Summary

Software Engineer with 4+ years of experience in building software and cloud solutions. Proven expertise in Go, Java, and Python, along with AWS experience. Reduced data processing time by 15% using SQL optimization in a previous project. Architected API integration, DB integration, and engineered new microservices. Eager to leverage skills and contribute to real-time projects.

Experience

Vervenest Technologies | South Plainfield, NJ | September 2023 - Present

Software Engineer

- **Enhanced AT&T customer data ETL processes:** leveraged **Python** within Palantir tools, leading to a 15% boost in processing efficiency.
- **Designed and maintained data-driven web applications:** Notable 20% increase in operational efficiency while enhancing the overall user experience and data flow with the help of **React** and **Java**.
- Created AWS **CloudFormation** templates for the creation of **EC2** instances and infrastructure on demand.
- **Introduced RESTful API for Internal website:** Configured robust **API(Go, Gin, echo, gRPC, and GORM)** to add 4 new services(searching, updating, reporting).
- **Refined SQL queries:** fixed complex queries and built indexes for frequently incorporated queries minimizing downstream errors to 1% and improving overall data quality.
- Well-versed with kubernetes architecture(setup, images, jobs, nodes, services, pods, and replication controllers).

Leftbin Labs | Fresno, CA | November 2021 - July 2022

Front-end Associate

- **UI/UX:** Upgraded web components with JavaScript and React, boosting engagement metrics by 15%.
- **Deployments:** Increased deployment efficiency by 40% with container-based deployments using Docker(Docker images, Docker Hub).
- Proficient in deploying and managing microservices based architectures on Kubernetes clusters, optimizing resource utilization, and facilitating scalability.
- Designed new Goroutines and channels for speed and efficient data streaming services with downtime less than 1%.
- **Integration and Testing:** Delivered java back end code and eliminated bugs, ensuring flawless functionality across the application.
- **Data & Infrastructure:** Maintained database design, simplified SQL(storage/retrieval), and ensured 99% uptime through Linux administration.

Tata Consultancy Services | Hyderabad, India | May 2019 – January 2021

Assistant Systems Engineer

- **Maintained Critical Systems:** Resolved 100% of defects in UAT and production environments, ensuring uninterrupted functionality and data integrity.
- **Provided Data Insights:** Analyzed large datasets with SAS (approximately 70 million records) throughout the SDLC, deriving actionable insights that informed strategic decision-making.
- **Supported End-to-End Project Life cycle:** collaborated in all phases of the SDLC, including design, development, unit testing, deployment, and production support.
- **Recognized for Excellence:** Received TCS Gems for and successful deployment efforts for two major projects.
- **Data Security and Access Control:** Employed Spring Boot, RESTful API, and Java for secure authentication, authorization, and role-based access resulting in 100% security compliance for release.
- Operated closely with the testing team to develop and maintain automation scripts(Selenium, TestNG, JUnit, Cypress, Playwright)decreasing manual testing hours by 70%.

- Mentored four junior developers, sharing knowledge and team practices in Java development and Kubernetes deployment, fostering a culture of learning and innovation within the team.

ABC Learn Technologies | Hyderabad, India

November 2018 – April 2019

PHP Developer Intern

- **Troubleshooted Mobile App:** Fixed issues related to user registration, OTP generation, and appointment scheduling in a new mobile app, resulting in a 20% decrease in user-reported issues.
- **End-to-End testing :** Performed manual, cross browser, API testing and mobile app testing ensuring 100% coverage.
- **Research on new features:** conducted research on low-data video recording and mobile app UI/UX enhancements, and integrated 2 new features to improve UX.
- Proposed a new student database, login dashboard, and other important functionalities for the student portal.

Education

- **University of Bridgeport | Bridgeport, CT | August 2022 - May 2023**
Master of Science, Computer Science
- **Vardhaman College of Engineering | Hyderabad, India | August 2015 - May 2019**
Bachelor of Technology, Computer Science and Engineering

Technical Skills

- **Programming Languages:** C++, Python, Java, Go, R, COBOL, JavaScript, Angular, React, PHP, SAS.
- **Frameworks:** Django, Spring Boot, Gin, Gorm.
- **Databases:** MySQL, PostgreSQL, MongoDB, SQL Server.
- **Technologies:** AWS (CLI, S3, Glue, Lambda, DynamoDB, CloudFormation) GCP(Compute Engine, Kubernetes Engine).
- **Operating Systems & Tools:** Unix, Linux, Git, Jira, Kubernetes , Docker, Tableau, Power BI.

Projects

- Increased NYPD crime data accuracy (70M records) by 20% & visualized on Google Maps(predictive modeling, analytics, statistics, data cleaning, Tableau, and data manipulation).
- Developed MineMaze game simulator (C++, 30% performance improvement, design patterns, statistics, team lead).
- Built personality identifier using ML (compared 3 classifiers, validated accuracy).

Training & Certifications

- Completed CCNA training with an emphasis on network configurations and troubleshooting.
- Completed Networking basic and intermediate courses from Cisco (HTTP/S, TCP/IP, DNS, OSI model, firewalls, routing, switching, DHCP)
- Achieved AWS, GCP Certification, focusing on cloud services, orchestration, and architecture.
- Developed 10+ projects using AWS (IAM, Security groups, EC2, Lambda, S3 Buckets, SageMaker, CloudFormation, VPC) as part of a cloud computing course.
