

Asish Gamini *Software Engineer*

✉ gamini.asish23@gmail.com 📞 +1 (484)-702-1315 📍 Santa Clara, CA 🔗 LinkedIn

Profile

Accomplished Software Engineer with 4+ years of experience in developing scalable applications, designing RESTful & GraphQL APIs, and deploying cloud-native solutions using AWS, Azure and Kubernetes. Proficient in Python, Java, and GoLang, with expertise in optimizing data workflows using Apache Kafka . Skilled in automating infrastructure, streamlining CI/CD pipelines, and leveraging AI/LLMs with LangChain and OpenAI to drive innovative solutions in Agile environments.

Skills

Programming Languages & Frameworks: Python, JavaScript, TypeScript, C#, GoLang, Web API, Angular, React.js, Redux, Django, Flask

Cloud Platforms & Tools: AWS, Azure, GCP, Pivotal Cloud Foundry (PCF), Docker, Kubernetes

Databases: Microsoft SQL Server, MySQL, Oracle, MongoDB, Azure SQL DB

DevOps & CI/CD: Jenkins, Azure DevOps (Boards, Repos, Pipelines), Atlassian Bamboo, Terraform, Ansible, Cloud Deployment Manager

Event-Driven Architecture & Messaging: RabbitMQ, Apache Kafka, Microsoft Message Queuing (MSMQ)

Data Engineering & ETL: ETL Pipelines, Azure Data Factory, AWS Glue, Google Dataflow

Other Tools & Technologies: Git, RESTful APIs, Microservices, Serverless Architecture, Data Visualization, , Web Configuration

Professional Experience

Citigroup, Sr. Software Engineer Nov 2023 – Present | USA

- Designed a Python-based data pipeline using FastAPI and Apache Kafka, improving real-time data ingestion efficiency and reducing ETL latency, processing over 1 million records daily for Citi’s global operations.
- Developed AI-driven automation with LangChain and OpenAI, streamlining document processing workflows, reducing manual effort, and enhancing compliance validation for 100,000+ financial transactions each month.
- Orchestrated Kubernetes and Docker for containerized Python microservices, improving system scalability, reducing downtime, and efficiently managing 30+ microservices across AWS and Azure environments.
- Automated cloud infrastructure provisioning with Terraform and AWS CloudFormation, reducing deployment time and lowering operational costs by \$150,000 annually for enterprise-grade financial platforms.
- Implemented DAST and SAST security scans in CI/CD pipelines, strengthening vulnerability detection and ensuring compliance with 10+ regulatory audits annually for Citi’s Mobile and Desktop platforms.

PWC, Software Development Engineer Aug 2021 – Aug 2023 | Hyderabad, India

- Developed and optimized Python-based RESTful APIs using FastAPI and JWT authentication, improving response times and ensuring secure data exchange for high-traffic telehealth operations with over 500,000 monthly users.
- Built 10+ reusable Python modules with Pandas, NumPy, and Pydantic, streamlining data validation, processing, and API integrations, enhancing efficiency across multiple healthcare applications.
- Deployed serverless Python microservices using AWS Lambda and Azure Functions, supporting thousands of concurrent user sessions while reducing infrastructure costs and operational overhead.
- Implemented Pytest and Hypothesis for unit testing, increasing test coverage, detecting edge-case failures early, and ensuring compliance with healthcare industry standards.
- Automated CI/CD pipelines with GitHub Actions and Azure DevOps, integrating security scans and code quality checks to accelerate deployment cycles and maintain production-ready Python applications.

DXC Technologies, Software Development Analyst Jan 2020 – Aug 2020 | India

- Developed scalable microservices using Django, Flask, and FastAPI, containerized with Docker, and orchestrated via Kubernetes on Azure Kubernetes Service (AKS), ensuring seamless deployment and high availability.
- Implemented real-time data streaming pipelines using Apache Kafka, Python, and Azure Event Hubs, enabling low-latency processing and live analytics on Power BI dashboards via Azure Synapse Analytics.
- Automated cloud infrastructure provisioning with Terraform and Azure Resource Manager (ARM) templates, optimizing Kubernetes cluster deployments and reducing manual effort for scalable workloads.
- Integrated CI/CD pipelines with GitHub Actions and Azure DevOps, automating Docker builds, Kubernetes deployments, and security scans to enhance deployment speed and maintain application integrity.

Education

University of Delaware, Masters of Science in Cybersecurity Sep 2022 – Feb 2024 | Newark, DE

GITAM University, B. Tech in Electronics and Communication Engineering Jun 2016 – May 2020 | India

Projects

Research Projects, University of Delaware Newark, DE

- Developed RAG (Retrieval-Augmented Generation) & LLM AI program that greatly improved the ability to Retrieve information from spontaneously trained documents accurately. Attaining 10x faster vector processing

Certificates

- Advanced SQL Developer
- Pentest+ (Awaiting)
- Salesforce Cloud Platform Developer
