

Sneha Joyce Gunty – Data Analyst

USA (Open to relocate) | (202) 848-6884 | snehajoynce2322@gmail.com | [linkedin.com/in/sneha-joyce-gunty/](https://www.linkedin.com/in/sneha-joyce-gunty/)

PROFESSIONAL SUMMARY

Data Analyst with experience delivering SQL and Power BI-driven insights across healthcare and regulated enterprise environments, including FDA-compliant analytics at Boston Scientific. Strong foundation in data modelling, ETL, and analytics engineering, with a software engineering background enabling clear communication of complex data to technical and non-technical stakeholders.

SKILLS

Analytics	: SQL (MySQL, PostgreSQL, SQL Server), Microsoft Excel (Pivot Tables, VLOOKUP), statistical analysis.
Visualization	: Power BI (DAX, data modelling), Tableau, KPI development and reporting.
ETL	: Spark SQL, Delta Lake, Python-based ETL, data quality checks.
Databases & Platforms	: DBMS, RDBMS, MongoDB, Snowflake, Apache Spark, AWS, Visual Studio Code, Anaconda, WEKA.
Programming	: Python (pandas, NumPy, REST APIs), Bash, Java, C, C++, JavaScript, PowerShell, HTML, CSS, GitHub.

WORK EXPERIENCE

Graduate Assistant, *The Gathering Space (I3B), UMBC*

Aug 2024 – May 2025

- Developed **AI-assisted Power BI dashboards** integrated with Excel, building predictive **forecasting models** that enabled real-time utilization insights, reduced planning errors by 25%, and improved decision-making.
- Supported **data-driven planning and reporting** for events with 500+ participants using Excel-based tracking and analysis, improving operational decision-making within a \$10K+ budget.

R&D Urology IT & Data Analytics Intern, *Boston Scientific Corporation, Arden Hills, MN*

May 2024 – Aug 2024

- Validated and analysed firmware-generated data for urological devices in a **regulated (FDA)** environment, **collaborating with R&D, Quality, and IT teams** to reduce downstream rework by ~30% through early data-quality checks.
- Developed **Bash-scripted MTI (Manufacturing Test Interface) decryption mechanisms** for LithoVue Elite, iterating on solutions based on client requests, automating test-log extraction and cutting firmware testing time by 40%, enabling faster **data validation** within the **ERP system**.
- Built a **Python-based SBOM automation tool** (CycloneDX) for Rezūm product line, and **communicated software dependency data to clients**, reducing manual tracking by 85%.
- Translated complex firmware and software data into clear summaries, analogies, and **process-flow diagrams** (50+ interfaces), improving configuration-management clarity and efficiency by ~35%.

PROJECTS

End-to-End Sales Analytics Platform using Databricks (Medallion Architecture)

- Architected a **Databricks Medallion Pipeline** (Bronze–Silver–Gold) to refine raw transactional sales data into analytics-ready fact and dimension tables, demonstrating **structured data-modelling** judgement.
- Designed Bronze ingestion and Silver transformations using Spark SQL and Delta Lake, performing **schema standardization, deduplication**, and key integrity checks to achieve 100% completeness for revenue-critical fields.
- Modelled curated Silver data by isolating transactional sales facts from customer and product dimensions, enabling accurate aggregation of revenue, volume, and customer-level metrics.
- Produced Gold-layer insights including CLV, category revenue, and **time-series trends**, and communicated findings through **Databricks SQL visualizations** to support **decision-oriented analysis** without ad-hoc queries.

Healthcare Analytics Platform – Epic Style Data Analysis & Reporting (Power BI, SQL, Python)

- Designed an Epic-inspired healthcare analytics platform, analysing 4,000+ encounters and 20,000+ diagnosis records.
- Built a normalized **SQL relational schema** across **five core tables**, improving query performance, data reliability by **35%**.
- Developed **Python-based ETL pipelines** and dashboards to track LOS, readmissions, denial rates, and revenue, reducing manual reporting effort by 40%.

EDUCATION

Masters in Software Engineering, University of Maryland, Baltimore County (UMBC)

Coursework: Data Incentives, Systems Analysis & Design, Mgmt. Leadership & Communication, Software Process Management.

Bachelors in Computer Science and Engineering, CVR College of Engineering, Hyderabad

Coursework: OOPS through Java, DSA, Operating Systems, DBMS, Python Programming, Introduction to AI & ML, Cybersecurity.
