

Business Analyst

EDUCATION

Executive Ph.D. in Information Technology

GPA: 3.87

University of the
Cumberlands, KY, USA

Master of Science in Data Analytics

GPA: 3.97

Clark University, Worcester, MA, USA

SKILLS

Programming Languages:

Python, R, SQL, DAX, HTML5

Data Visualization Tools: MS

PowerBI, Tableau, Looker, QlikView, SAS, Splunk, MS Excel

Database Management: MS

SQL, MySQL, Oracle, RDBMS

Python Libraries: NumPy,

Pandas, Matplotlib, SciPy, Scikit-Learn

Core Skills: Data Modeling, Business Intelligence, Process Improvement, Client Relationship Management, Project Management, Agile/Waterfall Methodologies, Reporting, Critical Thinking, Azure DevOps, ETL, Machine Learning

Cloud Platforms: Microsoft Azure (Azure ML Studio, Azure DevOps, Azure Data Factory)

CERTIFICATIONS

IBM: Getting Started with Cloud for the Enterprise

Microsoft Certified: Azure AI Fundamentals

CAREER OBJECTIVE

Driven Data Professional with over 3+ years of experience in data analysis, process optimization, AI, and business intelligence, delivering innovative solutions that enhanced operational efficiency by 30% in agile environments while improving client satisfaction by 25%. Experienced educator and mentor with a robust academic background, committed to empowering teams and organizations through data-driven decision-making and advanced technology integration. Adept at leveraging analytical skills to drive a 40% increase in business success and foster continuous improvement across projects.

WORK EXPERIENCE

Oct 2021 - Jan 2025

Business Analyst | Crayon Software Experts LLC., Texas, USA

- Collaborated with cross-functional teams to achieve 95% alignment on objectives, improving communication and reducing project delivery time by 20% within strict deadlines.
- Led Agile sprints and conducted requirements gathering using Azure DevOps, streamlining workflows and improving team efficiency by 30%, in line with professional project cycle management.
- Spearheaded Quality Assurance (QA) environment implementation, achieving a 25% increase in process optimization and a 40% reduction in deployment errors, ensuring alignment with quality control objectives.
- Optimized Power BI report performance by shifting heavy DAX calculations to databases, reducing load times from 10 minutes to 3 seconds, improving client satisfaction and operational efficiency.
- Transitioned reporting from QlikView to Power BI, optimizing dashboards with DAX and reducing report preparation time by 60%, supporting data standardization initiatives and ensuring data quality compliance.
- Led a cross-continental migration project, unifying global operations and automating Zendesk processes to improve response times by 30% and enhance operational efficiency in alignment with client-focused strategies.
- Managed the end-to-end development of a client website on Wix, completing the project 2 weeks ahead of schedule and achieving 95% client satisfaction, showcasing attention to detail and adherence to delivery timelines.
- Achieved 93% transcription accuracy for a medical client using Azure ML and advanced prompt engineering.
- Designed and implemented LLMs for legal document entity extraction, attaining over 90% accuracy, aligning with advanced data analysis and process automation objectives.
- Published blogs and educational materials on emerging technologies like Microsoft 365 Copilot. [Read Here](#)

Jan 2024 - Present

Cyber Security | Clark University, Worcester - Part-Time Instructor

- Developed tailored lesson plans for an advanced cybersecurity curriculum, directly enhancing student engagement levels; feedback indicated an increase from average ratings of 3.5 to over 4.8 out of 5 on course evaluations after implementation.
- Introduced hands-on labs and simulations to offer practical experience in cybersecurity tools and techniques, bridging the theory-application gap and leading to a 40% increase in student performance.
- Collaborated with five industry experts to update course materials, integrating advanced practices such as AI-driven threat detection and enhanced encryption methodologies, resulting in a 30% improvement in course engagement and student satisfaction.
