PROFESSIONAL SUMMARY

Data Analyst with **2+ years of experience** delivering **data and reporting solutions** to support business decisions. Strong background in **SQL, Python, Power BI, Excel** and cloud platforms (**AWS, GCP**). Proven ability to **translate complex data into dashboards, KPIs, and insights**, collaborate with cross-functional stakeholders.

EDUCATION

Northeastern University, Master of Science in Data Analytics Engineering, Boston, MA Aug 2025

Vellore Institute of Technology, Bachelor of Technology in Electronics and Communication Engineering, Vellore, India May 2022

TECHNICAL SKILLS

Data Analytics & Reporting: Power BI, Tableau, Excel (PivotTables, Power Query), AWS QuickSight, Looker

Data & Programming: SQL, Python (Pandas, NumPy, Matplotlib), Power Automate, APIs

Data Engineering & Cloud: AWS (S3, Glue, Lambda), GCP (BigQuery), Snowflake, dbt

Data Concepts: Data quality checks, data governance, metadata management, KPI design, documentation

Tools & Practices: Agile/Scrum, Jira, Git, Automation, Dashboard maintenance

WORK EXPERIENCE

Bayer, Data Engineer, Missouri, USA Jun 2024 – Dec 2024

- Supported **data ingestion, cleaning, and transformation** workflows by automating extraction of lab data using **Python**, OCR, and **AWS S3**, ensuring accuracy and availability of reporting datasets.
- Applied **data quality checks and validation rules**, reducing data issues and improving downstream dashboards.
- Developed **lightweight automation solutions** using Python and CI/CD workflows, reducing manual reporting and data update effort by **85%**.
- Integrated data across 50+ microservices using **APIs** and standardized schemas to support analytics, documentation.
- Collaborated with **cross-functional teams** to gather requirements, troubleshoot data issues, and support ad hoc analysis in Agile sprints.

Brane Enterprises Pvt Ltd, Data Analyst, Hyderabad, India May 2022 – Aug 2023

- Performed **data cleaning, transformation, and exploratory analysis** on large healthcare datasets (**10K+ records**) using **SQL and Python** to identify trends and patterns supporting clinical decision-making.
- Developed **20+ reports and dashboards** to communicate insights clearly to technical and non-technical stakeholders.
- Communicated with stakeholders translating analytical findings into **business insights**, supporting product and operational improvements in an **Agile environment**.

PROJECTS

Air Cargo Data Analysis on AWS | SQL, Power BI/Tableau, AWS

- Ingested and transformed **1M+ records** from structured, semi-structured sources using **AWS Glue, Lambda, and SQL** ensuring **data accuracy and consistency** through schema validation and partitioned Parquet storage on S3.
- Built **dashboards** visualizing **11 key KPIs**, reducing query load time by **40%** and enabling data-driven operational decisions.

Retail Data Analysis | SQL, PostgreSQL, Talend, Tableau

- Built ETL workflows to **clean, combine, and validate** 1M+ retail transactions with incremental refresh and designed a **star-schema data model** with fact and dimension tables to support reporting and analytics.
- Created dashboards highlighting **customer LTV, sales trends, top products** for business stakeholders.

Sales Performance Dashboard | Excel, Power BI

- Built Excel dashboards using **PivotTables, slicers, and Power Query** to analyze **10K+ sales records**.
- Automated recurring reporting workflows, cutting weekly analysis time by **50%**, delivering **clear, consumable visualizations** supporting leadership review and decision-making.
