

HemanthSaiKancherla

Number: 469-778-5279 Ext 115

Email: durga@tekjobs.ai

SUMMARY:

- Having 5+ years of experience as a Java Full Stack Developer in IT industry and experienced in Software Analysis, Design, Development, Implementation and Testing of Object-Oriented Applications and Web based Enterprise Applications using java/J2EE.
- Experience in working in environments using Agile (SCRUM) and Test-Driven Development (TDD) development methodologies.
- Experienced in UI design developed Front End using JSP, HTMLS, CSS3, JavaScript, Ajax, JQuery, AngularJS, Angular 2.0, NodeJs, React.Js and BackboneJs.
- Experience with Core Java with Multithreading, Concurrency, File Handling I/O, Generics, Data Structures and Collections, Garbage Collection.
- Experienced in java8 features like Parallel Streams, Lambdas, functional interfaces, and filters.
- Experienced on developing, deploying, and managing N - tier, server-centric J2EE enterprise class projects using Eclipse IDE 3.x/4.x, My Eclipse 6.5, J2SE1.4/1.5/1.6 (Java 2, Applets, swing, JDBC 3.0, RMI), J2EE 1.5 web application technologies (servlets 2.x, JSP 1.xn.x, JSTL 1.2, JSF 1.x, JNDI), Enterprise application technologies (EJB 2.X/3.0, JMS).
- Experience on Design Patterns (J2EE) like Singleton, Factory, DAO, Session Facade, Front Controller, and Delegate Pattern.
- Experienced in developing messaging module by using Spring JMS, Apache Camel and Rabbit MQ.
- Experience in Spring and Struts (MVC, architecture, interceptors, action mappings and resource bundles).
- Experienced in worked on developing Microservices using Spring-Boot.
- Experience in development and deployment of applications using JBoss, Web Logic Application Server, IBM WebSphere Application and Apache Tomcat.
- Experience in developing SOAP based Web Services using Apache CXF and JAX-WS.
- Experienced in developing Restful Services using JAX-RS specification like Jersey and Rest Easy to implement REST based Application.
- Experience in using bug/issue tracking, project Tracking and Management tool JIRA.
- Experience working on web services SOAP & REST, JAX-WS, JAXB, WSDL and UDDI registry.
- Working in implementing Service Oriented Architectures (SOA) using XML based Web Service such as SOAP, UDDI and WSDL.
- Experienced with Cloud Computing Service environment like (AWS) Amazon Web services (EC2, EBS, S3 and ELASTIC SEARCH).
- Worked in designed fully distributed system with the use of Restful API and Micro Services.
- Experienced in complete understanding of the DevOps process with continuous integration using Jenkins, JIRA, GIT, and CHEF.
- Experience in developing model components using ORM technologies like MyBatis, Hibernate (Caching, Hibernate Template, DAO) to write Database independent persistence logic and to maintain portable relationships between the databases.
- Experienced for developed the micro services framework prototype with guidelines, the developers have followed as skeleton model and developed their interfaces on top of the baseline prototype.
- Experience in J2EE Testing in developing test cases with JUnit, MOCKITO for unit testing, and logging using Log4j.
- Experienced with RDBMS implementation and development using Oracle, My SQL, MSSQL and DB2.
- Expertise in database modeling and development using No SQL Database such as MongoDB and Cassandra.
- Experience in using version control and configuration management tools like GIT, SVN and CVS.

EDUCATION

- Bachelor's in computer science and Engineering from *VIT University, Tamil Nadu, India* - April 2018

TECHNICAL SKILLS:

Programming Languages	C, C++, Java, SQL, PLSQL, Socket Programming
Scripting Languages	XML, XHTML, Vue JS, Angular2.0, Bootstrap, NodeJS, BackboneJS, Javascript
Tools	JUnit, Selenium web Driver, TestNG, Protractor, Mockito, ANT, Maven, Swagger, Postman,
Frame Works	Spring Boot, Spring MVC, Spring JPA, Spring Cloud, Struts, JSF, JPA, EJB and Hibernate, iBatis, JMS
Web Services	SOAP, UDDI, WSDL, JAX-RS, JAX-WS, RESTful web
Databases	Oracle 11g, MySQL, PostgreSQL, MongoDB, Cassandra
Debugging Tools & CI/CD	JIRA, Jenkins, CHEF

Version Control	Git, Tortoise SVN, CVS, Bamboo
IDE Tools	Eclipse, Net beans, IntelliJ, STS
Web/App/DB Servers	IBM WebSphere, WebLogic, Apache Tomcat, JBoss, SQL Server 2012

PROFESSIONAL EXPERIENCE

CVS, NJ June 2022 to Till Date
Full stack Java Developer

Responsibilities:

- Involved in the coding and integration of several business-critical modules of CARE application using Struts, Java, Python, Spring, Hibernate and REST web services on WebSphere application server.
- Developed the Web Based Rich Internet Application (RIA) using JAVA/J2EE (spring framework).
- Designed and developed Enterprise Eligibility business objects and domain objects with ObjectRelational Mapping framework such as Hibernate.
- Developed Servlets and JSPs based on MVC pattern using Spring Framework.
- Designed and Developed WebServices to interact with various business sectors and used REST protocol for web services communication
- Used Angular.js framework to extend the HTML template
- Developed the core logics of business using POJOs, servlets, JSP's and deployed on Tomcat.
- Created procedures, functions and written complex SQL queries on Postgres and DB2 database.
- Involved in writing and executing PL/SQL stored procedures and functions and triggers for Oracle.
- Experience in MongoDB scripts to insert and update NoSQL database; automating data changes and reporting.
- Extensively involved in the development of backend Logic or data access logic using Hibernate.
- Used Cron job to data modify and maintaining the software.
- Used tools Jasper and Pentaho for Data Visualization.
- Built new analytics solution for customers. Uses Elastic search as backend.
- Extensively used JQuery UI and Angular.js to provide UI functionality.
- Wrote JUnit test cases for unit, integration, and functional tests, run automatically by Hudson/Jenkins in the builds triggered by each push to Git.

