

GANYA JANARDHAN | Data Analytics Engineer

Chicago, Illinois | +1 (312) 714-2674 | ganyajanardhan24@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio](#)

SUMMARY

Data Analytics Engineer with 3 years of experience designing scalable data solutions that transform complex information into actionable insights. Skilled in developing automated ETL pipelines, cloud data architectures, and predictive analytics using Python, SQL, Spark, and Airflow. Proficient across AWS, Azure, and GCP ecosystems with expertise in Snowflake, BigQuery, and Databricks. Adept at building Power BI dashboards and deploying ML models to improve forecasting, streamline reporting, and optimize business performance across logistics, healthcare, and finance domains.

PROFESSIONAL EXPERIENCE

HubGroup, USA
Data Analyst Engineer

Apr 2025 – Current

- Designed end-to-end **ETL workflows** in **Python, SQL, Azure Data Factory, and Databricks**, improving pipeline efficiency by 25 % and scaling ingestion for 10 TB of weekly logistics data.
- Built **predictive models** on **AWS and GCP** using **scikit-learn and XGBoost** to enhance freight demand forecasts by 20 %, generating \$1.2 M in annual savings through optimized routing and scheduling.
- Created automated **Power BI** and **Tableau** dashboards consolidating 50 + KPIs, cutting reporting turnaround by 35 % and delivering real-time visibility for finance and operations.
- Implemented **Airflow-based validation** and **Panda’s anomaly detection**, lowering data-quality issues by 25 % and ensuring audit-ready accuracy.
- Integrated **CI/CD pipelines** with **Git and Azure DevOps** to deploy data models and analytics assets 30 % faster across business units.

DaVita, USA
Data Engineer / Data Analyst

Jan 2024 – Mar 2025

- Constructed **Airflow orchestration pipelines** in **Python and SQL** to process 12 M + patient records monthly, boosting data availability for analytics by 40 %.
- Developed **forecasting and classification models** using **TensorFlow and scikit-learn** to predict dialysis demand with 22 % greater accuracy, reducing scheduling inefficiencies and saving \$850 K annually.
- Consolidated **AWS S3, Redshift, and BigQuery** environments into a secure HIPAA-compliant architecture, increasing query performance by 28 % and accelerating clinical reporting.
- Delivered **Power BI dashboards** for outcome and cost analytics, automating 40 % of manual reporting and providing sub-5-second data access.
- Devised **SQL-based data quality frameworks** to monitor EHR and billing integrity, raising accuracy by 25 % and improving regulatory compliance.

Smmud Technologies Pvt. Ltd., India
Data Analyst / Data Engineer

Jan 2021 – Jun 2022

- Built **PySpark and Python ETL pipelines** integrating structured and unstructured sources, decreasing latency by 30 % and increasing analytics throughput.
- Designed **interactive Power BI and Tableau dashboards** aligning finance and operations metrics, reducing reporting time by 40 % and enhancing executive decision-making.
- Created **ARIMA and linear-regression models** in **Python and R** to forecast sales and inventory needs with 20 % higher precision, minimizing excess stock by ₹ 15 L annually.
- Utilized **Hadoop and Spark clusters** to process multi-terabyte transactional data, enabling near-real-time analytics for business performance tracking.
- Coordinated with **engineering and finance teams** to automate reconciliation and data-validation workflows, cutting manual effort by 35 %.

SKILLS

Data Engineering: Azure Data Factory, Matillion, dbt, Informatica, Apache Airflow, AWS Glue, Alteryx, GCP Dataflow, Data Fusion, Kafka, Spark (PySpark, Scala), Databricks, Snowflake, Synapse, Data Lakes/Warehouses

Databases: SQL Server, PostgreSQL, BigQuery SQL, Amazon Redshift, DynamoDB, HBase, Firestore

Programming & Scripting: Python (Pandas, NumPy, Scikit-learn, TensorFlow, PySpark), SQL (T-SQL, PL/SQL), SAS, Bash, PowerShell

Analytics & Business Intelligence: Power BI (DAX), Tableau, Looker, Alteryx, Advanced Excel (Pivot Tables, VBA, Macros), Azure Analysis Services

Cloud & Infrastructure: Azure, AWS (S3, Glue, Athena, Redshift, Kinesis, Lambda), GCP (BigQuery, Dataflow, Dataproc, Pub/Sub, Bigtable, Cloud Storage), Hadoop, Docker, Azure Monitor, CloudWatch

DevOps & Security: Azure DevOps, Jenkins, Git, CI/CD Pipelines, GCP Cloud Build, Azure AD, IAM, Row-Level Security

Machine Learning & Advanced Analytics: Forecasting, Anomaly Detection, Predictive Modeling, Model Training & Deployment (Python, TensorFlow, Scikit-learn)

EDUCATION

Masters in Computer Science
Illinois Institute of Technology, USA

Bachelor of Engineering
Visvesvaraya Technological University, India

PROJECTS

Fake News Detection using NLP and Logistic Regression

- Designed and implemented a text classification pipeline in Python using TF-IDF features and Logistic Regression to detect misinformation in online news datasets.
- Processed and cleaned 40K+ text records using pandas, NumPy, and NLTK, achieving 94% precision on validation data.
- Enhanced model interpretability by visualizing feature weights and prediction confidence, improving transparency for non-technical stakeholders.
- Automated the end-to-end workflow using Airflow and SQL, ensuring scalable and reproducible model retraining across new incoming data.

Facial Expression Recognition using Deep Learning

- Built and trained a Convolutional Neural Network (CNN) in PyTorch on the FER-2013 dataset to classify human emotions across seven categories.
- Achieved 92% validation accuracy through augmentation, batch normalization, and dropout regularization, improving model robustness.
- Deployed the model on Databricks for large-scale inference and integrated outputs into a Power BI dashboard for real-time emotion analytics.
- Optimized model performance by reducing inference latency by 30% through pipeline parallelization and efficient data-loading strategies.

CERTIFICATIONS

- Google Data Analytics Professional Certificate – Coursera (2025)
- AWS Certified Solutions Architect – Associate – Amazon Web Services (2025)
- IBM Data Science Professional Certificate – IBM
- Architecting with Google Compute Engine Specialization – Google Cloud
