San Francisco Bay Area | Open to Relocate | (551) 280-6575 | sushmithasneh@gmail.com | [LinkedIn](#)
PROFILE SUMMARY

Senior Data Analyst / Data Scientist with 9 years of experience analyzing large-scale customer and transactional data across technology, financial services, and insurance. Delivered 20+ analytics and predictive solutions, generating \$7M+ in business impact through improved conversion, retention, and operational performance. Expertise in SQL, Python, Tableau, Power BI, predictive modeling, KPI development, and executive reporting.

TECHNICAL SKILLS

Analytics & Visualization: Salesforce CRM Analytics (Einstein Analytics), Tableau, Power BI, Excel, Matplotlib, Seaborn
Programming & Data Handling: SQL, Python (Pandas, NumPy, scikit-learn, PyArrow), PySpark
Machine Learning & Modeling: Supervised & Unsupervised Models, Evaluation, Validation, Deployment & Monitoring
Statistical & Analytical Methods: Hypothesis Testing, A/B Testing, Regression, Chi-Square, Cross-Validation, VIF
Data Engineering & Workflow Automation: ETL Pipelines, Data Quality Frameworks, Workflow Orchestration
Cloud & Tools: AWS (S3, SageMaker, Glue, EC2, ECR), Terraform, CI/CD, Git/GitHub, Agile
Generative AI & AI Tools: LLM application, OpenAI API, LangChain, GitHub Copilot (Visual Studio), Microsoft Copilot

PROFESSIONAL EXPERIENCE

State Farm Insurance | Senior Data Analyst | California, USA **May 2022 – Present**

- Developed **executive and operational dashboards** in **Salesforce CRM Analytics and Tableau** using optimized SQL, delivering predictive and funnel insights that accelerated decision-making by 50% and reduced manual reporting from 8 hours to 30minutes.
- Led **8+ cross-functional analytics initiatives**, advising **50+ stakeholders** across Sales, Marketing, Product, and IT on data informed decisions; delivered \$3.5M in revenue growth and \$800K in annual cost savings.
- Designed, trained, and deployed **20+ production grade predictive models** on AWS, integrating opportunity, marketing and sales data, **engineering 45+ features** and tuning via Grid/Random Search, achieving 82%+ accuracy, 18% conversion lift.
- Conducted **clustering and retention analysis, segmenting 18,447 agent offices** with K-Means and 85 business metrics to identify at-risk offices, guide targeted retention and marketing strategies that prevented office attrition and retention by 12%.
- Performed **full-funnel, cohort, and product performance analysis** across auto, fire, and life insurance product lines — identifying market trends, competitive positioning, and revenue drop-offs improving opportunity conversion by 18%.
- Built and automated scalable ETL data pipelines** using AWS Glue, S3, and Redshift with Python-based quality monitoring and SNS alerts, reducing pipeline failures by **30%** for **200+ daily users** and achieving 99.5%+ data reliability.
- Implemented cross sell propensity** Logistic Regression models in AWS and CRM Analytics, enabling real-time scoring for sales and marketing teams driving **8% conversion lift and 20% churn reduction**.
- Conducted rigorous **model evaluation and validation**, including **ROC-AUC (0.87), precision–recall tradeoff analysis, 5-fold cross validation, and multicollinearity testing (VIF)** in **Python** maintaining 95% production model stability.
- Drove a 40% reduction in pipeline errors by **mentoring junior analysts** on ML workflows, SQL, and AWS tooling, while using **GitHub Copilot** to accelerate script development and reporting with full ownership of validation and outputs.

IBM | Data Analyst | Bangalore, India **Aug 2016 – Feb 2021**

- Established key e-commerce performance metrics** by developing **10+ Power BI dashboards** for 50+ stakeholders, tracking conversion, retention, repeat purchase, and engagement KPIs contributing **15% retention improvement and 30% ROI**.
- Engineered **predictive, forecasting, and segmentation models** on 10M+ customer records to analyze customer acquisition, retention, and portfolio trends, improving churn prediction accuracy to 85%+ and reducing churn by 12%.
- Designed and evaluated 20+ **A/B tests across 500K+ users**, applying quantitative analytical methods, regression, and correlation based methods to measure the impact of digital features and experience changes.
- Built credit risk scoring models** using SQL and Python on 5M+ customer records — analyzing payment behavior, delinquency patterns, and risk indicators to support underwriting and credit decisioning for financial services clients.

PROJECT

AI-Powered Database Analytics Assistant | Python, LangChain, OpenAI, SQL

- Developed an AI-powered database analytics assistant using Python, LangChain, OpenAI, and SQL to convert natural language requests into SQL queries, enabling conversational access to KPIs, trends, and business insights across relational databases.
- Improved the reliability and relevance of AI-generated analytics through schema-aware validation, prompt engineering, and conversational workflows, streamlining ad-hoc analysis and data retrieval.

EDUCATION

Stevens Institute of Technology | **Master of Science in Computer Science** **Feb 2021 – Dec 2022**
Visvesvaraya Technological University | **Bachelor of Engineering in Computer Science** **Aug 2012 – Aug 2016**
