

Full Stack .Net Developer

Venkata Simhadri

+1 603-512-3992

venkatasimhadri92@gmail.com

PROFESSIONAL SUMMARY:

- Overall 5+ years of extensive experience with all phases of Software Development Life Cycle (SDLC), including Analysis, Design, Development and Testing of Client-Server and Web-based n-tier Architecture for windows and web applications with exposure to diverse business domains.
- Strong hands on the Microsoft .Net Framework developing Win Forms, Web Services, Win Services, Web Pages using ASP.Net, VB.Net, Visual Studio VB Script C#.Net, ADO.NET, ASP, JavaScript Query, Angular JS, CSS, Master pages, HTML, DHTML,XML,XSLT, Silverlight, LINQ, Ajax, and SQL Server SSRS.
- Experience with an agile software development methodology and Test-Driven Development including SCRUM Framework).
- Experience with developing GUI using web technologies like HTML, CSS, AngularJS, JQuery, JavaScript, and XML.
- Developed the Single Page Application (SPA) using React JS, Redux for module ensuring SEO Solutions.
- Extensive experience in architecture, design and development of Client-Server and Distributed Web Applications with ASP.NET MVC 3.0, 3-Tire and N-Tire Architecture.
- Experience in SOA (Service Oriented Architecture) using Web Services, WCF Services, WEB-API and Restful Services, Windows Services
- Serving as a hands-on subject matter expert for DevOps and Automation in an Azure/AWS infrastructure environment.
- Involved in coding pages with best Search Engine Optimization (SEO) techniques.
- Use Cases and Design Patterns, Agile Methodologies.
- Expertise in application development using ASP.NET MVC 3.0 Framework.
- Extensively Used LINQ to SQL, LINQ to XML and LINQ to Objects for retrieving the data efficiently and Just in Time manner.
- Implemented & maintained the branching and build/release strategies utilizing GIT.
- Implemented Custom Angular Validators and added them to the NG_VALIDATOR list by configuring multi to true.
- Developed and maintained Web Forms with ASP.Net, ReactJS, IIS 7.0/6.0./5.0 and C#.Net.
- Worked on Grid view using ADO.NET and retrieved data from SQL server using quires.
- Experience in developing applications and services using ASP.NET core
- Developed several SOAP and REST API based internal tools to enhance quality and performance of existing code base and deployed in Cloud Foundry, AWS S3 and Kubernetes.
- Well versed in Architectural and Design concepts, UML Diagrams, Object-Oriented Design Patterns, and Model View Controller (MVC).
- Expertise in developing applications using Microsoft technologies such as .NET Framework, Web applications using ASP.NET, ASP .NET MVC, .NET Core, Win Forms using Microsoft Visual C#.NET, and VB.NET.
- Experience with ASP.NET Web Forms, win forms, Web Services, and State Management, caching features, configuring optimizations and securing the web application
- Experience with AJAX Control Toolkit and XML Http Request object, which is the heart of AJAX in providing asynchronous Post back.
- Designed and Implemented application using ADO.NET objects like Dataset, Data Table and Data Adapter for manipulating, retrieving, storing and displaying data from SQL Server.
- Knowledge of applying Object Oriented Analysis and Design (OOAD) for modeling a system.
- Experience in SQL Server and SSIS package design, constructing, and deployment.
- Building web applications with ASP.NET MVC/Web Forms, JavaScript, J-Query, knockout.js,JSON, HTML, XHTML, CSS
- Worked on cloud computing using Windows Azure and SQL Server Azure.
- Experience in working with SSAS in creating cubes, data source views, named queries, dimensions and deploying of analysis services projects
- Strong experience in design patterns WCSF, WSSF, MVC and MVPC patterns
- Involved to implement various screens for the front end using React JS and used various predefined components from NPM (Node Package Manager) and Redux library.
- Experience with version control tools such as SVN, Visual Source Safe (VSS) and Team Foundation Server (TFS).
- Single Page Application with loading multiple views using route services and adding more user experience to make dynamic by using Angular 6 framework and Node JS.
- Proposed and implemented branching strategy suitable for agile development in GIT.
- Involving in rewriting of JTS Medical module using Angular 6, Node.JS from Classic ASP and VB.Net.

