Education

Northeastern University

Dec 2024

Masters of Science in Computer Science

CGPA: 4.0 / 4.0

Concurrent Roles: Graduate Teaching Assistant (Algorithms), Career Peer Advisor, Graduate Peer Tutor, Office Assistant

Kumaraguru College of Technology

May 2021

Bachelor of Engineering in Computer Science

CGPA: 9.62 / 10

Skills

Languages	Python, SQL, Java, C, SAS, MATLAB, R
Data Management	AWS, Azure, GCP, PySpark, MongoDB, Redshift, CosmosDB, Snowflake, Databricks
Data Analytics Tools	Spark, Hive, ETL, ELT, Data Warehousing, Data Lake, Data Marts, PowerBI, Tableau
Technical Skills	Data Orchestration, DBMS, TDD, Git, Jenkins, Machine Learning, Web/App Development, Data Ingestion (unstructured, semi-structured, structured), Jira, CI/CD, Terraform, CloudFormation
Certifications	AWS Academy Cloud Architecting, Prompt Engineering with AI, Machine Learning, Generative AI

Experience

Vantage Risk, Boston, MA

Jan. 2024 – Aug. 2024

Data Engineering Co-op

- Developed a Data Integration application to retrieve and model data from **Cosmos DB, Postgres, and Snowflake**, resulting in a **25%** efficiency gain and data-driven policy writing for company's core business line.
- Designed and developed a **Snowflake ETL** pipeline using Tasks and Stored Procedures to automate ingestion of S&P data and generate Yellow Book competitor reports, reducing processing time from 2 weeks to 3 minutes.
- Leveraged **Azure Function Apps and Queues** to facilitate horizontal scaling and streamlined processing of big data datasets, resulting in a 40% increase in processing speed and improved data handling.

Tiger Analytics (Merck USA Consultant), India

Jul. 2022 – Dec. 2022

Senior Data Engineer

- Developed and deployed an automated, scalable pipeline for brand-agnostic data consumption across vendors, reducing processing time from **2 weeks to 1 hour** using **AWS(S3, Glue, Step Function, Redshift, CFT, Terraform)**.
- Configured **AWS Deequ and SNS** to monitor data quality and reduce manual effort, improving data reliability.
- Spearheaded the automation of ETL processes for clinical trials data in **Redshift**, achieving an **80%** reduction in time.

Data Engineer

Jun. 2021 – Jun. 2022

- Implemented a **Promotional Activity Data Hub (MMX)**, automating 31 data sources for Healthcare data, reducing data preparation time to under **12 hours across 20 products**.
- Designed an end-to-end solution for **digital engagement data (Omnichannel)**, optimizing budgets and identifying the best promotion mix for profit maximization; built **Power BI dashboards**.

Data Engineer Intern

Jan. 2021 – Jun. 2021

- Analyzed a public dataset of 1.2 million records leveraging **PySpark and Databricks** to uncover recursive patterns.
- Projected growths for the next 5 years and created **Tableau dashboards, D3 Visualization** on Observable.

Projects

Drug Side Effect Prediction | Python, AI, Streamlit | 🌐🌐

Dec. 2024

- Enhanced drug safety by engineering a **machine learning model** that accurately predicts adverse drug reactions, achieving an **82%** accuracy rate & assists healthcare professionals and consumers in selecting safer drug combinations.
- Engineered a **data pipeline** to automate **ETL** of **SIDER** data, enhancing data handling efficiency for rapid prediction.

Recognizing Faces in the Wild | Python, Tensorflow, Deep learning, OpenCV

Jun. 2020

- Architected and fine-tuned **deep learning model** in **TensorFlow**, achieving a 75% accuracy by leveraging utilizing **feature vector encoding** and **OpenCV** to counter challenges from variable lighting and expressions.
- Implemented a multi-stage facial detection pipeline using **MTCNN and FaceNet**, enhancing recognition accuracy.

Crime Reporting App | Android Studio, Python, Google Maps API | 🌐🌐

Jun. 2020

- Engineered and implemented a Crime Reporting Android application using **Android Studio and Python**, integrating Google Maps API for precise crime location tracking, resulting in an **80%** reduction in crime reporting time.
- Designed and developed a stable **Firebase backend** with a user-friendly interface that streamlined reporting and improved coordination, resulting in quicker response times and more efficient data handling for crime reports.

Achievements, Leadership & Affiliations

Awards: Alfond Scholarship Award (Masters), Best Innovator Award (Forge), Student Enterprise Ideathon (KCT), President (DA-CSE, LC), Gold Medalist (Bachelors), Academic Merit Scholarship Holder (Bachelors)

Leadership: Department Association President(KCT), Leadership Council(LC)

Affiliations: CodePath (Technical Member), Graduate Student Government (NEU)