Environment: Java 1.8, J2EE, Java Script, Spring Boot, HTML, CSS, JSF, QA, DEV, MySQL, Postman, JDBC, J Query, SQL, PL/SQL, Eclipse, JSP, JSON, Jenkins, Git, J-unit, Selenium, Maven, QA, DEV, SOAP, WEB LOGIC, JDK.

Honeywell, TX October 2021 to May 2022
Full stack Java Developer

Responsibilities:

- Implemented the spring dependency injection of the Database helper instance to the action objects.
- Implemented Hibernate and spring to replace EJBs in the earlier architecture.
- Expertise in developing enterprise applications using Struts Frameworks.
- Developed additional UI Components and implemented an asynchronous, AJAX (JQuery) based rich client to improve customer experience.
- Used Ajax calls extensively – using JQuery, inside the WebApps and create a seamless flow of Quotes.
- Developed web pages using HTML/CSS, Perl, JavaScript.
- Implemented the Java API library using Git.
- Developed many JSP pages, used Dojo in JavaScript Library, Angular.js, jQuery UI for client-side validation.
- Developed portions of HTML5-based game for use in an online gambling promotion.
- Integrated Java code with Flex along with HTML, and CSS for application
- Responsible for writing service methods to retrieve data and also perform CRUD operations.
- Used MongoDB and NoSQL to create complex procedures and functions.
- Developed PL/SQL procedures for login module and written complex sql queries.
- Implemented the Connectivity to the Data Base Server Using JDBC.

Environment: Java, Spring IOC, Hibernate 3.0, J2EE, jQuery, JDBC, PL/SQL, HTML, IBM Web Sphere

TCS (TATA Consultancy Services), India
Java Developer

Feb 2018 – August 2021

Responsibilities:

- Deployed the OpenStack components as Iaas on the multi-node environment with High availability using fuel.
- Collaborated with an Agile team practicing scrum methodology and gained experience in Agile methods of software development Lifecycle.

- Deployed ELK stack using docker on one of the VM to analyse the reasons for the failure in the computes.
- Automated Data switch upgrade process, written in Java and Python and reduced process time from 1-2 hours per switch to 10-15 minutes per switch.
- Chatbot (HTML, CSS, JavaScript, jQuery, Bootstrap, Data Scraping, Python, NLP)
- Created a chatbot that answers all the questions from client-specific web pages.
- Created a beautiful UI and extracted the data from the client web pages using python BeautifulSoup.
- Trained the chatbot with the data extracted using RASA Natural Language Processing

Environment: Cloud Deployment (Python, Automation, OpenStack, Fuel, Java, ELK, Docker, Agile, selenium, Networks, Jira, Linux)

PROJECTS

Group Formation Tool (Java, Spring Boot, JUnit Automated Testing, MySQL, Agile, TDD, Solid, Design Patterns, Clean Code, Refactoring Techniques, CI/CD, Stored Procedures, Gradle) - Fall 2021

- Developed a web application using spring boot for universities where instructors can add students and TA for their respective courses.
- Developed an algorithm which divides students into groups based on the survey attempted by the students and criteria given by the instructor for each question.
- Implemented design patterns, CI/CD, and followed the solid principles, clean code, TDD, and refactoring techniques while developing the application.
- Designed the database for this application considering all the referential constraints and wrote stored procedures to access it.

Chat Application:

- Developed an interactive chat application with the React JS framework as a front end and NodeJS as a backend.
- To establish communication between multiple users, used socket.io and accessing the history of chats been restored through MongoDB
- **Sentimental and Semantic Analysis Tool (Python, Tableau, Spark, MongoDB)**
- Extracted tweets related to Dalhousie University and Halifax using python. Cleaned the data removing all the smileys, URLs, and special tags. Created a bag of words for each tweet and declared each tweet as positive, negative, or neutral based on the type of words it contains.
- Visualized the data on which sentimental analysis is performed and created a word cloud using Tableau.
- Extracted news data using python and saved it in MongoDB and calculated the relative frequency of the words using spark to find which news is most related to Dalhousie University and Halifax.
- Computed Term Frequency-Inverse Document Frequency and highest relative frequency in terms of semantic analysis.
- Building Neural Networks from Scratch (Python, NumPy, Matplotlib, Regularization, MNIST, Metrics, Sigmoid, Backpropagate, keras)
- **Build a Multi-layer perceptron with 7 layers which 784 neurons in the input layer and 6 neurons in the output layer using basic python**
- Trained MLP with MNIST dataset which contains handwritten number patterns by converting the training label into ASCII value.
- Implemented regularization techniques like lasso and ridge to reduce the error by punishing the weights of unrelated features

LEADERSHIP AND COMMUNITY INVOLVEMENT

- Business Analytics leadership Club: August 2022
- Indian Student Association Committee Member - August 2022
- Team leader for a project in manual testing - August 2021
- Social Ambassador for social networking sites for EvolutyzIt Services
