SUMMARY

Business Data Analyst with 4+ years of experience delivering data-driven insights across retail, financial services, and healthcare at Walmart, Fiserv, and CVS Health. Skilled in **SQL, Python (Pandas, PySpark), Snowflake, Tableau, Power BI, and ETL processes** to analyze large datasets and support **AI/ML initiatives** such as **demand forecasting, fraud detection, and healthcare analytics**. Experienced in **requirements gathering, data modeling, dashboard development, and Agile delivery**, translating business needs into scalable analytics solutions and actionable insights.

PROFESSIONAL EXPERIENCE

Walmart

Dec 2024 - Present

Business Data Analyst

Remote, USA

- Analyzed **120M+ omnichannel retail transactions** using **SQL, Python (Pandas, PySpark)** to uncover customer behavior trends and feed structured datasets into **AI-driven demand forecasting and product recommendation models** used by teams.
- Collaborated with **data scientists and ML engineers** to prepare training datasets and feature variables for **machine learning models predicting product demand, promotion lift, and inventory replenishment**, improving forecast accuracy for high-volume SKUs.
- Built **Tableau and Power BI dashboards integrating predictive model outputs** to monitor forecast accuracy, promotion performance, and category sales across retail and eCommerce channels.
- Automated data pipelines and model input datasets using **SQL, Python, and Airflow**, enabling near-real-time data feeds for AI analytics models and reducing manual data preparation time by **45%**.
- Worked with **product managers** to turn business needs into **data features for AI models**, leading to better pricing and promotions.
- Supported **A/B testing and model performance evaluation** by analyzing model outputs, monitoring prediction accuracy, and generating insights that helped improve **AI-driven demand forecasting and assortment planning decisions**.

Fiserv.

Jun 2022 - Nov 2023

Business Data Analyst

India

- Analyzed 50M+ monthly payment transactions (card, ACH, digital) with **SQL, Python (Pandas, NumPy)** and Snowflake, uncovering fraud patterns and high-risk clusters that fed **AI-driven detection models** and helped lower fraud losses.
- Collaborated with data scientists and product teams to support development of **machine learning fraud detection models, performing data preparation, feature engineering**, to improve risk-scoring accuracy and reduce false positives.
- Developed **Power BI and Tableau dashboards** for monitoring fraud rates, anomalies, and authorization metrics to speed case triage.
- Designed and optimized complex SQL queries and data models across enterprise data warehouses (SQL Server) to enable faster **fraud analysis** and improve data accessibility for analytics and reporting.
- Validated and monitored **ETL data pipelines using Apache Spark** and Azure Data Factory, ensuring high data quality and reliable ingestion of large-scale transaction data from payment gateways and merchant platforms.
- Presented **data-driven insights and risk analysis** to stakeholders including fraud operations teams and product leadership, enabling proactive fraud mitigation strategies and contributing to improved transaction security.

CVS Health

Aug 2020 - May 2022

Business Data Analyst

India

- Translated pharmacy operations and clinical business needs into **data-driven requirements**, creating BRDs, user stories, and data mapping documents to support analytics solutions used by pharmacy operations and digital health teams.
- Used **SQL** to analyze pharmacy data, helping reduce refill delays and improve processes.
- Built automated **Alteryx workflows** that sped up data prep and improved data quality.
- Worked closely with **data engineering teams** to validate ETL pipelines, perform data reconciliation between source systems and the enterprise data warehouse, and ensure accurate integration of pharmacy and patient engagement datasets.
- Built **Tableau dashboards** to track prescription data and workload, helping managers make quicker decisions.
- Supported Agile delivery by joining **sprint planning, backlog refinement, and user acceptance testing (UAT)** in JIRA, documented test cases, and validated analytics outputs, which helped release accurate reports to business stakeholders on schedule.

EDUCATION

St Francis College | **Masters, Business Analytics (GPA: 3.9)**

Brooklyn, NY Jan 2024 - May 2025

JNTUH | **Bachelors, Computer Science (GPA: 4.0)**

India May 2018 - May 2022

SKILLS

- Data Analysis & Programming:** SQL, Python, Advanced Excel, Statistical Analysis, Data Mining
- Databases & Cloud Platforms:** Snowflake, Oracle, SQL Server, Azure Data Factory, Azure Cloud, AWS, Alteryx
- Reporting & BI Tools:** Power BI, Tableau, Dashboard Development, KPI Reporting, Executive Reporting, UAT Testing
- Finance, Risk & Compliance:** Fraud Detection & Risk Analytics, Regulatory Reporting, Audit Support, AML Monitoring, Financial Process Analysis
- AI/ML & Automation:** ML Model Support, Predictive Modeling, ChatGPT, Power Automate, AI-Assisted Documentation, Workflow Automation
- Business & Systems Analysis:** Requirements Gathering, BRD/FRD Documentation, User Stories, Process Mapping, Application Onboarding, Access Governance, User Provisioning, Role & Entitlement Management
- Tools & Methodologies:** Jira, Confluence, Git/GitLab, Microsoft Teams, Agile/Scrum, Root Cause Analysis, Gap Analysis, Stakeholder Communication, Enterprise Applications (Oracle/SAP Exposure)

CERTIFICATIONS

- Google Business Intelligence: Google, Jul 2025 Credential ID: AZRMTBQA7SC1
- Certified ScrumMaster (CSM) – Scrum Alliance
