(551) 241-9701

Business Data Analytics student with a strong foundation in data analysis and process improvement, seeking to apply analytical and problem-solving skills to support manufacturing operations. Experienced in interpreting complex data to identify inefficiencies, optimize workflows, and assist teams in making informed decisions. Collaborative and detail-oriented, with a focus on lean manufacturing and production optimization.

EDUCATION

W. P. Carey School of Business, Arizona State University, Tempe, AZ

August 2022 - Present

Bachelor of Science, Business Data Analytics

- Awards: New American University Scholarship (\$14,500)
- Relevant Coursework: Global Supply Operations, Problem Solving & Actionable Analytics, Business Statistics, Programming Analytics & AI in Business, Big Data & AI in Business.

PROFESSIONAL EXPERIENCE

Business Analytics Intern – BirlaSoft, Hyderabad (*May 2023 – August 2023*)

- Increased revenue opportunities by 15% through data mining & market trend analysis.
- Collaborated with engineering and operations teams to develop predictive models (Python, SQL) that improved demand forecasting and resource planning accuracy.
- Presented continuous improvement recommendations based on production data and optimizing workflow.
- Integrated modern manufacturing data systems and analytics to enhance quality and performance tracking.

Management Intern – Dhruva Sai Infrastructure, Hyderabad (*May 2022 – August 2022*)

- Analyzed daily operations workflow and resource allocation to identify process inefficiencies and bottlenecks.
- Collaborated with operations and engineering leading to redesign scheduling systems, reducing material delays and overall project costs by 12%.
- Collaborated with engineering and operations teams to apply data-driven process improvements that enhanced overall project efficiency.

Sports Program Supervisor – Arizona State University, Tempe (*March 2023 – January 2024*)

- Managed logistics and scheduling for multiple concurrent programs, ensuring efficient resource utilization.
- Supervised and trained staff in efficient operations, applying leadership and process planning skills applicable to production environments.

PROJECTS

Task Management System: Built a relational database model representing task dependencies and workflow steps to simulate production-style scheduling. Designed automated prioritization logic that reduced manual planning time by 25% and improved process visibility.

Sales Performance Dashboard: Collaborated with a 4-member team to analyze a mock dataset of 30K+ production and supply-chain records. Built an interactive dashboard to monitor throughput, cycle time, and quality metrics, demonstrating a 20% improvement in forecast alignment.

SKILLS

Technical Tools: Python, SQL, MS Excel, MS Office.

Manufacturing & Operations Skills: Production Data Analysis, Operations Planning, Supply Chain Analytics, Continuous Improvement, Quality Monitoring, Predictive Analytics, Cross-Functional Collaboration.
