

SINDHU ANUGULA

.net Full Stack Developer

2039369545

sindhuanugulareddy@gmail.com

Connecticut, USA

Professional Summary

A highly skilled and results-oriented **.NET Full Stack Developer** with 6+ years of experience in developing, designing, and deploying dynamic web applications and enterprise solutions using Microsoft technologies, Expertise in both front-end and back-end development, with a deep understanding of **.NET Core, ASP.NET MVC, C#, and SQL Server**, along with proficiency in modern web technologies like **HTML5, CSS3, JavaScript, Angular, and React**, Proficient in building, automating, and maintaining **CI/CD pipelines** to streamline the development process and deliver high-quality software faster, Skilled in optimizing code for performance and scalability, looking to apply deep technical knowledge and creative problem-solving at to help enhance and evolve web applications, Have Strong Database Skills on **T-SQL PUSQL, Oracle, MS ACCESS, OLEDB, ODBC Mongo DB, MY SQL and NOSQL**, Have good knowledge on different databases like **PostgreSQL, MySQL, and DB2. Oracle 13c/11g Microsoft SQL Server, NoSQL DB (Raven DB Monge DB and Cassandra, Couch DB, Red is**

Education

University of New Haven - Connecticut, USA (2022 – 2024)

- *Computer Science / Masters*

Technical Skills

- **Backend Development:** .NET Core, ASP.NET MVC, Web API, C#, Entity Framework, LINQ
- **Frontend Development:** HTML5, CSS3, JavaScript, jQuery, Angular, React
- **Database Management:** SQL Server, MySQL, PostgreSQL, Stored Procedures, Database Optimization
- **Languages & Frameworks:** C#, .NET Core, ASP.NET MVC, Entity Framework, JavaScript, React, Angular, HTML5, CSS3
- **Version Control:** Git, GitHub, Bitbucket, SVN
- **Cloud Platforms:** Microsoft Azure, AWS (Amazon Web Services), Azure DevOps
- **UI/UX:** Responsive Design, Bootstrap, Material UI, Tailwind CSS
- **Testing & Debugging:** Unit Testing (N Unit, MS Test), Integration Testing, TDD (Test-Driven Development)
- **Web Services:** RESTful APIs, SOAP, Web Sockets
- **Agile Methodology:** Scrum, Kanban, JIRA, CI/CD pipeline integration
- **CI/CD Tools:** Jenkins, Azure DevOps, GitLab CI, Team City, Octopus Deploy

Work Experience

.net Full Stack Developer | Feb 2024 – Present **KeyBank | East Haven, Connecticut, USA**

KeyBank It stands among the largest banks in the United States, offering a comprehensive range of financial services, including retail and commercial banking, investment management, and consumer finance, My role is to deploy the scalable web applications using the .NET Core framework and Angular for front-end development, serving critical banking functions like online banking services, loan applications, and payment gateways.

Environment: .Net Framework 3.5/4.0/4.5, Visual Studio 2013/2015, VB .Net IIS7.5, ASP .NET, CDP .Net. MVC, MWM, C#, C++, WCF Services, Win Forms Telerik, Web API, WPF, Azure, json, Web API2, Angular JS, HTML5, CSS3, Java Script SharePoint Python, Design Patterns .Net suite, Web Forms, ADO .NET, SQL Server 2016, TFS, Stored Procedures.

Key Responsibilities:

- Designed, developed & implementation of IT Solutions using **Oracle PL/SQL & Microsoft .NET Framework**.
- Designed and developed scalable web applications using **.NET Core** for the back-end and **Angular/React** for the front-end, Developed dynamic Win forms display for handling large amounts of master data
- Collaborated with cross-functional teams to gather requirements, plan sprints, and implement solutions using **agile methodologies**, Developed XML Web Services using **C#, ASP .NET, SOAP, XML XSLT and WSDL**.
- Developed **RESTful Web APIs** and integrated them with front-end frameworks to deliver seamless user experiences.
- Utilized Entity Framework **Core** to manage **SQL Server** databases, optimizing queries and ensuring efficient data access.

