

MURALIDHAR RAO

Azure DevOps Engineer

Email: muralidharrao369@outlook.com [LinkedIn](#): [LinkedIn/In/Muralidhar](#) Mobile: +1 (667)-232-0825 Place: United States

SUMMARY

Experienced Azure DevOps Engineer with 4+ years of expertise in optimizing CI/CD pipelines and cloud infrastructure. Spearheaded the implementation of automated infrastructure provisioning, reducing manual setup time by 40%. Demonstrated proficiency in Azure DevOps, Terraform, and Jenkins, enhancing build success rates. Capable in leveraging technical capabilities to drive operational excellence and enhance team productivity.

TECHNICAL SKILLS

- **Programming & Scripting Languages:** Bash, PowerShell, Python
- **Cloud Platforms:** Azure, AWS
- **Database Management:** SQL Servers
- **CI/CD Tools:** GitHub Actions, Azure DevOps, Jenkins
- **Monitoring & Performance Management:** Nagios, APM
- **Container Orchestration:** Kubernetes, Docker Swarm, Docker
- **Configuration Management:** Ansible, Puppet, Chef
- **Data Formats:** YAML, JSON
- **Infrastructure as Code:** Terraform
- **Version Control:** GitHub, SVN
- **Operating Systems:** Linux, Windows

PROFESSIONAL EXPERIENCE

Iomega Technologies

Azure DevOps Engineer

May 2022 – Present

Technologies: Azure DevOps, Terraform, Jenkins, Azure, Azure Monitor, Log Analytics, Git, and Azure Security Center

- Implemented CI/CD pipelines using Azure DevOps, reducing deployment time and increasing release frequency for seamless software delivery.
- Built and deployed RESTful APIs using Python and Flask for microservices-based applications, improving response times and scalability.
- Automated infrastructure provisioning and configuration with Terraform, cutting manual setup time by 40% and enhancing environment consistency.
- Managed cloud resources on Azure, optimizing cost efficiency and achieving a reduction in cloud expenditure through effective resource scaling.
- Developed and maintained build and release pipelines with Jenkins, improving build success rate by 15% and minimizing downtime.
- Monitored and ensured system reliability using Azure Monitor and Log Analytics, achieving a uptime and swift issue resolution.
- Created Python scripts for monitoring cloud resources and automating alerts, improving system reliability and reducing downtime.
- Collaborated with cross-functional teams to streamline DevOps processes, increasing team productivity by 20% and improving project turnaround times.
- Integrated version control systems (Git) into Azure DevOps workflows, enhancing code review efficiency and ensuring better version management.
- Enhanced security and compliance measures by implementing Azure Security Center, leading to a 35% improvement in threat detection and vulnerability management.

Softenger Pvt. Ltd.

Middleware Administrator - MQ

September 2020 – July 2021

Technologies: IBM WebSphere MQ, IBM WebSphere Message Broker, IBM Integration Bus (IIB), IBM DataPower, Jenkins, Docker, Kubernetes, Linux distributions (Ubuntu, CentOS, Debian, Fedora)

- Engineered and optimized installation and configuration of IBM WebSphere MQ 5.3/6.0 and WebSphere Message Broker 6.1, improving system performance and reliability across environments.

- Designed and executed intricate message flows using IBM Integration Bus (IIB), achieving a 40% increase in data processing efficiency and accuracy.
- Industrialized routine DataPower tasks, leading to reduction in manual effort and improvement in operational accuracy.
- Directed CI/CD pipelines for middleware applications with Jenkins, which accelerated deployment times by 50% and reduced deployment errors.
- Administered and upgraded IBM WebSphere MQ, IBM DataPower, and other middleware components, ensuring seamless communication and reliability.
- Incorporated automated testing into CI/CD pipelines, increasing code reliability and reducing post-deployment issues.
- Coordinated with development teams to align middleware solutions with application requirements, facilitating a 20% improvement in integration efficiency.
- Applied Linux distributions like Ubuntu, CentOS, Debian, Fedora for server management, enhancing system stability and performance across many environments.

Alchemy Techsol India Pvt

Technical Support Engineer

August 2018 – September 2020

Technologies: WebSphere MQ Series V7.5, IBM Integration Bus (IIB)/Message Broker, DataPower, WTX, SOAP Nodes, HTTP Nodes, SAP Integration, Database Integrations with IIB, IBM APM Monitoring, Shell Scripting

- Spearheaded the installation, configuration, and maintenance of WebSphere MQ Series V7.5, IBM Integration Bus (IIB), DataPower, and WTX, ensuring high-performance messaging and integration solutions.
- Executed successful migrations for MQ, Message Broker (IIB), and DataPower environments, achieving uptime and minimal disruptions.
- Optimized MQ objects, including Queue Managers, Local Queues, and Clustered Queues, resulting in a 30% improvement in message throughput and system reliability.
- Delivered expert-level technical support, diagnosing and resolving critical MQ and DataPower issues with a resolution rate within predefined SLAs.
- Orchestrated large-scale IBM MQ deployments and cluster setups, implementing high-availability solutions and enhancing system performance and security measures.
- Programmed administrative tasks with shell scripting, increasing operational efficiency by 40% and reducing manual intervention for backup, configuration, and monitoring.
- Deployed active monitoring solutions and customized alerts using IBM APM Monitoring, reducing incident response time.
- Constructed and maintained DataPower appliances for secure API management, enforcing policy and threat protection, and optimizing XML and JSON transformation processes.

EDUCATION

Master of Science in Information Systems

University of Maryland, Baltimore County, USA

August 2021 – May 2023

Bachelor of Technology in Mechanical Engineering

Lingaya's Vidyapeeth, Haryana, India

June 2014 – July 2018
