SUMMARY

- Proficient in Data Lake, Wrangling, Visualization, and Modeling, Statistical Analysis, Database Management, KPI Tracking, Web Scraping, Dashboards, ETL Pipelines, UI/UX design principles, and System Automation
- Demonstrated business acumen and innovative problem-solving skills in product development & content marketing
- Proven to make process improvement, drive business growth, develop products from concept to launch and expansion
- Result-driven, detail-oriented, effective collaboration & communication, self-starter, lifelong learner, time management

EDUCATION

Brandeis University (University Scholarship) Aug 2021 – Dec 2023

M.S in Business Analytics & M.A in International Economics and Finance | GPA: 3.7/4.0

University at Buffalo, the State University of New York

Aug 2017 - May 2021

B.S in Business Administration, Concentration with Financial Analysis & Data Analytics | GPA: 3.6/4.0

PROFESSIONAL EXPERIENCE

Global Live Network, Inc. | *Business Analyst – New App Development*

Feb 2024 – Present

A livestream company launched a startup social media App with GenAI solutions.

- Integrated seasonality and trends using **Python** to correct previous reports with misleading projection, resulting in strategic changes
- Documented user requirements by streamlining survey data collection, governance, and processing in **SQL** server, totaling at \$35,000 R&D cost saving
- Led 3 analysts to develop KPIs; created and monitored 35 interactive dashboards in **Tableau** for real time insights
- Proposed 140+ policy and strategy changes to ensure alignment with targets in highly collaborative environment
- Designed and implemented A/B testing to optimize marketing campaigns and doubled quarterly paid-user conversion
- Evaluated 12 projects to recognize opportunities and risks using **Firebase**, **Google Analytics**, **Excel**, and research skills to support C-level suite making decisions
- Predicted Customer Lifetime Value (CLV) using statistical analysis in Python to assess ROI for future planning

Global Live Network, Inc. | *Data Analyst Intern*

Sep 2023 - Feb 2024

- Served as liaison to translate business requirements into technical concepts and supported **UAT** for project objectives
- Consolidated and prepared data from multiple sources using **SQL**, reducing data errors by 27% and run time by 35%
- Optimized multi-channel market campaign by visualizing ad template performance and user profile, resulting in 18.7% increase in response rate
- Automated invoice reconciliation in **Python** for 16M+ transactions, identified \$350k unreceivable, saved \$70k/year
- Improved retention by 10% and click-through by 17% via Logistic Regression & Decision Trees on customer churn
- Designed search engine by integrating APIs, Web Scrape (BS4), ETL solutions, and **HTML** interface to load over 200GB data from YouTube to **CRM** system; eliminated manual work of 90 hours/week
- Crafted compelling pitch deck by documenting requirements and key business metrics to high profile clients like AWS and Nvidia seeking for startup online GPU solutions

Monidar, Inc. | *Market Analytics Intern*

Sep 2022 - Sep 2023

- Identified and rectified discrepancies in 978 warning signals using Confusion Matrix analysis for troubleshooting
- Developed dynamic and user-centric dashboards with **Power BI** to provide comprehensive insights into sales trends
- Assisted senior stakeholders in understanding complex datasets and provided actionable insights to drive growth
- Conducted market research in healthcare sector to analyze market trends and presented findings to senior managers
- Generated clear and well-structured reports and validated requirements with relevant stakeholders

PROJECTS

Amazon Review Sentiment Analysis

Sep 2023 - Dec 2023

- Preprocessed 460k review observations by cleaning, normalizing, and rebalancing data by SMOTE, and tokenized data with various tokenizing and vectorizing methods (NLTK, TF-IDF, etc.) for sentiment analysis with TensorFlow
- Tuned hyperparameters, token ratios, and tokenizing methods for gradient descent, achieving best test score of 85%
- Implemented Random Forest, Boosting, and SVM models, refining parameters through random search and grid search, achieved a final model with 95% accuracy and 84.2% recall rate through optimized parameter tuning

SKILLS

- **Tools:** Python, SQL, R, Tableau, Excel, Databricks, Power BI, Git, JIRA, AWS, Snowflake, Google Analytics
- **Data Analytics:** A/B Testing, Machine Learning, Deep Learning, Statistics, Time Series Analysis, ARIMA
- **Certificates:** Applied Business Analytics, Deep Learning for Business, Python Data Analytics, Exploratory Data Analysis for Machine Learning