- Spearheaded the **CI/CD pipeline** implementation using **Azure DevOps** and Git for automated testing and deployment.
- Integrated cloud services such as **Azure** to host applications and implement cloud-based authentication mechanisms using **Azure AD**, Provided input regarding strategic direction for future development
- Applied best practices for software development, focusing on clean code, code reusability, and performance optimization, Configured Net Suite solutions as per client requirements
- Involved in Analysis, Design Coding Unit Testing, Integration Testing, Review and Release as per the business requirement, used **python** based **GUI** components for the front end functionality such as selection criteria.
- Worked on **Agile SCRUM** methodology, analyzed the new features and given solution for implementation
- Collaborated with other groups during the development including partners, business analyst development team and dependent cross functional teams.
- Graphical User Interface (**GUI**) was designed using **ASP.NET MVC** and the business logic was coded in **C# MVC** Controllers, Implemented business logic, data exchange, **XML** processing and created graphics using **python**
- Created **WCF** Services responsible for communicating and providing real time data from integrated server to Client Application, Involved in designing of **WPF** screens and implementing MVC design pattern.
- Developed the System using Windows authentication and Win Forms based authentication and role based Access.
- Architected Designed and developed **REST** based **API** using **ASP .NET MVC 4 WEB API** hosted on Windows Azure.
- Hands on expertise in front-end development utilizing Java Script frameworks such as **Angular JS Node js, jQuery** as well as front end technologies **HTMLS, CSS3, Ajax**
- Design and working knowledge of Server controls User controls Master Pages Security, Web Services XML Win forms and UI development Microsoft Development Environment
- Designed web forms using different **HTML** Controls, Setup trust between on premise and cloud server using Azure
- Creating and Managing Virtual Machines in Windows Azure and setting up communication with the help of Endpoints.
- Involved in peer review to ensure quality assurance norms and guidelines that are followed by team members.
- Extensively used **ADO.NET** for database connectivity and transactions Used Data set. Data Tables, Data Adapter, Data Reader and other **ADO.NET** connectivity controls extensively.
- Responsible for developing **WCF** Services using **C#** the application extensively absorbs and exposes web services.
- Used LINQ for data retrieving, querying, storage and manipulation interface screens developed using **ASP.Net**.
- Published Web services using **C#.NET** to interact with the other applications and exposed them using **SOAP** and **HTTP**.
- Created reusable Partial Views and used them in the user interface along with a third party Graphical Menu controls.
- Responsible for developing Layout. Nested Layout Pages, Partial Views Using **CSS** style sheets for having common layout and look and feel to all the controls, Created Business Logic using **python** to create Planning and Tracking functions
- Responsible is using **j Query** for Client Side Validations, Calling the Controller Actions, and Making calls to the WCF Services, Coordinate with the **QA** Team for Unit Testing using Rhino Mocks and Integration Testing of different modules, **AngularJS** was used to make the web applications dynamic and is used for making **DOM** manipulation.

.net Full Stack Developer | Jan 2023 - Feb 2024 **Selective Insurance Group, Inc | Hartford, Connecticut, USA**

Selective Insurance Group, Inc is a prominent provider of property and casualty insurance products and services, Offers coverage such as general liability, commercial automobile, commercial property, I maintained custom insurance management systems and client-facing web applications using .NET Framework, .NET Core, and Angular to support insurance policies, claims management, and customer interactions.

Environment: ASP .NET C# .NET C++, VB .Net, SQL Server 2016 WCF, WPF, JSON, SSIS, SSRS, Win Forms Bootstrap, Knockout JS, US 7.0. JQuery, Win Forms, Azure Web A PI, ASP.NET MVC 4/5, ASP.NET Web API, EXTJs, JavaScript, Angular JS, SharePoint, XSLT, CAST software, Visual Studio 2015/2013, Entity Framework 5.0, Team Foundation Server.

Key Responsibilities:

- Developed and maintained **web applications** using **ASP.NET MVC, C#,** and **JavaScript** frameworks such as **react** and **jQuery**, Used **JQuery** for web interface development with good looking web application.
- Wrote **SQL queries**, designed stored procedures, and worked on database migrations to support new features.
- Collaborated with **UI/UX** designers to ensure responsive and intuitive interfaces for enhanced user engagement.
- Integrated external **APIs** for payment gateways, third-party services, and real-time communication features.

