

Asa Deepthi Paruchuri

Data Analyst

[LinkedIn](#) | +1 215-948-5669 | deepthi.p@protectmymails.com

Professional Summary

Detail-oriented Data Analyst with 5 years of experience in data extraction, preprocessing, statistical modeling, and visualization. Skilled in using SQL, Python, Tableau, and Power BI to drive business decisions. Proficient in cloud platforms like AWS and Azure, with a strong foundation in machine learning techniques, ETL processes, and cross-functional communication. Proven ability to automate workflows, improve forecast accuracy, and deliver data-driven insights in high-impact enterprise environments.

Core Competencies

- Languages: Python, SQL
- Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, Keras
- Databases: MS SQL Server, Oracle, MySQL, MongoDB, NoSQL
- Data Visualization: Power BI, Tableau, MS Excel
- Cloud Platforms: AWS (EC2, S3, RDS, CloudWatch), Azure (Data Factory, Synapse, Data Lake, Blob Storage)
- Tools & Frameworks: Azure Databricks, Alteryx, PySpark, VBA, Django
- Methodologies: Agile, SDLC, Kanban, Waterfall
- AI/ML: Forecasting, Classification Models, A/B Testing, Generative AI, LLMs, NLP

Professional Experience

Citigroup | Data Analyst

Delaware | Aug 2023 – Present

- Developed a volume forecasting model in Python, improving forecast accuracy by 22%.
- Processed 9M+ records daily from Azure SQL using advanced SQL queries to analyze customer interaction trends.
- Used Azure Databricks and PySpark to process 5TB+ of support data, reducing latency by 40%.
- Automated Excel-based tasks using VBA, saving 10+ hours/week.
- Built KPI dashboards in Power BI to monitor forecast accuracy, bias, and MAPE.
- Managed historical datasets with Azure Data Lake & Synapse, reducing query time by 60%.
- Integrated Alteryx for automated merging of data across policy, claims, and CRM systems.

Accenture | Data Analyst

India | Jul 2019 – Jul 2022

- Built churn prediction models (Random Forest, SVM) with 81% accuracy and integrated into Django app.
- Cleaned and structured 1M+ records to improve reporting accuracy by 30%.
- Designed ETL pipelines in Python and SQL, reducing manual handling time by 40%.
- Used AWS EC2/RDS and SNS to deploy real-time analytics and alerts.
- Built Tableau dashboards for churn risk visualization, contributing to an 18% churn reduction.
- Improved query runtime by 45% through SQL tuning and indexing.

Education

Master of Science in Information Systems Technologies – Information Assurance

Wilmington University, Delaware

Bachelor of Technology in Computer Science

Jawaharlal Nehru Technological University, Kakinada, India