TECHNICAL SKILLS:

.NET Technologies	ASP.NET MVC, ADO.NET, AJAX, Classic ASP, LINQ, WCF, WPF, SILVERLIGHT, Sitecore 7.1/6.5.
Languages	C#.NET, VB.NET, Visual Basic, C, C++, T-SQL, PL/SQL,
Databases	SQL Oracle, MSAccess.
Web Technologies	HTML, DHTML, HTML5, XML, XSLT, XSD, WSDL, XAML, SOAP, CSS, Web forms, Web Services, POWERSHELL, Fiddler.
Scripting Languages	JavaScript, JQuery, Angular, VB Script.
Web Servers	IIS
Web Page Editors	Visual Studio .NET.
Operating Systems	UNIX, Windows.
Reporting Tools	SSRS and Crystal Reports.
Version Control Tools	Team Foundation Server, SVN, GIT, Microsoft Visual SourceSafe, TeamCity, Fluent Migrator.
IDE and Tools	Microsoft Visual Studio. Net 2013/2012/2010/2008/2005, MS Office, Microsoft Visio, SQL Profiler, SQL Server Agent, NUnit, SSIS.
MS Software Packages	MS Office, MS FrontPage, Microsoft Visio, SharePoint 2010, MS Excel.

PROFESSIONAL EXPERIENCE:**myOnsite Healthcare, Sarasota, Florida****Jan 2023 – Present****Sr. Fullstack .Net Developer****Roles & Responsibilities:**

- Worked on Analyzing business requirement and developing new responsive design Web Applications using Agile scrum methodology for Software Development Life Cycle
- Worked on Analyzing business requirement and developing new responsive design Web Applications using Agile scrum.
- Converted the web sites to web applications to make Azure compatible.
- Involved in deploying desktop applications, web applications, websites and console applications to the Confidential Azure Cloud.
- Analyzed the application performance in Azure environment using Dyna Trace.
- Provided high availability for IaaS and PaaS role instances for access from other services in the C#.Net with Azure Internal Load Balancer
- Prepared architecture plan to create the Azure Cloud environment to host
- migrated IaaS and PaaS role instances for refactored applications and databases
- Experience in planning and executing the application migration to a cloud environment based on Windows Azure Pack.
- Developed interactive and user-friendly User Interface (UI) using Bootstrap, HTML5, CSS3, SCSS, SASS, Java Script, Type Script and Angular.
- Expertise in developing various JavaScript frameworks like Angular.js, Backbone.js, Require.js, Node.js, Express.js, Underscore.js, React.js/Redux, Ember.js, Responsive web design. (RWD).
- Angular2/4, ReactJS, AJAX and JSON.
- Worked with Angular routing, Lazy loading and React(JSX) Forms to develop the client side application.
- Experience in develop and deploy using SPA UI technologies Angular4/6/7/8/9/11/12 in Azure Cloud.
- Code Backend API's using C#, .Net Rest API's following SOLID principles.
- Participate in Daily Scrum and grooming calls.
- Lead onsite and Offshore Incident Team conducting daily meetings on Microsoft Teams, Skype, WebEx.
- Deliver proposed User Stories, Bug fixes, Defects fix, resolving issues in timely manner and deliver.
- Involve in design and architecture discussions to provide best practices and feasible design solutions.
- Adhere to high-quality development principles while delivering solutions on-time.
- Be the liaison between the business units, technology teams and support teams.
- Demonstrate solid understanding of the client functional/nonfunctional requirements and implement with good quality coding skills.
- Create impact analysis document to understand the impact on the existing functionality as required.
- Provide inputs to create the low-level design for the module based on the understanding of the requirement and high-level design.
- Review coding standards and best practices to check code quality and Identify unit test case scenarios based on the design.