- Conducted code reviews, unit testing, and debugging using **N Unit** and **MS Test**, improving the overall quality of the codebase, Used **JQuery** to call web service and display data in **UI** layer.
- Involved in Design, Development of Web Forms using **ASP.NET, MVC C#, JQuery, XML** and .NET Framework.
- Developed **ADO.NET** Entity Framework to use relational data with a data service by defining a data model that maps to relational data, Developed business logic for **MWM** application.
- Proficient in configuring and monitoring service applications for SharePoint applications.
- Developed Web Forms for User Interfaces using **ASP.NET** with Server Controls.HTML Controls and User Controls, Created controllers in **C#** which has Web **API** methods to accept user inputs and return response in JSON format
- Involved in developing code to convert a **SOAP** response in to a **JSON** object and construct a tree in UI.
- Extensively Used. **ASP.NET** 4.0 controls like Master Page Templates, Menu Controls Grid View Controls and File Upload Controls, Proficient in configuring different authentications for **SharePoint** applications.
- Developed **ASP.NET** Web API services to Return JSON and XML Format Data to Support Mobile Application.
- Used Windows Communication Foundation (**WCF**) for multiple services to interact with the application for the clients.
- Created Console applications and used **ADO.NET** objects such as Data set and Data Adapter, for consistent access to SQL data sources, Involved in **N Unit** testing, integration testing and deployment of the application.
- Utilized **JavaScript/jQuery, ASP .Net** validations with **AJAX** control tool kit to create Client-side validations.
- Experienced with deployments, Maintenance and troubleshooting applications on **Microsoft Azure**.
- Implemented a data access layer architecture using **LINQ** to perform queries and call stored procedures.
- Involved in the Database design wrote stored procedures, database views and **T-SQL** queries for the underlying **SQL Server** Database, Conversion of data-driven Microsoft Access application to **VB .NET** Windows forms application.
- Developed Custom Controls which provides flexibility, reusability better design time experience.
- Developed partial post back validations to manipulate data on web pages using **AJAX**.
- Developed various stored procedures for the data retrieval from the database and generating different types of reports using SQL reporting services (**SSRS**), Created stored procedures for updating and retrieving data from **SQL server 2012**.
- Developed Windows Forms applications using **VB.NET** and **Microsoft Access** 2003 applications using **VBA**.
- Used Visual Source Safe for version control of the source code along with the maintenance of the builds and the relevant documents of the same, Responsible to fix bugs, for maintaining application and production support.
- Responsible for Requirement analysis timely delivery, Client interactions, Resolutions of issues.
- Actively involved in Bug Fixing during the build and deployment process and debugging.
- Responsible to provide system support once the code is migrated to Test, QA or Production environments.

.net Developer | Jul 2021 - Aug 2022 **Accenture (Thyrocare) | Mumbai, India**

Thyrocare Technologies Limited, is a leading Indian multinational chain of diagnostic and preventive care laboratories, specializes in medical diagnostic tests aimed at the early detection and management of various health conditions, I designed complex SQL Server databases with Entity Framework for data modeling, optimized queries, and ensured high performance and security for handling critical business data, using ASP.NET Web Forms and C#.

Environment: ASP .NET C++, C# .NET ADO .NET VB .Net Oracle, SQL Server 2008/2012 Azure R2. CAST software. US, HTML CSS, Bootstrap, Angular js, SOA SOAP, XML web Services SharePoint T-SQL Azure.

Key Responsibilities:

- **ASP.Net .Net. LINQ. AJAX. XML, JavaScript. JQuery JSON, HTML** and **CSS, SQL** 2008/2005, web services and WC F. Designed and implemented State Management using **Ngrx**, Used **AJAX** coding techniques to update parts of a web page, Assisted in the development of internal business applications using **ASP.NET Web Forms** and **C#**.
- Designed and implemented **data models** with **Entity Framework** to handle business logic and data storage.
- Participated in code maintenance, debugging, and optimization for performance enhancements.
- Created **front-end components** using **HTML, CSS, and JavaScript** for better user interactivity.
- Defined an object-oriented business model employing **UML** for business process analysis using Enterprise Architect.
- Developed and Tested Windows Azure applications using **C#.Net. .Net framework 4.5, SQL Azure Data Sync**.
- Involved different phases of Software Development Life Cycle (SDLC) including Designing, Programming, Testing and Documentation, Medisoft Cast Software for electronic medical billing

