Summary

Detail-oriented Data Analyst with over 7 years of experience transforming data into insights that improve business outcomes and support strategic decisions. Skilled in SQL, Tableau, Excel and building automated dashboards, reports, and performance tracking tools for product, operations, and customer behavior.

Background in product and operational analytics, applying data insights to optimize performance, improve reporting, and support stakeholder planning.

Relevant Experience

Data Analyst | Product & Operations Analytics

HighPass OU (Remote)

Jan 2017 - Present

- Developed Tableau dashboards and SQL reports for tracking product usage, customer behavior, and partner KPIs.
- Automated reporting workflows, reducing manual work by 60% and improving decision-making speed.
- Provided insights to product, marketing, and operations teams, supporting roadmap decisions and revenue growth.
- Integrated 50+ external data sources through APIs and standardized data pipelines for consistent analytics delivery.
- Collaborated with cross-functional stakeholders to align reporting with business needs and growth goals.

Data Analyst | Airport Operations & Development

Kharkiv Airport (Ukraine)

Jul 2010 - Aug 2023

- Built dashboards and reporting tools using SQL and Tableau to monitor passenger flow, service performance, and financial KPIs.
- Supported strategic planning by developing forecasting models and executive reports for stakeholders.
- Created visualizations to optimize staffing and scheduling based on trend analysis.
- Conducted analysis of passenger traffic, operations, and revenue streams to guide development initiatives.
- Led data initiatives that improved operational throughput and reduced wait times.
- Contributed to data planning for EURO 2012 and the Winter Olympics, enabling real-time tracking during peak events.
- Provided data support and performance insights for operational technology used in two terminal development projects.

Key Achievements

- Automated reporting processes, saving 60% manual time and increasing visibility into business metrics.
- Developed forecasting tools, improving resource planning accuracy by 30%.
- Created multi-source dashboards for product, customer, and operations data.
- Enabled 2x revenue growth through targeted performance insights.
