EDUCATION

Iowa State University

Bachelor of Science in Computer Science | GPA: 3.46

Ames, Iowa

Dec 2025

SKILLS

- **Programming Languages:** Python, Java, Go, SQL, JavaScript, TypeScript
- **Frameworks & Platforms:** React, Angular, Spring Boot, Android Studio, Gin, Node.js, Docker, Azure, Power BI, REST APIs
- **Data Engineering:** Databricks, PySpark, Fivetran, IBM DataStage, SQL Server, SQLite, ETL/ELT, Data Modeling, Data Quality, Data Lineage
- **AI / ML:** PyTorch, TensorFlow, Keras, OpenCV, YOLOv5, LLM Integration, Recommendation Systems, NumPy, Pandas, MediaPipe, LSTM
- **Other Technologies:** UiPath (RPA), Security Automation, Computer Vision, WebSocket

WORK EXPERIENCE

Data Engineer Intern

Aug 2024 - Dec 2025

Berkley Technology Services

Urbandale, Iowa

- Architected and deployed containerized **ETL pipelines** on **Azure**, enabling scalable, **cloud-native** data workflows and reducing production deployment errors by **30%** through **CI/CD** automation and proactive debugging
- Led migration of **SQL Server** stored procedures to **PySpark** on **Databricks**, improving data processing speed by **30%** and increasing data accuracy by **25%** while eliminating legacy technical debt
- Engineered a Python-based enterprise **credential automation system**, reducing manual password rotation effort by **70%** and strengthening audit compliance across critical service accounts
- Contributed to **IBM DataStage-to-cloud modernization**, implementing data quality checks, lineage documentation, and job monitoring in an **Agile** environment to strengthen governance and reduce downtime

UiPath Developer Intern

Jun 2024 - Aug 2024

Berkley Technology Services

Urbandale, Iowa

- Designed and deployed an enterprise **RPA automation** (Screen Print Bot) that automated Operating Unit summary extraction and distribution, reducing manual processing time by **50%** and increasing operational efficiency
- Enhanced automation stability by optimizing UiPath Orchestrator workflows and implementing advanced exception handling, improving system uptime by **15%** and cutting troubleshooting time by **35%**

Data Science Research Lab Assistant

Apr 2024 - Jun 2024

Ames National Laboratory (U.S. Department of Energy)

Ames, Iowa

- Designed and implemented automated data extraction and preprocessing pipelines in Python to convert **500+ unstructured** scientific PDFs into **structured datasets**, accelerating **ML dataset** preparation by over **50%**
- Engineered **30+** domain-specific compositional features using **MatMiner**, **Pandas**, and **NumPy**, standardizing **1K+** compound records to enable scalable, reproducible machine learning experimentation

PROJECTS

Lifestyle and Personalization AI Recommendation System

Go, Gin, SQLite, Ollama, React, Docker

IdeaNova Technologies Inc

- Designed scalable, cloud-native backend services and **REST APIs** in Go for an **LLM-based AI** recommendation platform, supporting **100+** users with real-time preference learning and Dockerized deployment
- Built a configurable benchmarking and inference orchestration framework to evaluate and swap **5+ LLM** models, generating latency and token-efficiency metrics to optimize performance
- Architected user behavior tracking and recommendation storage systems, enabling dynamic personalization and seamless front-end integration

Real-Time Privacy Shield: Automated Video Anonymization System

Python, YOLOv5, OpenCV, NumPy, Pandas, PyTorch

- Engineered a real-time video anonymization system using Python, YOLOv5, and OpenCV, achieving **40+ FPS** across **100+** concurrent streams while maintaining GDPR-compliant privacy protections
- Built automated data preprocessing and augmentation pipelines, increasing model detection accuracy by **25%** across diverse real-world datasets

Code League

Spring Boot, Android Studio, React, Java

- Developed full-stack software using Java (Spring Boot) and React, building RESTful APIs and scalable backend services within a **microservices architecture** and CI/CD workflow
- Designed a responsive frontend interface using React, ensuring seamless user interaction and engagement across multiple devices while optimizing the overall learning experience
