

BANDER HUSSEIN

Irvine, California 92614 | (850) 221-4385 | Bshussein@gmail.com | www.linkedin.com/in/bander-hu | <https://github.com/bshussein>

EDUCATION

UNIVERSITY OF CALIFORNIA, IRVINE, Irvine, California

Master of Computer Science, Expected December 2025, GPA 3.95/4.00

GEORGE MASON UNIVERSITY, Fairfax, Virginia

B.S., Community Health (Clinical Science Concentration), 2018-2022, GPA: 3.89/4.00

TECHNICAL SKILLS

Data Analysis: SQL (MySQL, PostgreSQL), Excel (PivotTables, XLOOKUP, cleaning), Descriptive Statistics

Visualization: Tableau (interactive dashboards), Excel Charts

Programming: Python (Pandas basics), JavaScript, Java

Tools: Git/GitHub, Jira, Postman, VS Code, IntelliJ

Practices: Data validation, documentation, Agile/Scrum

EXPERIENCE

UCI SCHOOL OF NURSING, Irvine, California

Software Engineer & Project Lead (Happy Hearts for Two), Project Team, 6/2025 – 12/2025

- Built dashboard and analytics components used by clinicians to monitor behavior, engagement, and survey data
- Cleaned and validated API data to improve accuracy of visualizations and reporting.
- Identified issues through log analysis and improved clarity of displayed metrics.
- Collaborated with product owners, UX teammates, backend engineers, and mobile developers in weekly Agile sprints.

CARAHSOFT, TECHNOLOGY CORP., Reston, Virginia

Market Research Analyst & Sales Operations Analyst, Research Team, 4/2024 – 9/2024

- Created Excel reports using PivotTables, charts, and lookups to summarize government spending and renewal cycles.
- Cleaned and validated CRM and CSV exports to ensure accuracy for analysis and reporting.
- Provided data-driven insights to account managers to guide proposals and customer outreach.

SOFTWARE & DATA PROJECTS

SQL & Python Data Portfolio • Data Analyst • SQL & Python

GitHub: <https://github.com/bshussein/sql-portfolio>

- Built a complete SQL portfolio with end-to-end projects covering data modeling, schema design, analytics queries, and a Python-based MySQL mini-application.
- Designed relational schemas (EER models), forward-engineered databases in MySQL, and wrote optimized SQL using joins, grouping, subqueries, and window functions.
- Developed a **Student Course Scheduler** using Python + SQL, including database creation scripts, CRUD operations, enrollment logic, and a CLI interface with persistent storage.
- Added multi-table analysis projects (e-commerce, housing, movies) demonstrating real-world analytical thinking, metrics creation, data cleaning, and SQL best practices.

Tableau Dashboards • Data Visualization • Tableau & Storytelling

Tableau Public: <https://public.tableau.com/app/profile/bander.husseini/vizzes>

- **Executive Sales Overview:** Visualized profitability, regional performance, and monthly trends using KPIs, maps, and interactive filters.
- **World Happiness Analysis:** Used scatterplots, correlations, and calculated fields to explore global well-being factors.
- **Product & Order Analytics:** Built drill-down dashboards revealing top products, customer segments, and revenue patterns.
