PROFESSIONAL SUMMARY:

- 5 years of experience in Information Technology, with specializing in Software Quality Assurance Testing.
- Proficient in testing on Web based applications.
- Extensive working experience on all phases of Software Development Life Cycle (SDLC), its methodologies such as Agile and Waterfall Model.
- Well versed with various testing stages/levels/phases, testing types, testing techniques and quality work products.
- Sound knowledge on Object Oriented Programming (OOP) concept.
- Extensively experienced in using Java and Java Script for test case automation.
- Good Knowledge in implementing TDD and BDD (Cucumber).
- Well versed in different management scenarios like Change Control, Quality Assurance, Defect Tracking, System Integration and Task Scheduling.
- Professional expertise in Smoke Testing, Backend Testing, User Acceptance Testing (UAT), Functional Testing, Positive/Negative Testing, System Testing, Regression Testing, E2E Testing ,Cross Browser/ Cross Platform Testing, UI Validation, Web Services.
- Expertise in Defect management, Bug tracking, Bug Reports and generating the Graphs using JIRA.
- Experienced in creating and maintaining defects using HP ALM/Quality Center.
- Expertise in SQL scripts/queries for data verification to compare the expected results with the database.
- Proficient in using test automation tools such as Selenium WebDriver to develop automation testing scripts for web and client server applications.
- Expertise in implementing cross browser and cross platform web testing with Selenium WebDriver.
- Experienced in developing and implementing Data Driven and Hybrid Driven automation testing framework with Selenium WebDriver.
- Expert in Test-Driven Development (TDD) Tools such as TestNG, JUnit.
- Sound knowledge on TestNG/JUnit framework for Unit testing, Maven for Project building tool, Jenkins for Continuous Integration.
- Proficient in using Jenkins as a Continuous Integration server to configure with GitHub and Maven.
- Ability to perform and validate API tests manually using Postman.
- Outstanding communicator with extensive experience in customer service as well as ability to identify, develop and enhance client relationships.

SKILL PROFILE:

Testing Software: Selenium WebDriver, HP ALM/Quality Center, JIRA, Postman

Languages: Java

Test Framework: TestNG, Junit, Page Object Model, Data Driven

Continuous Integration Tools: Jenkins

Database: PostgreSQL, MySQL

Operating Systems: Windows, MacOS, Linux/Unix

MS Tools: MS Project, MS Excel, MS Word, PowerPoint

IDE: IntelliJ IDEA, Eclipse

Build Tool: Maven

Version Control Systems: Git

Cloud Testing Environment: Browser Stack, Sauce Labs

WORK EXPERIENCE:

Under Armour, New york, New york

QA Automation Engineer

(July, 2022 – Present)

Responsibilities:

- Developed and maintained a Selenium-based test automation framework for web and mobile applications using Java and TestNG
- Gathered requirements documents such as business requirements and design document and other related documents.
- Involved in testing the application utilizing the Scrum (Agile) methodology.
- Involved in execution of all types of system testing including: Integration, Regression, User Acceptance and Functional testing.
- Involved in tracking bugs using JIRA and finding the root cause of a defect to fix the problem.
- Identified and reported software defects and test findings using JIRA.
- Reviewed database test cases according to assigned requirements.
- validate reports by retrieving data with complex SQL queries from MySQL database.
- Involved in setting up a continuous integration system using Jenkins and working knowledge with cloud-based code repository systems like GitHub.
- Developed test code in Java language using IntelliJ and TestNG framework.
- Setup the Automation framework using Selenium to run test cases in multiple browsers and platforms.
- Responsible for identifying test cases for manual and Automation with Selenium WebDriver for Smoke Test, Functional and Regression Tests.
- Involved in design and implementation of Selenium WebDriver automation framework for smoke and regression test suites (TestNG and Maven).
- Configured Selenium WebDriver, TestNG, Maven tool and created selenium automation scripts in java using TestNG prior to agile release.
- Used the TestNG framework to run unit tests and Maven to build the Project.
- Involved in designing an automation framework to be used in UI testing with Selenium.
- Involved in validating RESTFUL Web services using Postman.
- Executed browser compatibility and regression tests using Selenium WebDriver for testing UI for every new build release.

Environment: Java, JIRA, Selenium WebDriver, IntelliJ, TestNG, Maven, Postman, GitHub, Jenkins, PowerPoint, MS Project, SQL Server, MS Word, Windows, Java, MS Excel.

Td Bank, Baltimore, MD

QA Engineer

(Nov, 2020 – June, 2022)

Responsibilities:

- Involved in test cases review by development team, product management and modified the test cases based on their feedback.
- Drafted Test Plan which included testing objectives, testing phases, scenarios and test environment after a thorough analysis of the business rules.
- Created manual test cases, reviewed with different stakeholders to validate the functionality.
- Attended the BRI (Business Requirement Identification) meeting to understand the business Requirements.
- Identified, Reported and Tracked Defects using JIRA.
- The entire Java scripting was done using the Selenium framework and conducted backend testing using SQL queries to validate data for the database.
- Developed Automation framework using Selenium Web Driver.
- Performed functional testing to identify various critical points in the application and automated it by using Selenium Web-Driver with TestNG.

- Developed automation framework for Selenium WebDriver in Page Object Framework model.
- Used Selenium WebDriver for writing test scripts for regression test coverage.
- Designed & Developed data driven framework using Selenium WebDriver, TestNG and Apache POI API.
- Developed and Implemented automation using Selenium WebDriver and Java.
- Used Eclipse IDE to develop & debug the code.
- Used Maven to build and run the Selenium automation framework.
- Integrated the test suites to Jenkins to execute them automatically after every successful deployment.
- Performed functional testing of RESTFUL Web Services.
- Worked on the Scripts inventory and maintained the scripts for future Regression.

Environment: GitHub, Selenium WebDriver, Jenkins, IntelliJ, TestNG, Maven, JIRA, CSS, MS Project, MS SQL Server, Web Services, Java, Windows, MS Excel, MS Word.

Comcast, Philadelphia, PA
Software Tester
(Sep, 2019 – Oct, 2020)

Responsibilities:

- Analyzed business requirements, documented business requirements specifications, wrote Test Plans and Test Cases.
- Worked with the development team to understand technical design and architecture for test planning.
- Executed Manual and Automated tests and reports defects by running automated tests; executing manual tests; reviewing results of all tests and reporting anomalies into the defect tracking database; verifying the resolution of all defects for an assigned project.
- Prepared required documentation for testing signoff by various parties as required by the project plans.
- Updated Test Plans and Test Cases periodically to manage changes in requirements.
- Maintained Traceability Matrix to track the requirements to the test cases to ensure complete test coverage in the Quality Center/ALM.
- Connected to database to Query the database using SQL for data verification and validation.
- Performed back end testing on MySQL database by writing SQL queries.
- Designed Automation Testing Framework for web-based applications using Selenium that maintains the workflow as an end-user.
- Responsible for developing automated test cases with Selenium and custom scripting as appropriate to the test case.
- Developed and maintained custom libraries for the common automation framework using JAVA in Selenium.

Environment: Selenium, Agile, MS Word, MS Outlook, MS Excel, SQL Server, Quality Center/ALM, Java, Windows, HTML.

Education:

Bachelor of Computer Science and Info to Cybersecurity, John Jay College of Criminal Justice, 2023
High School Diploma, Long Island City High School, 2019
