

ANUSHKA SHAH

(930)-233-0266 • sh.anushka42@gmail.com • [LinkedIn](#) • West Lafayette, IN

PROFESSIONAL SUMMARY

Data engineering and analytics specialist with 2+ years of experience transforming raw data into trusted analytics layers and AI-ready datasets. Strong in Python, SQL, Excel, Databricks, PowerBI, Tableau, and R, with experience supporting ML-driven insights and decision-making through robust data models and governance practices.

WORK EXPERIENCE

- **Data Analyst - Product Analytics** | *Purdue University - Human Factor Lab* May '25 - Present
 - Drove product strategy by implementing regression and A/B testing models to evaluate consumer behavior.
 - Streamlined data analysis workflows for consumer behavior studies, accelerating insight generation by 23%.
 - Integrated LLM APIs (Claude, GPT-4) to automate qualitative feedback analysis from 4+ consumer studies.
- **Data Scientist** | *The Dunn Lab* Sept '24 - April '25
 - Developed predictive survival models (Cox, Kaplan-Meier) on 10k+ longitudinal health records to assess maternal stress impact on dental outcomes, providing key insights for preventative care strategies in life sciences.
 - Deployed AI agents to automate literature review, reducing manual research time by 40%.
 - Engineered a scalable data pipeline using PostgreSQL to integrate disparate sources for advanced modeling.
- **Statistical Consultant** | *Purdue Stat Consulting* Aug '23 - May '24
 - Collaborated with cross-functional teams on 10+ data science projects to deliver actionable AI insights.
 - Built LangChain transformation workflows to standardize client datasets, reducing processing time by 28%.
 - Designed a Power BI dashboard for a life science client to visualize complex experimental research data.
- **Data Science Consultant** | *The Data Mine* Jan '23 - May '23
 - Directed 5+ corporate data science projects, deploying machine learning models including NLP and neural networks to solve complex business challenges and enhance model evaluation metrics for production systems.
 - Translated complex model outputs into clear data visualizations to guide effective data storytelling.
- **Data Scientist** | *CodeCaste Pvt Ltd* May '19 - May '21
 - Executed A/B tests on user engagement data, which identified key trends that boosted retention by 27%.
 - Drove a 13% lift in monthly active users by improving sales strategies via multi-team collaboration.
 - Automated data transformation pipelines with SQL, which reduced manual processing time by 42% for the team.

EDUCATION

- **Purdue University, West Lafayette, IN** | *MS in Statistics and Computer Science* 2024
 - GPA: 3.65/4.0
- **Pandit Deendayal Energy University, India** | *BS (Honors) in Mathematics* 2022
 - GPA: 4.0/4.0 (Gold Medalist)

TECHNICAL SKILLS

- **Languages:** Python (NumPy, Pandas, Polars, PyTorch), R (R Shiny, ggplot2, dplyr), SQL, SAS, C++
- **Software and Tools:** AWS (S3, Glue, Athena), Azure, PostgreSQL, Power BI, Tableau, JIRA, LaTeX, SPSS
- **Data Engineering & Analytics:** Scalable Data Pipelines, Data principles, Data Governance, ER Diagrams
- **Relevant Coursework :** AI and Deep Learning, LLM, Statistical Machine Learning, Data Mining, Algorithms, Database Management

RELATED PROJECTS

- **Sales Metrics Integrity Fix for Shipment-Sales Analytics** | *Databricks, SQL*
 - Debugged Databricks metrics view causing up to 6x sales overcount by identifying join fan-out from multiple shipment records and gaps from incomplete base table coverage.
 - Fixed via CTE pre-aggregation and a UNION-based spine table, reducing a 500% units sold discrepancy to an exact match with source data and restoring trust in inventory and demand analytics.
- **AI-Powered Patient Group Discovery** | *BioBERT, Scikit-learn, Python, LLM*
 - Deployed a BioBERT model to process 20k+ clinical notes, translating unstructured text into rich patient profiles to enable discovery of novel patient cohorts and accelerate pipeline research for new treatments.
 - Utilized Gemini and Llama models for auto-generating descriptive names for 6 patient segments.
- **Superstore Data Analysis with AWS** | *AWS (Glue, Athena), Python, SQL*
 - Built a scalable data pipeline on a public cloud (AWS Glue, Athena) to accelerate insight generation.
 - Developed an XGBoost model to optimize discount strategies for sales effectiveness, achieving 96% R^2 .
- **Customer Churn Prediction Model** | *R, Machine Learning*
 - Developed a logistic regression model to predict customer churn for a telecom company with 80% accuracy.
 - Leveraged customer demographics and service usage patterns to enhance prediction performance.
