## Top Skills

Microsoft Power Platform

Spring Boot

IBM ACE / Mulesoft

## Certifications

Curso Profesional de Python

Curso de Estructuras de Datos Lineales con Python

Meta Back-End Developer Professional Certificate

Desarrollo Backend con Python y Django

Diseño de Videojuegos

# Virgilio Muñoz

Senior Integration Engineer | Technology Consultant

## Summary

Tech Stack:

- Backend: Microservices | Docker | Kubernetes | CI/CD | Azure DevOps | Linux | IBM Integration Bus "Toolkit / ACE" | MuleSoft | Java | Spring Boot | Python | Django | FastAPI | Elasticsearch (ELK)  
- Messaging and Streaming: Kafka | MQ  
- Microsoft Power Platform: Power Apps | Power Automate | Power BI

As a Technology Consultant, I have contributed to cross-functional teams by designing and implementing high-performance platforms using React.js and Python. Collaborative efforts with DevOps have enabled continuous integration and deployment pipelines, streamlining software delivery. Additionally, I leverage Microsoft Power Platform tools, including Power Apps, Power Automate, and Power BI, to create efficient and insightful business solutions. My commitment extends to crafting banking solutions that positively impact the Dominican Republic's financial landscape.

---

## Experience

Banco BHD León

4 years 3 months

Senior Integration Engineer

December 2021 - Present (2 years 6 months)

- Created microservice and API endpoints focusing on different functionalities.
- Implemented microservice architecture for multiple banking RESTful services using Java Spring Boot Framework, Docker, Kubernetes, Jenkins, Argo CD and SonarQube, improving flexibility, development and deployment speed of new features.
- Developed necessary components using microservices architecture and API Gateway to integrate applications, both internal and external, through API Gateway "CA API Gateway / Layer 7" and IBM

Integration Bus "Toolkit / App Connect Enterprise" with purpose of connecting core systems (AS400) and different digital bank channels.

- Analyzed and modified python microservices to add new features
- Collaborate with Golang microservice for health check functionality.
- PoC Elastic stack
- Migration flow inventory using Model-Driven Power App
- PowerBI Dashboard using records recollectd by a Power Automate flow

### Integration Developer

March 2020 - December 2021 (1 year 10 months)

- Developed scalable solutions for handling many concurrent users.
- Collaborate with other teams to integrate the backend with internal or external providers.
- Debug and fix production bugs.
- Brind support during releases and stress tests.
- Developed RESTful services with SWIFT integrations to process customer international transfers using Java 7 SE, IBM WebSphere and IBM MQ.
- Incident tracker system using Microsoft Power Apps and SharePoint

### versoft

#### Technology Consultant

August 2015 - Present (8 years 10 months)

- Led a cross-functional team in the design and implementation of a scalable job portal and educational platform, both using React.js in frontend, react native for the mobile app and Python for backend services, ensuring high performance and reliability.
- Engineered and maintained a trading platform backend using Python, PostgreSQL, and AWS LightSail.
- Implemented custom WordPress themes and plugins to meet client-specific requirements for at least a dozen sites.
- Participated in the migration of legacy system in .net framework to .net core microservice architecture using c#.
- Collaborated with DevOps teams to implement continuous integration and deployment pipelines, ensuring efficient and reliable software delivery.
- Conducted code reviews and mentored junior developers, fostering a collaborative and innovative development environment.
- Worked closely with stakeholders to gather requirements, provide technical consultation, and deliver solutions aligned with business objectives.
