

Professional Summary

- Business Analyst with around 3 years of experience specializing in Change Management, Impact Analysis, Risk Analysis, and Cost-Benefit Analysis. Successfully implemented Digital Marketing strategies resulting in improved operational efficiencies and business outcomes.
- Proficient in guiding strategic decisions through rigorous ROI Analysis, SWOT Analysis, Root Cause Analysis, and implementation of Digital Marketing strategies for informed planning and execution.
- Skilled in navigating various SDLC methodologies such as Waterfall, Agile-Scrum, and Rational Unified Process (RUP) to align with project requirements and timelines effectively.
- Demonstrated ability to adapt and apply SDLC methodologies including Waterfall, Agile-Scrum, and Rational Unified Process (RUP) according to specific project needs, ensuring efficient project management and delivery.
- Proficient in utilizing Python and SQL languages to extract and manipulate data, enabling the generation of actionable insights crucial for data-driven decision-making processes.
- Experienced in leveraging Python and SQL languages for efficient data extraction and manipulation, empowering informed decision-making through comprehensive data analysis.
- Expertise in Microsoft Tools (Excel, Access, PowerPoint, Visio), Google Analytics, and Reporting tools such as MS Excel, Power BI and Tableau for generating comprehensive reports and visualizations.
- Experienced in managing multiple projects simultaneously, collaborating with cross-functional teams to gather requirements, perform gap analysis, and translate business needs into technical solutions.
- Strong foundation in MYSQL, Microsoft SQL, PostgreSQL, and Oracle Database, proficient in data extraction, transformation, and loading to support strategic initiatives and drive actionable insights.

Education And Certifications

Master of Science: Advanced Data Analytics	Jul 2023
University Of North Texas	
Bachelor of Science: Computer Science and Technology	Sep 2020
Bapuji Institute of Engineering & Technology, Bangalore, India	

Skills

Business Skills:	Change Management, Impact Analysis, Risk Analysis, Cost-Benefit Analysis, ROI Analysis, SWOT analysis, Root Cause Analysis, BRD, FRD, Process Modelling
SDLC Methodologies:	Waterfall, WaterScrumFall hybrid, Agile-Scrum, Rational Unified Process (RUP)
Languages:	SQL, Python
Tools:	Microsoft Tools (Excel, Access, PowerPoint, Visio), Google & Adobe Analytics
Databases:	MYSQL, Microsoft SQL, PostgreSQL, Oracle Database
Reporting tools:	MS Excel, Tableau, Power BI

Experience

Roche, TX

Business Analyst

Sep 2023- Current

- Leveraged expertise in Change Management, conducting Impact Analysis, Risk Analysis, Cost-Benefit Analysis, and Digital Marketing strategies to drive a 20% increase in organizational growth and improve business outcomes by 15%.
- Utilized established SDLC methodologies such as Waterfall and Rational Unified Process (RUP) to meticulously plan, manage, and execute projects, ensuring systematic progression from initial concept to final delivery while adhering to predefined timelines and objectives.
- Employed a structured approach grounded in SDLC methodologies like Waterfall and Rational Unified Process (RUP) to effectively orchestrate project activities, guaranteeing alignment with overarching business goals and seamless integration of project deliverables within specified timelines, resulting in a 15% increase in project efficiency.
- Utilized advanced skills in Python and SQL languages to proficiently extract, manipulate, and analyze data stored within Microsoft SQL and PostgreSQL databases, resulting in a 25% improvement in data processing capabilities and a 30%.
- Leveraged expertise in Python and SQL languages to effectively harness data from Microsoft SQL and PostgreSQL databases, facilitating the generation of actionable insights and informed decision-making through meticulous data analysis and interpretation.

- Utilized Reporting tools such as MS Excel and Tableau to develop interactive dashboards and visualizations, providing stakeholders with actionable insights and facilitating data-driven decision-making, resulting in a 25% increase in project.
- Conducted regular analysis and evaluations of business processes and performance metrics to identify areas for improvement and recommended strategic solutions.
- Collaborated with stakeholders to develop and implement solutions, monitored their effectiveness, and made necessary adjustments to drive continuous improvement and achieve business goals, resulting in a 20% increase.

KPMG, India

Sep 2019 -Jul 2021

Business Analyst

- Spearheaded the complete Software Development Life Cycle (SDLC) process, resulting in a 25% increase in project success rates through meticulous analysis of business requirements and understanding of functional workflows.
- Implemented the Waterfall methodology for Requirements, Planning, Design, and Deployment phases, ensuring structured and successful project execution.
- Prepared comprehensive Business Requirement Documents (BRD) and Functional Requirement Documents (FRD) while utilizing HP Quality Center to manage, analyze, and convert business requirements into functional specifications.
- Utilized Python and SQL to generate and analyze custom reports and dashboards, leading to a 20% improvement in data-driven decision-making and a 25% increase in project success rates.
- Conducted thorough ROI analysis, resulting in a 15% reduction in project costs and a 20% increase in project profitability. Aligned business strategies with data-driven insights, improving overall organizational efficiency by 10%.
- Applied advanced business skills, including change management, risk analysis, SWOT analysis, Gap analysis, and impact analysis, resulting in a 10% reduction in project risks and a 15% increase in stakeholder satisfaction.
- Achieved an impressive 98% defect identification rate during User Acceptance Testing (UAT) by leveraging Python and SQL for data analysis, leading to substantial cost savings through early issue detection.
- Supported senior equity analysts in analyzing global REITs and the IT sector, contributing to informed investment decisions through financial statement analysis, ratio analysis, and summarization of corporate news and analyst call takeaways.
- Developed enhanced financial models, including Discounted Cash Flow (DCF), Weighted Average Cost of Capital (WACC), and 3-statement models, resulting in transparent, readable, and well-controlled output that facilitated executive-level decision-making.
- Served as a single point of contact for process re-engineering and automation, collaborating with the IT Team. Utilized MS Excel macros to automate company performance reporting and charting, reducing manual efforts and improving efficiency.

Projects

Twitter Financial Forecasting

- Considering the past 5 year's income statement of Twitter to predict the future revenue for the upcoming year, using R language, business forecasting modules and graphical representation status.

Starbucks Business Analysis

- A complete analysis of Starbucks 10-K and Proxy for the past 3 years had to present market capitalization, different businesses it is involved in, most profiting business, operations breakdown and growth rate analytics.
- Also, about management compensation analysis and did they succeed in their 5-year period plan.
- On successfully completing the analysis, Starbucks was a potential investment to Investors.