- Integrate and conduct system integration Tests, Regression Tests and Smoke Tests on local Visual Studio Code, IDE or on development Servers, test Server, UAT Server or
- Production using CI/CD pipeline and code using mocha, chai.
- Create Change request and follow the enterprise deployment process request to build and deploy the code to production Servers in the maintenance window after approval from Manager.
- Use Pivotal cloud foundry (PCF) for Routing, Scaling, binding services, Creating User Provided Services and database, stop, start, or restage APPs or APIs.
- Communicate with ESD DEVOPS Pipeline Team for pipeline issues or while deployment using Bamboo.
- Debug code and use Swagger, Postman when needed.
- Resolve issues that team is facing or escalate and work with ESD Developers or Architects.
- Conduct or involved in risk mitigation and facilitate in QA and UAT sign offs.
- Work on UI test cases. Integration Regression test cases UI and backend smoke tests.
- Facilitate Business sign offs on requirements and Pilot testing of applications before production launch.

Environment: Visual studio.NET, C#.Net, ASP.NET MVC, Angular 7, Typescript, JavaScript, CSS, Node Js, custom UI components, Microsoft SQL Server 2014, MS Word, MS Excel, Unity, Dependency Injection, Unity Framework, Bootstrap v4, jQuery version, external installations for angular, REST.

Borderless Healthcare Group,India

April 2021 – June 2022

Role: Fullstack .Net Developer

Roles & Responsibilities:

- Used ASP.NET MVC Page Controller pattern to add functionality to individual pages such as to accept input from the page request, invoke the requested actions on the controller.
- Used Web API as an ideal platform in building Restful applications on .NET Framework.
- Responsible for designing the ASP.NET application authentication using .NET Framework, Model View Controller MVC and IIS security model.
- Worked on Visual Studio 2015/ .Net CORE 1.0 Framework to implement Business Logic.
- Implemented View Model patterns/ in creating and managing Views, Partial Views, View Models, Web APIs using ASP.NET MVC, Custom Error Pages.
- Developed and support above applications in C#, .NET, ASP.NET Core, Entity Framework Core, Angular 12, CSS, JavaScript, and Visual Studio.
- Expert at .Net web technologies such as C#5, ASP.NET 4.7.1, Web Form Framework, MVC 5.0 and AngularJS.
- Expertise in web development using HTML, DHTML, CSS, JavaScript, XSL, Microservice XSLT, and XML, JavaScript/jQuery, Angular JS, reactJS, node JS, backbone.js, AWS, AJAX, Git, SVN.
- Used Angular 11 Driven forms and Modern Driven (Reactive) forms to perform form validations both on server and client side.
- Worked on different angular components and angular material components to develop and write components, services to consume API from Backend in Angular 8.
- Used multi-threading and multiprocessing to improve the performance.
- Used VBAtool for controlling Excel.
- Proficient with container systems like Docker and container orchestration like EC2 Container Service, Kubernetes, worked with Terraform.
- Managed Docker orchestration and Docker containerization using Kubernetes.
- Used Kubernetes to orchestrate the deployment, scaling and management of Docker Containers.
- Developed ASP.NET Core Web API based on departmental requirements and specifications.
- Worked with advanced concepts of ASP.NET Core MVC such as Models and Providers, Filters used for developing backend technology
- Implemented Entity Framework Code First Approach with Repository Pattern and its implementation over the Business and Presentation layers.
- Implemented Entity Framework Migrations to enforce the frequent changes in conceptual layer changes to database.
- Develop and deliver integration applications using WebSphere Enterprise Service Bus (ESB)
- Designed AWS Cloud Formation templates to ensure successful deployment of Web applications and database templates
- Involved in writing .net API for Amazon Lambda to manage some of the AWS services.
- Written Templates for AWS infrastructure as a code using Terraform to build staging and production environments.
- Involved in requirement gathering, database design, n-Tier Application development (MVC), User Interface, Application Layer, Business Layer, XML Parsing, creating and consuming Web Services, system integration and deployment.
- Actively participated in deployment activities like solving dll issues in Visual Studio.
- Created Angular 7 Controllers, Scope, Model, view, Services, Factory etc., which Isolate scopes perform operations in UI.
- Experienced in React JS and working with React Flux architecture.

