

Abuzar Khan Mohammed

Full Stack Developer

abuzarkhanmohammed15@gmail.com | +1 (470) 568 5782 | Atlanta, GA

SUMMARY

Full Stack Developer with around 5 years of experience delivering high-performance web applications by integrating front-end and back-end technologies. Adept in building scalable RESTful services using Java, Spring Boot, Hibernate, and Microservices architecture. Strong background in developing secure server-side logic and data-driven functionalities with relational databases and optimized SQL queries. Experienced in crafting intuitive user interfaces with modern JavaScript frameworks like Angular and React, and skilled in UI development with HTML5, CSS3, TypeScript, and Bootstrap. Familiar with containerization and continuous mixing using Docker, Kubernetes, and Jenkins, ensuring efficient code deployment and system consistency in Agile environments.

SKILLS

Methodology: SDLC, Agile, Waterfall

Languages: Java, Python, SQL, PL/SQL, C, C#, C++

Frameworks: Spring (MVC, Boot, Security), Microservices, Hibernate, JPA, JSF, React.JS, Node.JS, Angular.JS

IDEs: NetBeans, IntelliJ IDEA, Visual Studio Code, Eclipse

J2EE Technologies: Servlets, JSP, JSTL, JavaBeans, JDBC, Java Mail

Web Technologies: HTML, CSS, JavaScript, TypeScript,

Bootstrap, jQuery, Ajax, JSON, XML

Cloud Technologies: AWS (S3, EC2, Elastic Beanstalk, Lambda, DynamoDB, Redshift), Azure, GCP

Application Server: Apache Tomcat, IBM Web Sphere

Databases: MySQL, SQL Server, PostgreSQL, Oracle, MongoDB

Version Control/Other Tools: Git, GitHub, GitLab, Maven, Gradle, Jira, Jenkins, Junit, MS Excel, JMeter

Operating Systems: Windows, Linux, Mac

EXPERIENCE

Kroger

USA

Software Development Engineer

Jun 2024 - Present

- Spearheaded the end-to-end design and deployment of enterprise-grade web solutions using Java, Spring Boot, and RESTful APIs, enabling modular application delivery and simplifying integration with third-party services.
- Architected cloud-ready microservices leveraging container scoring with Docker and Kubernetes, significantly improving scalability and reducing environment-specific bugs by 50%.
- Delivered over 20 performance-optimized front-end modules using Angular and React.js, increasing user engagement by 30% through responsive design and adherence to accessibility standards across web and mobile platforms.
- Constructed data access layers with JPA, Hibernate, and Spring Data, cutting query execution time by 45% and improving transactional accuracy for applications handling over 1,000 concurrent users.
- Mentored junior developers through code reviews and technical sessions, improving overall code quality and fostering team knowledge-sharing.

Hexaware Technologies

India

Java Full Stack Developer

Jan 2020 - Jun 2022

- Commanded the development of full-stack web applications using Java, Spring Boot, and REST APIs, delivering robust, high-performance back-end services aligned with enterprise architecture standards.
- Constructed interactive user interfaces using Angular and React, incorporating dynamic routing, form validation, and state management to deliver seamless user experiences across browsers and devices.
- Refactored monolithic systems into microservice-based architectures, improving code maintainability, fault isolation, and development velocity by over 40%.
- Designed and implemented RESTful APIs and integrated third-party services, reducing development time for cross-functional modules and enabling real-time communication between client and server layers.
- Managed CI/CD processes through Jenkins and GitHub Actions, presenting automated testing and containerized deployments with Docker, which shortened delivery cycles and improved release stability.

Mindtree

India

Full Stack Developer

Aug 2018 - Dec 2019

- Implemented database operations with PostgreSQL and Oracle using JPA and custom queries, ensuring high data integrity and optimized query execution plans.
- Deployed cloud-native applications to AWS, using services like EC2, Lambda, and RDS for auto-scaling, cost efficiency, and secure data storage.
- Developed secure applications with Spring Security and OAuth2, achieving a 98% reduction in unauthorized access incidents and ensuring compliance with data protection regulations.
- Implemented asynchronous communication between services via Kafka, increasing message throughput and enabling real-time data processing across distributed systems.
- Collaborated with QA and DevOps teams to implement automated test coverage and performance monitoring tools, driving a 95% bug-free production deployment rate.
- Participated in sprint planning, code reviews, and architectural discussions, contributing to scalable design decisions and mentoring junior developers on best practices.

EDUCATION

Masters of Science in Computer Science | Campbellsville University, Kentucky

Aug 2024

Bachelors in Engineering | Jayamukhi Institute of Technological Science, Warangal, India

Dec 2020
