## Summary

---

Manual QA Engineer with 2+ years of experience in web and mobile testing. Skilled in UI/UX testing, API testing, and test documentation. Strong Agile and streaming app testing expertise. Pursuing MS in Computer Science.

## Skills

---

**Automation & Testing:** Playwright, Selenium, Cucumber, Worksoft Certify, CTM, Execution Manager, Regression Testing, End-to-End Testing, Manual Testing, Agile Methodologies, UI/UX Testing, Cross-browser Testing, Risk-based Testing, API Testing.

**Programming Languages:** Java, JavaScript, Python, C++, C.

**DevOps & CI/CD:** Jenkins, GitHub, Azure DevOps, Docker, CI/CD Pipelines, Environment Configuration.

**Testing Tools & Platforms:** Postman, Charles Proxy, pgAdmin, JIRA, Confluence, JMeter, OWASP ZAP, SoapUI.

**Databases & APIs:** PostgreSQL, Oracle, SQL, RESTful APIs, BFF APIs.

## Professional Experience

---

**Software Quality Engineer Intern**, Local Grown Salads – USA Mar 2025 – present

- Assisted in creating and running automated UI and API tests using Playwright and JavaScript.
- Helped set up test environments using pgAdmin and participated in defect tracking using Jira.
- Collaborated with QA leads in drafting basic test plans and identifying test coverage gaps.

**Software Quality Engineering Associate, FT**, Accenture Private Limited – Hyderabad, India Sep 2021 – Sep 2023

- Collaborated with QA Leads and Architects to develop and maintain automated test scripts across UI (cross-browser/device), API, and database layers using Playwright and JavaScript.
- Implemented Jenkins jobs to automate test executions, integrated results into CI/CD pipelines, and promoted builds in a PostgreSQL-based test environment using pgAdmin.
- Ensured robust source control practices using GitHub, handling branches, pull requests, and conflict resolution.
- Documented and tracked bugs in Jira with detailed evidence such as logs and screenshots to support triage and resolution.
- Assisted in test strategy creation, working with BAs and POs to refine requirements and define risk-based test prioritization and coverage.
- Conducted root cause analysis and supported debugging to identify system-level issues and streamline test cycles.
- Participated in agile ceremonies including sprint planning, daily stand-ups, retrospectives, and defect triage meetings.
- Created regression test suites and contributed to automation framework enhancements for improved scalability.
- Validated RESTful API endpoints using Postman and SoapUI and supported security testing with OWASP ZAP.
- Maintained QA documentation including test plans, test cases, execution logs, and environment setup guides on Confluence.

## Education

---

**Northern Arizona University**, MS in Computer Science GPA: 3.9/4.0 Aug 2023 – Dec 2024

**Scient Institute Of Technology**, BS in Computer Science GPA: 3.5/4.0 Aug 2017 – May 2021