- Used JavaScript, Angular 7, Node, Bootstrap, HTML5, CSS3 for frontend development.
- Created and consumed ASP.NET Web services and implemented REST full Web API/WCF services for service layer, created Action filters and Exception filters to implement REST API.
- Enterprise n-tier software agent using Windows Communication Foundation (WCF) web service hosted on IIS.
- Educated developers on how to commit their work and how can they make use of the CI/CD pipelines that are in place.
- Setup full CI/CD pipelines so that each commit a developer makes will go through standard process of software lifecycle and gets tested well enough before it can make it to the production.
- Helped individual teams to set up their repositories in bit bucket and maintain their code and help them setting up jobs which can make use of CI/CD environment.
- Worked with npm commands and using package. Json for managing dependencies and dev-dependencies of NodeJS applications.
- Worked with Passport and JSON web tokens for authentication and authorization security configurations using NodeJS.
- Used React-Autocomplete for creating google maps location search on the webpage Added Excel-Builder to download the Tabular data in Excel format using react.
- Responsible for maintaining versions of source code using Team Foundation Server.
- Fixing Assembly issues and deployment issues in Visual Studio 2012.
- Prepared WCF Service layer to handle client-service interaction. Involved package creation and deployment.
- Created & hosted WCF Services and also used different bindings to make it available to different types of clients.

Environment: .NET Framework 4.0, Visual Studio 2010, ASP.NET 4.0, C#, Application Blocks, AJAX, .Net Core. JavaScript, Angular Js, JQuery, JSON, XML, XSLT, JavaScript, SQL Server 2008, LINQ, T-SQL, TFS, IIS.

HCL America, India

Mar 2019 - April 2021

.Net Developer

Roles & Responsibilities:

- Designed and developed Web Pages using **ASP.NET, C#.NET, HTML**, JavaScript, **AJAX**, jQuery CSS and server controls.
- Developed routing and Lazy loading Single Page Application and Developed View templates using React Forms for Better Perform in Rendering
- Developed secure login interfaces with ASP.NET Server controls.
- Integrated the third-party APIs into the current system
- Wrote the reducers & dispatchers in order to return the new states for the web app(React + Redux)
- Used Validation Controls for corresponding validations required for business logic in Web Forms.
- Designed and developed user interfaces using ASP.NET.
- Containerizing the integration process by gitlab CI within docker
- Coding the presentation layer using WPF and service layer using Windows Communication foundation technology.
- Created the store using CreateStore from React.
- Worked on MySQL, AWS, PowerShell, and Python scripting.
- Used MVC for the designing User interfaces on multiple devices.
- Create Web API Designed and developed Modules using .net core, C#, Web API, and Angular 8 (CLI), Micro Service, Docker, Signal R, Rabbit MQ, SQL/Oracle, AZURE.
- Created Rest full API's using MVC4 Web API's.
- Create Database(s) on SQL AZURE.
- Setting up SQL Azure Firewall
- Used Bootstrap CSS for front end design.
- Written the business logic in classes using VB.NET / C#.Net language and used in WebForms.
- Worked on J-Query/JSON for the retrieval of data.
- Worked with AJAX enabled WCF services using C# and ASP.NET.
- Integrated Gateway O Data/ JSON Services
- Developed test-driven development (TDD) strategy guiding use of the N-Unit unit testing framework.
- Implemented Custom Angular Validators and added them to the NG_VALIDATOR list by configuring multi to true.
- Used ADO.NET objects like SQL Data Access, SQL Data Reader and DB2 SQL.
- Developing reports on SSRS on SQL Server and excellent in SSIS packages for integrating data.
- Developed Server side and Client-side code using ASP.Net, JQuery and JavaScript.
- Designed and developed applications using VB.NET, ASP.NET with ADO.NET, and SQL 2008.

Environment: .NET Framework 4.0, Visual Studio 2010, ASP.NET 4.0, C#, Application Blocks, AJAX, .Net core, JavaScript, Angular Js, JQuery, JSON, XML, XSLT, JavaScript, SQL Server.

Education: Masters in Computer Science from New England College.