- Amazon Web Services (**AWS**), agile cloud and Deployment provide recommendation and monitoring the task in infrastructure, product management data, and data conjunction with manager.
- Used Win forms, for User interface to create accordion like visible areas for each comparison area.
- The Windows Azure Platform provides an API built on **REST, HTTP, and XML** that allows a developer to interact with the services provided by Windows Azure. Microsoft also provides a client-side managed class.
- Installed and configured Apps in SharePoint as per business requirement, Worked on front end, and middle and back end tiers of an **ASP.NET MVC** application, wrote **python scripts** to parse **XML** documents and load the data in database.
- Library which encapsulates the functions of interacting with the services. It also integrates with Microsoft Visual Studio, Git and Eclipse, Developed Stored Procedures, Triggers using **PL/SQL** and used accordingly.
- Developed Data access assemblies in C# and isolated data access logic from business layer and front end.
- Worked on the development of the middle tier, developed data access layer using Microsoft Entity Frameworks.
- Developed Web Forms for User Interfaces using **ASP.NET and C#.NET** using Server Controls, **HTML** Controls and User Controls, Integrate .net solutions on **C# projects**, including debugging in **C++**.
- Created and deployed XML Web Services (WCF) using **ASP.NET** and **C#** used them to generate the proxy class files based on the web services and consumed in web application.
- Build windows applications using **C# and C++**, Designed and implemented **RESTful** web services using **WCF** framework.
- Developed and deployed Cosmos Workflows and Processed Views, Stored procedures Packages, **PL/SQL** Programs, Functions. Cursors Reference Cursors, Dynamic **SQL PUSQL** Tables and Package Cursors.

.net Developer | Feb 2020 - Mar 2021 **Shoppers Stop | Mumbai, India**

Shoppers Stop is one of India's leading retail chains, offering a wide range of products, including apparel, accessories, beauty products, home decor, and footwear, I worked extensively with SQL Server to design and maintain databases for various internal systems. Utilized Entity Framework to interact with databases and ensure data integrity and high performance, using C# and ASP.NET in MVC.

Environment: C#, C++, ASP.NET, HTML, VB.Net, Kendo UI, XML, jQuery, CSS, SQL Server 2008/2010, ADO.NET, Visual studio 2010/2012, REST, GIT, JavaScript, WCF, SOAP Web services.

Key Responsibilities:

- Involved in discussing the requirements and analyzing the feasibility of implementation, Involved in creating application layout, Designed user interface and web pages using **CSS, HTML and jQuery**.
- Involved in projects involving **C. C++, Java .NET C#** and SOL-Server, Developed web applications using Spring MVC jQuery, HTML5. Bootstrap for Virtual Info Tech Inc, Written business logic using **C# and ASP.NET in MVC** Architecture.
- Developed, enhanced and maintained multi-tier **ASP.NET** and **ASP** web applications Systems, Implemented multiple contract services and security using the System. Service Model in WCF, Use of Object Oriented concepts analysis and design using visual studio.net, Designed and developed UI for Intranet applications.
- Responsible for Database design and creating of Stored Procedures triggers to perform the Data retrieval from multiple tables in **SQL Server 2005**, Written WCF web services to consume them.
- Used **Mongo DB** for **NOSQL** queries using **.Net Core** to implement **APIs**, Repository and Entity **Framework**.
- Worked on **AJAX** controls for extended functionality and configured **REST** using **Microsoft .NET**.
- Developed web forms and user controls for the web application in **ASP.NET.C#**, Developed and support above applications in **C# and ASP.NET**, Designed, code, benchmark testing, debugging and documentation of programs using **C#, C++, VB**. Web Services and **COM**, Written stored procedures for database to manage the data.
- Developed web pages using **HTML, JavaScript and CSS**, Using and configuring the IIS application server.
- Extensively Implemented validations using built-in validation controls, custom validations controls and with **JavaScript**.
- Developed, deployed and consumed Web Services, Data grid, data list and repeater server controls are used with **ADO.NET** to manipulate the data and generate results based on alert types.
