EDUCATION & CERTIFICATIONS

Syracuse University, Martin J. Whitman School of Management, Syracuse, NY

Aug 2023 - May 2025

Master of Science, Business Analytics (GPA – 4.00)

- **Relevant Coursework:** Business Analytics, Data Analysis & Decision Making, Introduction to Data Science, Machine Learning for Business, Financial Analytics, Data Admin Concepts and Db Mgmt, Applied Machine Learning, Scripting for Data Analysis, Visual Analytic Dashboards

SKILLS & TOOLS

Technical Tools: SQL, Python, R, Azure Data Studio, MongoDB, AWS(Lambda, EC2, S3), SAP, IAM, Snowflake

Marketing Skills: SEO, Technical SEO, SEM, CRO, Social Media Marketing, Analytics, Intent Based Planning

Analytical Tools: Google Analytics, Adobe Analytics, Search Trends, Keyword Planner, Google Search Console, Excel, Access, Google AdWords

Visualization Tools: Tableau, Power BI, Google Looker Studio, PowerPoint

Certifications: Google Data Analytics, MS Office: Excel Associate, Excel Expert, Google Ads, Google Analytics, Financial Markets

PROFESSIONAL EXPERIENCE

Alexion Pharmaceuticals, AstraZeneca Rare Disease

Data Analyst Intern – Digital Experience

Jun 2024 – Aug 2024

- Designed and implemented a centralized reporting dashboard using Power BI, consolidating web analytics data from Google Analytics and Adobe Analytics, saving 72+ working hours monthly by automating data collection and reporting processes
- Processed and transformed 10M+ rows of data using DAX, applying advanced calculations, data modeling, and performance optimization techniques to clean, merge, and unify datasets across 180 reports for business insights. Developed interactive dashboards that analyzed key metrics such as website performance, user engagement, and traffic segmentation
- Collaborated with a team of 4 interns to brainstorm and develop innovative solutions to seed an accelerator project aimed at enhancing internal business communication, leveraging AI and analytics to improve operational efficiency
- Organized and presented at a GenAI Expo, educating 350+ employees on the application of ChatGPT, Microsoft Copilot, and custom AI tools, collaborating with senior leadership to promote AI-driven innovation
- Developed an understanding of pharmaceutical operations through daily project discussions and cross-functional collaboration with stakeholders

Publicis Media

Business Manager

Jul 2019 - Aug 2023

- Managed SEO, SEM and Social Media accounts for a portfolio of 18 clients from locations such as USA, UK, Singapore & Australia. Analyzed and improved organic lead generation by using techniques such as market research, keyword analysis, content marketing, technical audits, page speed audits, traffic forecasting, META suggestions, competitor research, on-page optimization and off-page optimization for client websites
- Gathered business requirements, defined project scope, developed timelines, and scheduled deliverables through collaborative partnerships with cross-functional teams of more than 20 people, including directors, executives, developers, and content writers
- Generated \$46K in incremental sales for a Germany-based e-commerce client with a team of 5, through integrated marketing techniques using SEO, SEM, CRO, SMM and website redesigning, received the Achiever Award from the organization for this accomplishment.
- Designed and implemented automated dashboards with Google Looker Studio, Google Analytics and Tableau to streamline data analysis
- Created educational resources which were utilized by 40+ team members

Syracuse University, Syracuse, USA

Jan 2023 – Dec 2024

Teaching Assistant – Essentials of Finance, Business Analytics, Introduction to Entrepreneurship

- Assisted the professor with administrative tasks, course logistics, and managing the online platform (Blackboard)
- Conducted office hours and tutoring sessions to support students with course material and clarify concepts
- Maintained attendance records, tracked participation, and graded assignments with constructive feedback

PROJECTS & ACTIVITIES

Data Driven Solutions to Boost Preventive Care Engagement in Humana

Nov 2024

- Led a machine learning project to predict unengaged healthcare members in LPPO plans, leveraging advanced modeling techniques such as a stacking ensemble of XGBoost, LightGBM, and CatBoost, achieving an AUC score of 0.7483. Implemented data preprocessing techniques like imputation and PCA to optimize feature engineering and improve engagement predictions
- Conducted exploratory data analysis to identify key predictors, such as age, tenure, and poverty levels, and designed actionable, equity-focused intervention strategies for healthcare engagement

Emissions Forecasting and Traffic Route Optimization to Reduce Emissions in New York City Using Uber Data

Nov 2024

- Designed and implemented a hybrid SARIMA-XGBoost model to forecast greenhouse gas emissions with an RMSE of 3.263, analyzing 56M Uber trip records to identify high-emission zones, optimize routes, and provide actionable insights for reducing congestion and emissions
- Conducted advanced data analysis and visualization, including K-Means clustering, cost-benefit analysis, and feature engineering, to support policymakers and environmental organizations in making data-driven decisions for sustainable urban transportation systems

Analyzing Electric Vehicle Adoption and Infrastructure through Interactive Dashboards

Oct 2024

- Developed interactive Tableau dashboards to analyze EV adoption trends, infrastructure distribution, market dynamics, and the impact of legislation and incentives across the U.S., providing actionable insights for policymakers and stakeholders to accelerate sustainable transportation initiatives
