Certified Administrator
- Salesforce Certified Platform Developer I

SKILLS:

- **Salesforce.com:** Apex, LWC, Visualforce, SFDX, CI/CD, Apex Data Loader, Workflow & Approvals, Triggers, Custom Objects, Tabs, Lightning Components, Sales Cloud, Service Cloud, CPQ, Billing, Experience Cloud, SOQL, SOSL, Flows, Process Builder, Platform Events, Reports & Dashboards, Validation Rules.
- **Integration & APIs:** REST/SOAP Web Services, Postman, OAuth, ETL (Db Amp).
- **Languages:** Java, C, XML, HTML, JavaScript, CSS, APEX.
- **RDBMS:** PL/SQL, MSSQL, Oracle.
- **Tools:** DB Amp, Eclipse, Apache Tomcat, Data Loader, Salesforce DX, JUNIT, TortoiseSVN, DB Amp, GIT, VS Code, Copado, DevOps, CI/CD, Tableau, ETL Tools.
- **Other:** Ticketing System Support, Software Troubleshooting, Agile (JIRA, Confluence), SDLC, ITIL, DevOps practices.

EXPERIENCE:

Salesforce Developer – FreddieMac | Apr 2019 – Mar 2021

- Led development across **SDLC** using **Agile methodology**, focusing on **Salesforce CRM** (Sales, Service, Marketing Clouds), Communities, Sites, and **Force.com**.
- Administered and enhanced **Salesforce CRM (Sales, Service, Marketing Clouds)** by designing custom solutions using **Apex, LWC, Visualforce, and Flows**, improving sales process efficiency by **20%**.

MANASWINI REMIDI

manaswiniremidi@gmail.com | (313)290-6460 | <https://www.linkedin.com/in/manaswini-remidi>

- Created custom objects, reports, dashboards, and workflows to support **data-driven decision-making**, enhancing data tracking for sales and leads, resulting in a **10%** improvement in reporting accuracy.
- Developed custom **Lightning components** for order management, integrating Community Builder, **SLDS**, and Apex for business logic and **DML operations**.
- Designed and deployed **CPQ automation**, streamlining pricing, quoting, and **billing processes**, reducing manual pricing errors, and improving efficiency by **30%**.
- Integrated Salesforce with external applications (SQL Databases) using **REST/SOAP APIs and DbAmp**, improving data synchronization, and reducing discrepancies by **20%**.
- Configured **Salesforce DX scratch orgs, CI/CD pipelines** for seamless deployments, reducing release time by **15%**.
- Maintained and optimized **governor limits and SOQL queries** for high-performance applications, utilized platform events to enable real-time updates for sales and **billing workflows**.
- Collaborated remotely with distributed teams using **Agile tools (JIRA, Confluence)**, ensuring seamless sprint planning and delivery.

Achievements:

- Implemented a **custom wizard** for opportunity creation, improving user efficiency by **30%**.
- Led **Classic to Lightning migration**, improving UI responsiveness and adoption.
- Reduced **governor limit** violations by optimizing Apex code, maintaining application stability under high usage.

Salesforce Administrator/Developer – FreddieMac | May 2017 – Mar 2019

- Managed **Salesforce environment (Sales Cloud, Experience Cloud)**, including **user setup, profiles, roles, custom objects, fields, record types, page layouts, workflows, and validations** ensuring seamless **CRM** operations.
- Developed **custom Apex triggers, classes, and workflows** to automate sales and **billing processes**, enhancing user experience, and reducing data entry errors and cutting setup time by **25%**.
- Ensured data integrity and security by configuring **role hierarchies, permission sets**, and conducting regular audits with **Data Loader**, improving data quality by **15%**.
- Used Data Loader for **data exports/imports** and testing, improving data quality by **15%** through regular audits.
- Implemented **process automation using Flows**, streamlining sales approval workflows, and improving efficiency.
- Integrated Salesforce with **SQL databases** via **DB Amp**, enhancing **data warehousing** reducing discrepancies by **20%**.
- Configured **role hierarchies, profiles, and permission sets**, enhancing security and access management.
- Provided training and **troubleshooting** support to users, enhancing system usability and adoption.

Achievements:

- Streamlined opportunity creation processes via a **custom wizard**, cutting setup time by **25%**.
- Designed and implemented **automated billing workflows**, reducing manual invoice processing time by **25%**.
- Successfully validated and deployed code from **sandbox to production**, achieving zero critical bugs during **UAT**.

Junior Java Developer – Hexaware Technologies | May 2016 – Apr 2017

- Participated in all **SDLC** phases, developed Java applications using **JSP, Servlets, Struts, and JDBC**, applying modern software development practices to deliver scalable **CRUD operations** and user-friendly **GUIs**.
- Developed Java applications with **JDBC and JSP**, collaborating with teams to integrate workflows with enterprise systems.
- Created GUI screens using **HTML, CSS, JavaScript, and JSP**, improving user interface usability by **15%**.
- Developed a report module generating **Excel, CSV**, and text files, reducing manual reporting time by **20%**.
- Used **JUNIT** and mocking frameworks for test case development, increasing code coverage and reliability by **25%**.
- Developed Java apps with **JavaScript**, enhancing UI usability by **15%**.
- Collaborated with customers to gather requirements, ensuring timely updates and meeting SLAs consistently.

Achievements:

- Designed architectural diagrams using **VISIO**, aiding team alignment, and reducing design review cycles by **10%**.
- Built a Java application for **JUNIT** test data loading, improving test efficiency by **15%**.
