

ANILEY SABI

🏠 Seattle, WA 98125 • (206) 468 1380 • anileysabi@gmail.com

Professional Summary

- Results-driven Software Engineer with 5+ years of experience designing, building, and testing scalable cloud-native applications using **Java(Core, EE), C#, ASP.NET Core MVC, and Spring Boot**. Skilled across the full **SDLC**, from architecture and release planning to deployment and maintenance, with proven expertise in building secure, high-performance systems.
- Strong background in relational and non-relational databases (**MS SQL Server, T-SQL, Postgres, MySQL, Cosmos DB**) and cloud platforms (**Azure, AWS, OCI**). Experienced in CI/CD pipelines, containerization, and orchestration using Docker and Azure Kubernetes Service (AKS). Adept in automation testing, **TDD**, and quality assurance with tools such as **JUnit, TestCafe, Playwright, and Microsoft Test**.
- A collaborative and adaptable professional, recognized for problem-solving, mentoring, and cross-functional teamwork in **Agile/Scrum** environments. Committed to delivering secure, reliable, and user-focused solutions that align technology with business goals

Technical Skills

- **Languages:** Java Core, C#, C++, ASP.NET, Java Spring Boot, Node.js, SQL, JQuery, ReactJs, KnockoutJs, JavaScript
- **Web Technologies:** Web Services (REST, SOAP, XML, JSON), API Integration (Google Maps API, SendGrid).
- **Databases:** MS SQL Server, MySQL, Oracle SQL, Postgresql, CosmosDB, T-SQL
- **Tools & Frameworks:** TestCafe, Playwright, JUnit, Microsoft Test, VS, Eclipse, NetBeans, Spring, Spring boot
- **Cloud Services:** Azure Storage, Azure SQL Database, Azure Insights, Azure Service Bus, Kubernetes Services, OCI
- **DevOps & CI/CD:** Docker, Kubernetes (including AKS), Jenkins, Azure DevOps, GitHub.AWS CodePipeline, Jira, Git
- **Logging & Monitoring:** Splunk, Grafana.
- **Messaging and Integration:** Azure Service Bus, RabbitMQ
- **Containerization and Orchestration:** Docker, Kubernetes (Azure Kubernetes Service, AKS)
- **Operating Systems:** Windows, Linux, macOS, Android.
- **Development Methodologies:** Scrum/Agile/Kanban, Test-Driven Development, Behavior-Driven Development (BDD).

Professional Experience

Software Developer / Oracle Health - Oracle , Seattle,WA 04/2023 - Present

Resolved production issues by developing Java and Spring Boot-based microservices, writing optimized SQL queries, and supporting JavaScript/React applications to ensure secure and efficient healthcare management systems..

- Designed, developed, and maintained full-stack enterprise healthcare applications using Java, Spring Boot, Spring MVC, RESTful APIs, React, HTML, and JavaScript.
- Built and optimized SQL queries, joins, and stored procedures to support high-volume, mission-critical healthcare data with strong data integrity and performance.
- Deployed and supported cloud-native Spring Boot applications on Microsoft Azure, leveraging Azure Kubernetes Service (AKS) for container orchestration, scalability, and high availability.
- Implemented secure configuration management and secrets handling using Azure Key Vault, ensuring compliance with healthcare security and regulatory standards.
- Collaborated with cross-functional teams (product, QA, DevOps, and stakeholders) to gather requirements, deliver enhancements, and improve system functionality across the application stack.
- Troubleshoot and resolved complex production issues by analyzing Spring Boot services, infrastructure, and database layers, minimizing downtime and operational risk.
- Actively participated in CI/CD pipelines, code reviews, unit/integration testing, and automated deployments to ensure scalable, maintainable, and high-quality software solutions.

Software Design Engineer / Izzy Software Solutions , Seattle, WA 02/2022 - 04/2023

Developed a robust and user-friendly web application for booking limo services, leveraging modern technologies and cloud services:

- Designed and implemented a relational database using SQL Server with optimized tables, views, and stored procedures for efficient data handling.
- Built responsive and dynamic user interfaces using ASP.NET MVC and Knockout.js for seamless two-way data binding and validation.
- Developed modern, component-driven front-end features using React (Hooks, functional components) to deliver fast, intuitive user experiences aligned with industry best practices.
- Utilized Google Maps API to calculate distances and optimize routing for bookings.
- Deployed the application to Microsoft Azure, utilizing Azure Blob Storage for image and document storage.
- Integrated SendGrid to send booking confirmation emails with custom HTML templates.
- Configured the domain using GoDaddy to ensure a professional and accessible web presence.
- Implemented unit testing and automated CI/CD pipelines in Azure DevOps, ensuring efficient, repeatable & secure deployments.
- Developed an Azure Service Bus messaging system to decouple services, ensuring scalability, low latency, and real-time updates.
- Designed and built scalable backend services in C#/.NET, integrating internal systems with external APIs and deploying cloud-native microservices across Azure using Docker-based workflows.
- Containerized a .NET Web application using Docker and deployed it to Azure Kubernetes Service (AKS), leveraging Kubernetes YAML for high availability, auto-scaling, and streamlined resource management.

Software Engineer / Tata Consultancy Services / GEICO , Seattle, WA 12/2020 - 02/2022

Developed automation testing scripts using TestCafe and Gherkin for Geico's Claim Department, enhancing test coverage, optimizing performance, and ensuring high-quality software delivery.

- Developed and executed automated test cases using TestCafe and Gherkin, significantly improving test coverage, reducing manual testing effort, and streamlining quality assurance processes to meet industry standards.
- Wrote and optimized C# code to enhance search algorithms, enabling faster data retrieval and improving database query performance for efficient system operations.
- Increased application performance by 30% through optimization of database queries and code efficiency strategies.
- Collaborated with cross-functional teams to identify and resolve performance bottlenecks, implemented software optimizations, and maintained smooth operations with minimal disruption to claims processes.
- Managed source control and continuous integration workflows using Azure DevOps, ensuring seamless collaboration and efficient deployment pipelines for software development.
- Contributed to code reviews, adhered to best practices, resolved software issues, and maintained high code quality to support reliable and secure claims operations.
- Designed and executed TDD-based automated test suites with TestCafe, Gherkin, and Microsoft Test.

Software Engineer Intern / Amazon / Arlington, VA 06/2020-10/2020

- Designed and documented data quality monitoring specifications using an internal Amazon wiki page to enhance data integrity and validation processes.
- Developed and implemented Java Spark solutions on AWS RDS (SQL Server) to detect and validate customer event data, ensuring data accuracy and reliability.
- Utilized AWS S3 for scalable storage and efficient data processing in Spark-based validation workflows.
- Collaborated with team members to learn and apply best practices in software design, contributing to improved development workflows.
- Partnered with developers to identify and resolve software bugs while gaining hands-on experience with AWS CodePipeline and AWS CodeBuild to streamline CI/CD deployment processes.

Education & Certifications

- **B.S. in Computer Science and Software Engineering**, University of Washington, Seattle, WA (2021)
- **A.S. in Computer Science**, Seattle Central College, Seattle, WA (2019)
- **Certifications:**
 - AZ-900: Azure Fundamentals
 - Data Analyst (2018), Database Fundamentals (2017), MTA Microsoft (T-SQL).
