

ABIRAMMI SENTHIL KOMAGAN

Healthcare Analyst

Email: abiramikomagan@gmail.com | (551) 304-1010 | Atlanta, Georgia - 30328 | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL EXPERIENCE

Healthcare Data Analyst, Regeneron

(Jan 2026 – Present)

Tools: SQL | AWS RDS | Tableau

- Developed optimized SQL queries, improving reporting efficiency and stakeholder access to critical health metrics, across large clinical datasets within regulated healthcare systems.
- Designed surveillance-style dashboards, enabling timely identification of operational and treatment trends, for cross-functional clinical and compliance teams.
- Built automated data validation frameworks, strengthening data integrity and reducing reporting inconsistencies, within multi-source healthcare data environments.
- Standardized reporting workflows, improving scalability and compliance readiness, across enterprise analytics operations.

Healthcare Analyst Intern, Rutgers Cancer Institute of New Jersey

(Feb 2025 – Dec 2025)

Tools: SQL | Tableau | R | ETL Pipelines | Statistical Modeling

- Engineered automated ETL pipelines, eliminating 40+ hours/month of manual processing, by integrating multi-source clinical and operational datasets.
- Applied regression and correlation modeling, identifying key drivers of patient engagement and treatment adherence, to inform community health strategies.
- Developed real-time dashboards, increasing decision-making speed by 60%, for clinical leadership monitoring engagement and care outcomes.
- Improved KPI accuracy by 28%, by resolving cross-system inconsistencies through structured data governance and quality validation processes.

Public Health Data Analyst, The Cooperative

(Aug 2024 – Dec 2024)

Tools: Tableau | R | ETL | Statistical Modeling | Data Validation

- Developed data-cleaning and validation frameworks, improving reporting accuracy by 35%, across maternal and community health program datasets.
- Performed logistic regression and hypothesis testing, identifying maternal health risk factors, to guide evidence-based prenatal intervention programs.
- Automated reporting workflows, reducing manual effort by 65%, in a fast-paced public health program environment.
- Analyzed longitudinal health outcome trends, supporting data-driven evaluation of program effectiveness and service utilization.

Supply Chain Data Analyst Intern, Mount Sinai Health System

(Jan 2024 – July 2024)

Tools: SQL | Tableau | Python | R | Time-Series Forecasting | Anomaly Detection

- Built ARIMA forecasting models, reducing supply delays by 22%, by predicting demand variability for critical medical supplies.
- Conducted anomaly detection analysis, identifying operational inefficiencies, within hospital procurement systems supporting patient care delivery.

Founder, ABS Health Tech (India)

(Oct 2021 – May 2023)

Tools: Analytics Dashboards | Product Metrics | User Behavior Analysis

- Built patient analytics dashboards, improving therapy adherence tracking, within a digital health startup serving clinical populations.
- Defined and monitored public health KPIs, strengthening data-driven decision-making, through structured analysis of patient engagement metrics.
- Analyzed clinical prototype data, ensuring reliable outcomes and regulatory alignment, during early-stage health product validation

SKILLS

Programming & Analytics: SQL (Advanced), Python, R, MATLAB

Statistics: Regression modeling, forecasting, hypothesis testing, time-series analysis, classification modeling, clustering

Visualization: Tableau, Power BI, Looker Studio, Excel

Project Management and Process: Jira, MS Project, Agile Methodologies, Lean Six Sigma DMAIC.

EDUCATION

- M.S., Healthcare Analytics & Intelligence – Rutgers Business School (GPA: 3.8)
- M.Eng., Biomedical Engineering – Anna University
