

ALEXANDRA PURDY

Kerrville, TX 78028 - (830)428-1923 - purdy.atennis@gmail.com

Professional Summary

Institutional Research and Data Professional with a Master of Science and graduate-level training in Data Science, bringing extensive experience in enterprise reporting, database management, accreditation compliance, and institutional assessment. Proven expertise in SQL-based data analysis, program review analytics, and survey design to support student success, strategic planning, and executive decision-making. Trusted partner to academic leadership and senior administrators, recognized for maintaining data integrity, ensuring regulatory compliance, and translating complex datasets into actionable institutional insights.

Skills

- Institutional Data Governance & Reporting
- Data Validation, Reconciliation & Quality Assurance
- Advanced SQL Querying & Relational Databases
- Large-Scale Dataset Analysis & Data Mining
- Enterprise Systems: Jenzabar J1 / J1 Web, PowerFAIDS
- IPEDS & National Student Clearinghouse Reporting
- Accreditation Compliance (SACSCOC)
- Program Review & Student Success Analytics
- Survey Design & Analysis (Qualtrics, RNL)
- Assessment Analysis (CLA, ETS)
- Data Integration & Migration Support
- Executive-Level Data Communication
- Cross-Functional Stakeholder Coordination
- Project, Budget & Vendor Management

Experience

Schreiner University

April 2024 to Current

Institutional Researcher

Kerrville, USA

1. Enterprise Reporting, Compliance & Institutional Data Stewardship
 - Managed and validated institutional data to ensure accuracy, integrity, and consistency across internal reporting and external submissions.
 - Acted as the primary point of responsibility for institutional reporting, maintaining compliance with federal, state, and accreditation requirements.
 - Completed and maintained IPEDS reporting and supporting documentation to ensure timely, accurate submissions.
 - Managed reporting to the National Student Clearinghouse and provided official institutional data to external agencies and peer institutions as required.
 - Produced data for state and federal reporting, including grant-related data pulls and compliance-driven submissions.
 - Coordinated cross-departmental reporting needs with Financial Services, academic leadership, and administrative offices to ensure consistent definitions and outcomes.
2. Accreditation & Quality Assurance (SACSCOC + Related Compliance)
 - Supported SACSCOC compliance efforts by assisting divisions with data collection, evidence alignment, and ongoing monitoring of institutional effectiveness measures.
 - Maintained data structures and reporting outputs used to demonstrate institutional compliance, outcomes assessment, and continuous improvement.
 - Supported strategic documentation and survey evidence used for accreditation readiness and reaffirmation support activities.

3. Database, SQL, Systems Integration & Data Quality

- Developed, maintained, and optimized custom SQL code and queries for reliable data extraction, analysis, and reporting.
- Enhanced reporting workflows and data processes, improving efficiency, accuracy, and audit readiness.
- Supported the integration of Jenzabar J1 on-site server data into J1 Web for reporting and census continuity.
- Served as a data validation and quality assurance resource during the J1 Web transition by reconciling legacy report outputs with J1 Web results.
- Performed database cleanup, standardization, and administrative maintenance within Jenzabar to improve reporting accuracy and system reliability.
- Collaborated with IT and functional stakeholders to resolve data discrepancies, align reporting logic, and maintain consistent institutional definitions.

4. Assessment, Surveys & Institutional Effectiveness (RNL / CLA / ETS / Qualtrics)

- Coordinated institution-wide survey and assessment administration, including RNL, CLA, and ETS initiatives.
- Managed survey timelines, deployment, response tracking, and reporting to support institutional effectiveness and strategic decision-making.
- Developed an in-house Qualtrics assessment modeled after CLA/ETS-style readiness measures to evaluate incoming students' academic preparedness.
- Analyzed readiness results to identify students needing support, meeting expectations, or exceeding entry benchmarks, enabling targeted interventions.
- Provided actionable outcomes to academic and division leadership to support student success initiatives and reduce academic risk.

5. Program Review, Student Progression & Course Outcomes Analytics

- Partnered with academic division directors to develop and implement a Program Review framework supporting academic evaluation and continuous improvement.
- Built reporting structures to track student enrollment, persistence, and success within academic programs across terms and cohorts.
- Analyzed course outcome patterns including Drop/Fail/Withdraw (DFW) ratios to identify risk points and performance trends.
- Tracked student pathways to measure program outcomes including degree completion, program departure, internal program change, and external transfer patterns.
- Produced longitudinal program analytics to inform academic planning, course review cycles, and improvement strategies.

6. Executive, Strategic & Financial Resource Decision Support

- Worked closely with the President, Vice President, and senior leadership to provide data insights supporting strategic planning and institutional priorities.
- Translated complex institutional datasets into clear findings for executive review and decision-making.
- Delivered cross-functional analysis supporting institution-wide performance metrics, operational planning, and compliance needs.
- Collaborated with the President and Special Assistant to the President to evaluate institutional financial aid utilization and funding effectiveness.
- Reconciled allocated versus awarded and disbursed financial aid funds to identify underutilized resources and distribution inefficiencies.
- Identified financial aid programs with low student uptake due to awareness or process barriers, informing targeted outreach and operational improvements to increase utilization.

7. Vendor, Budget & Operational Management (Department-of-One Scope)

- Managed the operational budget for a one-person department, including planning, purchasing, and renewal coordination.
- Administered payments and renewals supporting ongoing institutional compliance and visibility initiatives (e.g., NC-SARA, U.S. News & World Report, NCAA, and related recurring obligations as applicable).
- Managed survey and assessment expenditures, including procurement/renewals and implementation coordination for institution-wide deployments.
- Ensured continuity of required subscriptions, compliance services, and reporting tools supporting accreditation and institutional reporting cycles.

8. Collaboration, Communication & Professional Representation

- Collaborated with interdisciplinary teams across academic and administrative units to support comprehensive studies and reporting initiatives.
- Coordinated with Financial Services and academic leadership on historical and current program reviews and reporting requests.
- Represented the institution at conferences and training; traveled approximately 5% for professional development and institutional representation.
- Engaged in continuous learning to stay current on best practices in institutional research, reporting, assessment, and data governance.

Innovative Genomics LLC

January 2022 to February 2024

Molecular Technologist

San Antonio, USA

- Performed molecular diagnostic tests for COVID-19 and other infectious diseases.
- Analyzed and interpreted test results, providing timely reports to healthcare providers.
- Managed high volumes of testing and collaborated with healthcare professionals.
- Implemented new testing procedures to improve efficiency and accuracy.
- Conducted RPP, urine/UTI testing, and reported results to clients.
- Reviewed data for accuracy and identified system errors.
- Ensured compliance with regulatory requirements.
- Served as a resource for colleagues on molecular techniques.
- Improved assay sensitivity and specificity by troubleshooting and optimizing protocols.
- Managed high volumes of COVID-19 testing during peak periods.
- Improved testing procedures, resulting in faster turnaround times and increased accuracy.
- Played a key role in implementing new diagnostic technologies and protocols.

Education

The University of Texas At San Antonio

August 2025

Master of Science: Multidisciplinary Studies

San Antonio, TX

- Honor Roll 2024
- GPA: 3.72
- Certificate: Data Science
- Certificate: Project Management

Schreiner University

December 2021

Bachelor of Science: Biology

Kerrville, TX
