

Shreya Masireddy

Full Stack Developer

+1 (667) 369-8571 | shreyamasireddy531@gmail.com | Baltimore, Maryland, USA | [LinkedIn](#)

SUMMARY

- Full Stack Developer with 4 years of experience designing web-based enterprise applications using Java/J2EE, with expertise in all phases of the SDLC. Proficient in integrating Generative AI models to enhance automation and data processing efficiency.
- Good experience in database architecture and optimization, with MySQL, SQL Server, PostgreSQL, and MongoDB to design data storage solutions, implement stored procedures and triggers, and streamline complex SQL queries for enhanced system reliability.
- Extensive experience building RESTful web services using Spring MVC, optimizing data retrieval processes, and increasing API availability by 60% through strategic performance enhancements.
- Skilled in developing high-performance web solutions, utilizing JavaScript frameworks (React.js, Angular), backend technologies (Spring Boot, Spring MVC, Node.js), and DevOps tools (Docker, Jenkins, Kubernetes) to align with business requirements.

SKILLS

Languages: Java, JavaScript, Python, SQL, .Net

Methodologies: SDLC, Agile/Scrum, Jira

J2EE Technologies: Servlets, JSP, JSTL, JavaBeans, JDBC

Web Technologies: HTML5, CSS3, JavaScript, Bootstrap5, jQuery, Ajax, JSON

Frameworks/Libraries: React.js, Angular, Node.js, OAuth 2.0, GraphQL, Mockito, Hibernate, Junit

Spring Frameworks: Spring Boot, Spring MVC, Spring Cloud, Spring Data JPA, Spring REST, Spring Security, Spring Web

Cloud: AWS (EC2, SQS, Elastic Beanstalk, Lambda, Code Deploy, CloudWatch), Identity and Access Management (IAM)

Database: MySQL, PostgreSQL, MongoDB

CI/CD and DevOps Tools: Maven, Gradle, GitHub, Jenkins, Docker, oscilloscope, Kubernetes, Kafka, Postman, function generators

AI/ML: Generative AI, OpenAI, ChatGPT, Large Language Models, Scikit-learn, Pandas, Natural Language Processing, Scripting

EXPERIENCE

CitiusTech, USA | Software Developer

Sep 2023 – Present

- Established robust data access layers using Spring Data JPA, enhancing code maintainability and reducing development time by 25%.
- Microservices Architecture: Designed and implemented microservices-based architectures with Spring Boot, boosting application scalability and maintainability by 30%.
- Built RESTful APIs using Spring MVC and Spring WebFlux, improving data communication efficiency and increasing API request throughput by 30%.
- Streamlined deployment processes by implementing and maintaining CI/CD pipelines with AWS CodePipeline, CodeBuild, and CodeDeploy, reducing deployment time by 40% and increasing deployment frequency by 50%.
- Developed 15 GraphQL schemas across 10 microservices, enabling data access and reducing front-end development time by 50%.
- Integrated Generative AI models (GPT-4, Deepgram) to process and summarize large audio files, leading to a 20% increase in user adoption and making it a standout product feature.

Intel Corporation, India | Software Development Engineer

Aug 2021 – May 2022

- Utilized React's caching strategies to optimize data retrieval from Java APIs, reducing average page load time by 25% and improving user experience for high-traffic applications.
- Designed and implemented a Java-based automation framework using Selenium, leading to a 40% reduction in software release cycles and significantly improving the efficiency of regression and functional testing.
- Streamlined and automated software deployment (CI/CD pipeline) workflows using Jenkins and Docker, cutting deployment time by 50% while enhancing code quality and stability by 35% within an agile development environment.
- Led and mentored a team of junior developers to successfully deliver a mission-critical enterprise platform, fostering collaboration and increasing overall team productivity by 25% through strategic guidance and knowledge sharing.

Hexaware Technologies, India | Associate Software Engineer

Feb 2020 – Jul 2021

- Designed and optimized high-performance RESTful APIs using Angular's built-in mechanisms and third-party integrations, enhancing backend communication and improving data exchange efficiency by 20%.
- Established seamless, real-time data synchronization with external systems using Spring Data JPA/JDBC and Apache Kafka, increasing processing efficiency by 30% and ensuring reliable data flow.
- Developed an intelligent search system with Elasticsearch, implementing autocomplete, fuzzy search, and stemming to achieve a 93% accuracy rate while significantly reducing query latency for faster and more precise search results.

EDUCATION

Master of Science in Information Systems | University of Maryland Baltimore County, Baltimore, MD

May 2024

Integrated MTech Software Engineering | Vellore Institute of Technology, India

May 2022

CERTIFICATIONS

- [AWS Certified Solutions Architect – Associate](#)
