Detail-oriented Research Assistant with experience in clerical and laboratory work to advance research goals. Skilled in data review, reporting, and specimen handling. Specializes in Neuroscience, dedicated to providing accurate and reliable support in data management and research endeavors.

Work History

Undergraduate Research Assistant

*The Fralin Life Sciences Institute at
Virginia Tech, Roanoke, United States*

May 2022 - April 2024

Worked in the Center for Transformative Research on Health Behaviors. Assisted in data collection and participant management for a metabolic research study. Conducted metabolic measurements using indirect calorimetry methods, including metabolic cart and whole-room calorimeter assessments. Facilitated participant screening, consent, and adherence to study protocols. Managed data entry and ensured compliance with research protocols and ethical guidelines.

Undergraduate Teaching Assistant

*School of Neuroscience at Virginia Tech,
Blacksburg, United States*

January 2023 - December 2023

Assisted in leading discussions, grading assignments, and providing academic support to students. Facilitated understanding of complex neuroscience concepts through tutoring and review sessions. Worked with the professor to help design and refine course materials to enhance student learning.

Research Assistant

VCU Health, Richmond, United States

June 2018 - August 2019

- Intern at the Pauley Heart Center participating in an investigation regarding Doxorubicin-induced cardiotoxicity
