Data Analyst

Accomplished Data Analyst with 6 years of experience in data analysis, data engineering, and machine learning. Proficient in designing complex data pipelines and utilizing big data technologies, as well as applying machine learning algorithms for actionable insights and data optimization. Experienced in managing large datasets and developing ETL processes, with a strong commitment to data privacy regulations. Demonstrated expertise in data visualization and effective communication of findings, enhancing decision-making processes. Skilled in AWS cloud platforms, SQL, and business intelligence, with a background in crafting data-driven reports and dashboards for real-time analysis.

Professional Experience

Applied Artificial Intelligence Lab - UHV Victoria, United States

Jun 2023 - May 2024

GRADUATE RESEARCH ASSISTANT

- Spearheaded climate change research focused on the environmental impacts at the Hanford Site, utilizing statistical and predictive modeling to analyze and forecast environmental changes.
- Collaborated with a multi-disciplinary team of scientists, contributing to data-driven reports that influence policy-making and strategic environmental planning.
- Managed large datasets and applied machine learning algorithms to interpret complex environmental data, improving understanding of climate change implications.
- Presented research findings to academic forums and contributed to the publication of studies in peer reviewed journals, enhancing the research profile of UHV.
- Collaborated with a diverse team of scientists and engineers to develop comprehensive, data-driven environmental impact reports, facilitating informed policy decisions and strategic planning.
- Applied Transformer model and GAN Architecture to predict future contamination scenarios with 90% accuracy, supporting the Department of Energy's surveillance initiatives.

WTF - WHERE'S THE FOOD, India

Aug 2021 - Oct 2022

BUSINESS SYSTEM ANALYST, Bengaluru

- Designed customized data collection models for specific visualization tasks.
- Developed ETL processes to integrate data from multiple sources into a unified data warehouse.
- Developed a complex data warehouse solution that enabled real-time analysis and reporting of key business metrics.
- Developed dashboards and interactive reports that enabled business users to gain insights from data.
- Collaborated with cross-functional teams to identify and resolve data-related issues.
- Developed and implemented data collection models that improved data accuracy and insight generation for food delivery operations, resulting in a 25% increase in customer satisfaction ratings.
- Partnered with cross-functional teams to troubleshoot and resolve intricate data issues, achieving a 40% reduction in data-related downtime, thereby boosting operational efficiency.

VIDYUTTECH, India

Sep 2018 - May 2019

SQL DATABASE ADMINISTRATOR, Bengaluru

- Analyzed business reports for prompt communication, follow-up, and ongoing support.
- Followed standard practices for migrating changes to test and production environments.
- Supported projects, enabling delivery efficiencies and technical resolution.
- Maintained complex T-SQL queries, views, and stored procedures in a multi-database environment with little supervision.
- Produced high-standard database solutions to meet stability, reliability, and performance metrics.
- Implemented system enhancements to design and develop solutions to address problem reports.
- Documented the analysis results and provided performance improvement feedback.
- Wrote and executed SQL queries to validate the integrity of the database.

Brisk Management Solutions(Speedex), India

Aug 2017 - Aug 2018

SUPPLY CHAIN EXECUTIVE-SEA EXPORTS, Chennai

- Reviewed and prepared bills of lading, ensuring all free on board (FOB) terms were accurately reflected, enhancing compliance with international shipping regulations.
- Collaborated with logistics teams to incorporate FOB terms into bills of lading, ensuring timely shipment scheduling and documentation accuracy.
- Liaised with clients and beneficiaries to negotiate for successful contract execution.

- Performed project organization and identification for successful project acquisition and implementation.
- Proofread technical and creative outputs and deliverables for adherence to quality standards.
- Delivered new business and attained financial targets on existing contracts.
- Reviewed invoices and monitored payments for timely reconciliation.
- Traveled extensively to visit clients, manage work portfolio, and develop new businesses.

Jaya Springs, India	Sep 2016 - May 2017
PRODUCTION ENGINEER , Chennai	
• Supervised the entire production process and prepared proper documentation for dispatch. • Performed regular production studies and machine analysis to identify any quality and process problems. • Applied lean manufacturing processes to enhance quality, reliability, or cost-effectiveness. • Performed root-cause analysis and implemented corrective actions. • Trained team on best practices to optimize production and improve quality. • Communicated with other team members to enhance processes and performance.	

Education	
University of Houston-Victoria , Victoria, United States, Master's in Data Science, Jan 2023 - May 2024	
Madras School of Economics , Chennai, India, Master's in Research & Business Analytics, Aug 2019 - Apr 2021	
Loyola ICAM College of Engineering & Technology , Chennai, India, Bachelor in Mechanical Engineering, Aug 2012 - May 2016	

Certifications	
AWS Certified Solution Architect Associate , Amazon Web Services	Aug 2024

Core Competencies	
Data Analysis Data Collection, Analytics, Statistics, Predictive Modeling Database Management SQL, Database Systems, ETL, SQL Server Integration Services Business Intelligence Power BI, Business Intelligence, Data Warehousing Cloud Technologies Amazon Web Services, Azure, gcp, AWS SageMaker, Azure Data Factory, BigQuery Machine Learning Machine Learning, Deep learning, Machine Learning Algorithms, Transformers, BERT, LLMs	

Publications	
"YSAF: Yolo with Spatial Attention and FFT to Detect Face Spoofng Attacks" , IEEE 3rd International Conference on AI in Cybersecurity (ICAIC)	Feb 2024
Analyzing Seq2Seq and Transformer Models for Time Series Forecasting in Climate Change Modeling for future predictions of waterlevel , WM Symposia-DOE	Apr 2024
