Soft Skills: Time management, Leadership, Problem-solving, Negotiation, Decision-Making, Documentation and Presentation, Verbal communication

Operating System: Windows, Linux

EDUCATION

Master of Science in Management Information Systems

Jan 2023 – May 2024

Robert Morris University (RMU), Moon Township, PA

Bachelors in Chemical Engineering

June 2010 – May 2014

Gujarat Technological University (GTU)

EXPERIENCE

THE PNC FINANCIAL SERVICES GROUP, PA | Oct 2023 - Current | Business Analyst

- Successfully led cross-functional Agile teams, promoting collaboration, adaptability, and continuous improvement, resulting in a 20% increase in project efficiency.
- Managing complex project timelines using MS Project, ensuring timely deliverables and project milestones were met with a 15% increase in overall project efficiency.
- Analyzed financial data using SQL to identify trends and anomalies, facilitating more accurate forecasting and budgeting.
- Developing interactive data visualizations and dashboards using Tableau, providing real-time insights to the executive team, and contributing to quicker and more informed decision-making.
- Effectively communicating project updates, findings, and recommendations to stakeholders through verbal communication and written reports.
- Utilize GAP analysis results to create actionable recommendations for process enhancements, contributing to a 15% improvement in overall operational efficiency.
- Implementing customizing Jira dashboards and reports to provide real-time insights into project progress, facilitating data-driven decision-making.

Mindtree, India | May 2018 - April 2022 | Business Analyst

- Successfully led Waterfall methodology-based projects, utilizing structured phases to ensure effective planning, execution, and delivery.
- Authored comprehensive documentation, including Functional Requirements Documents (FRD), Business Requirements Documents (BRD), and System Requirements Specifications (SRS) to define project scope and objectives clearly.
- Utilized MS Excel for data analysis, creating pivot tables, charts, and graphs to present critical insights and enhance decision-making processes.
- Wrote complex SQL queries for data extraction and analysis from enterprise data warehouses, aiding strategic planning.
- Applied data visualization tools like Tableau and Power BI to create interactive dashboards, fostering a deeper understanding of complex business data.
- Executed impact, gap, risk, and SWOT analyses to assess project requirements, potential challenges, and overall feasibility.
- Facilitated Joint Application Development (JAD) sessions, gathering requirements from stakeholders and ensuring alignment with project goals.
- Performed critical business analysis in operations and revenue cycle management, made recommendations to management, and secured project approval.
- Led cross-functional teams in the delivery of critical business projects, ensuring on-time and within-budget completion.
- Provided leadership in problem-solving activities, addressing challenges promptly to ensure project progress and successful outcomes.
